EXHIBIT A-14
STATEMENT OF WORK
UNIVERSITY OF NORTHERN COLORADO

The General Assembly has found that some services that are offered by institutions of higher education go beyond the scope of undergraduate services and are not part of the College Opportunity Fund stipend program. Instead, the General Assembly has determined that it is in the best interests of the state of Colorado for the Department to purchase these selected educational services for the benefit of students. In accordance with 23-1-109.7 Colorado Revised Statutes (C.R.S.) these services may include, but need not be limited to:

(a) Educational services in rural areas or communities in which the cost of delivering the educational services is not sustained by the amount received in student tuition;
(b) to (d) repealed;
(e) Educational services required of the commission to meet its obligations under reciprocal agreements pursuant to section 23-1-112;
(f) Graduate school services;
(g) Educational services that may increase economic development opportunities in the state, including courses to assist students in career development and retraining; and
(h) Specialized educational services and professional degrees, including but not limited to the areas of dentistry, medicine, veterinary medicine, nursing, law, forestry, and engineering and programs that address identified state or national priorities.

Graduate and Other Educational Services

In order to purchase graduate and other educational services the Department has developed a cost model that identifies expenses incurred by this Institution in educating graduate students. Based upon this cost information, the Department shall purchase services on a per credit hour basis. The per credit hour basis is a common method of determining costs and is easily identifiable and auditable under this contract.

Such services are purchased in order to provide advanced degrees in various fields of study and degrees in areas of state or national priorities. Each degree is designed to provide a specific field of knowledge to students that benefit the educational mission of the student and the state. A highly educated workforce attracts businesses and people to the state and helps create a diverse and robust economy. Further, these services allow citizens the opportunity to improve their educational knowledge and career opportunities by learning new skills. The Department finds that people who are highly trained and specialized in a field of study are more easily employed and desirable in the workplace, Shortages of nurses, teachers of math and science, teachers trained in delivering special education and teachers trained to teach those individuals that use English as a Second Language have all been documented at both the state and national level. The associated Classification of Instructional Program (CIP) codes for these courses are listed in **Exhibit D-14**. The Department therefore finds that the purchase of these services benefits all citizens and ensures the economic vitality of the state.

The System shall provide graduate and other educational services to the Department consistent with its statutory role and mission. Graduate services shall be purchased by the Department on a credit hour cost basis as identified in the cost model developed by the Department and Institution as set forth in **Exhibit C-14**.

During the period of this agreement, the Department will purchase from the institution the following units of graduate or other educational services:

a. The Department shall purchase 9,000 credit hours for Graduate I (Master level) services. The rate at which such credit hours shall be purchased will be six hundred and seventy three dollars ($ 673) per credit hour for a total of six million fifty seven thousand dollars ($ 6,057,000).

b. The Department shall purchase 1,779 credit hours for Graduate II (Doctorate level) services. The rate at which such credit hours shall be purchased will be seven hundred thirty nine dollars ($739) per credit hour for a total of one million three hundred fourteen thousand six hundred eighty one dollars ($1,314,681).

c. The Department shall purchase 33,200 credit hours of specialized educational services for programs that address identified state or national needs at differential rates according to costs (less stipend of sixty two dollars ($62)) per credit hour for a total of eleven million eighty-eight thousand eight hundred and fifty nine dollars ($11,088,859).

In order to ensure that such services are provided in a reasonable and fiscally responsible manner, the System shall report annually, through the Student Data Reporting Data System (SURDS), and the Final Student Enrollment Report, or by other means noticed and established by the Department, the number of student FTE served and credit hours provided by each category listed in this exhibit. If such reporting shows an amount of credit hours lower than is purchased herein, the Department shall adjust the payments under this contract accordingly. Further, the Department may audit such services periodically to ensure contract and statutory compliance including, but not necessarily limited to verifying that the number of credit hours purchased has been provided.

Nothing in this section shall prevent the Institution from enrolling students above and beyond the units contracted for under Other Educational Services.
