OVERVIEW

This report was prepared by The Colorado Department of Higher Education (DHE) pursuant to 23-1-113.3 C.R.S.

The information in this report is presented to inform the ongoing dialogue regarding preparation for college and the effects of developmental education* in Colorado. This report documents data gathered by the Colorado Department of Higher Education (DHE) for academic year 2016 (Summer 2015, Fall 2015, and Spring 2016) as required by statute. The report concerns students taking developmental education courses at Colorado's public higher education institutions. The report is submitted to the Education Committees of the Senate and House of Representatives, the Joint Budget Committee (JBC), the Colorado Department of Education (CDE), and each Colorado public school district superintendent.

C.R.S. 23-1-113.3 defines areas of responsibility for the Commission with regard to developmental education:

- adopt and implement a remedial policy; develop funding policies for remediation appropriate to institutional roles and missions;
- design a reporting system that provides the General Assembly with information on the number, type, and costs of remediation;
- establish comparability of placement or assessment tests; and
- ensure each student identified as needing remediation is provided with written notification regarding cost and availability of remedial courses.

For more information please contact:

Michael Vente, Research and Information Policy Officer, Colorado Department of Higher Education, at 303-996-1321 or by email at michael.vente@dhe.state.co.us

*Developmental education is used throughout this report and includes traditional remedial education, assessment of a need for remediation education, and participation in Supplemental Academic Instruction.

HIGHLIGHTS

Highlights from Academic Year 2015-16

1. Overall, the percentage of the 2015 high school graduates placed into developmental education in at least one subject was 36.1 percent, a slight increase from the previous year of 35.4 percent.

2. Of the high school graduates who matriculated to college in Colorado, 7,838 students were placed into developmental education (an increase of 366 students from last year).

3. The percentage of female college students placed into developmental education was 37.9 percent, a slight decrease from last year. The percentage of male college students placed into developmental education was 34 percent, a slight increase from last year.

4. At two-year institutions, 79.1 percent of African American students were placed into developmental education. At four-year institutions, 49.3 percent of African American students were placed into developmental education. Both rates have decreased compared to last year.

5. At two-year institutions, 71.4 percent of Hispanic students placed into developmental education (a slight increase compared to last year). At four-year institutions, the rate of Hispanic students placed into developmental education is unchanged from last year at 39 percent.

6. Of Free and Reduced Lunch (FRL) participants, 53.6 percent were placed into developmental education which represents a slight increase compared to last year (53.4 percent last year). Of non-FRL students, 30.6 percent were placed into developmental education (31.4 percent last year).

7. When examining developmental education by subject, students almost equally required support in mathematics and English.

8. For the third year, students placed into developmental education had higher first year retention rates than non-developmental education students at community colleges.

9. At the four-year level, the retention rate for students not placed into developmental education was 77.8 percent, compared to 66.3 percent for those placed into developmental education. Retention rates have increased for both groups of students compared to last year (76.7 percent and 61.4 percent respectively).

10. More than 63 percent of all developmental education courses were completed successfully, a 0.6 percent increase from the previous year.

11. The estimated cost to the state and estimated tuition cost to all college students enrolled in developmental education courses is approximately $29.6 million in FY2015-16. This is a $9.7 million dollar savings from last year due to students taking fewer developmental courses and fewer courses being offered.

REPORT SUMMARY

The Colorado Commission on Higher Education has set a statewide goal of erasing the equity gap and increasing the number of Coloradans who hold a postsecondary credential to 66 percent.[1] In order to reach this goal, and for Colorado to have an educated workforce to fill the projected 74 percent of jobs that will require some type of education beyond high school by 2020[2], it is no longer enough to simply get students to college. Students must complete some type of post high school credential. Developmental education can no longer stand as a barrier to student progression along the education to workforce pipeline and ultimately to their success. To that end, a number of initiatives across the state are targeted at reducing students' need for, and lessening their time spent in, developmental education classes.

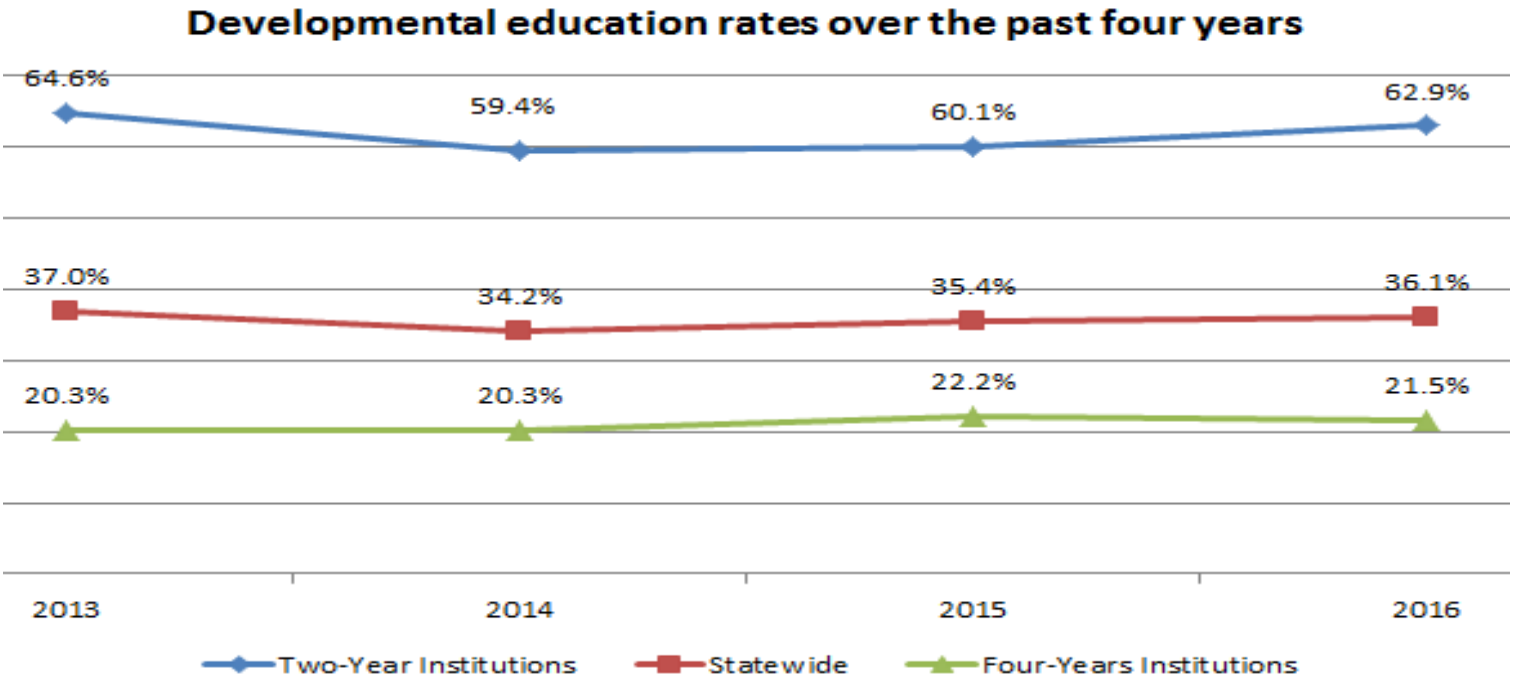
Colorado's developmental education rates are comparable with the nation. Our statewide developmental education rates have historically hovered below 40 percent. For the Colorado High School Class of 2015, the number of students placed into developmental education increased by less than 1 percentage point (0.7 percent). The developmental education rate for this year is 36.1 percent compared to last year's rate of 35.4 percent. In order to improve student success in developmental education, institutions of higher education have developed and/or redesigned the ways they offer and structure developmental education. In December 2014 the Colorado Commission on Higher Education enacted a policy to allow institutions to adopt the co-requisite developmental education model, known as Supplemental Academic Instruction (SAI), which allows students who are not college ready to enroll directly in college-level courses and co-requisitely receive academic support in a variety of ways, including but not limited to required labs, support courses, workshops, and tutoring. Additionally, since October 2014 a faculty-led Math Pathways Task Force has been coordinating with advisors and other faculty on their campuses to help ensure students do not take unnecessary developmental mathematics courses. A primary concern driving the task force's work is that college freshmen and dually-enrolled high school students are often advised into college algebra by default (which has a high failure rate) even though it may not be appropriate math preparation for the degree program the student will eventually choose. Initial assessment of these efforts shows promise as more students are able to pass mathematics courses and continue on with a regular college curriculum.

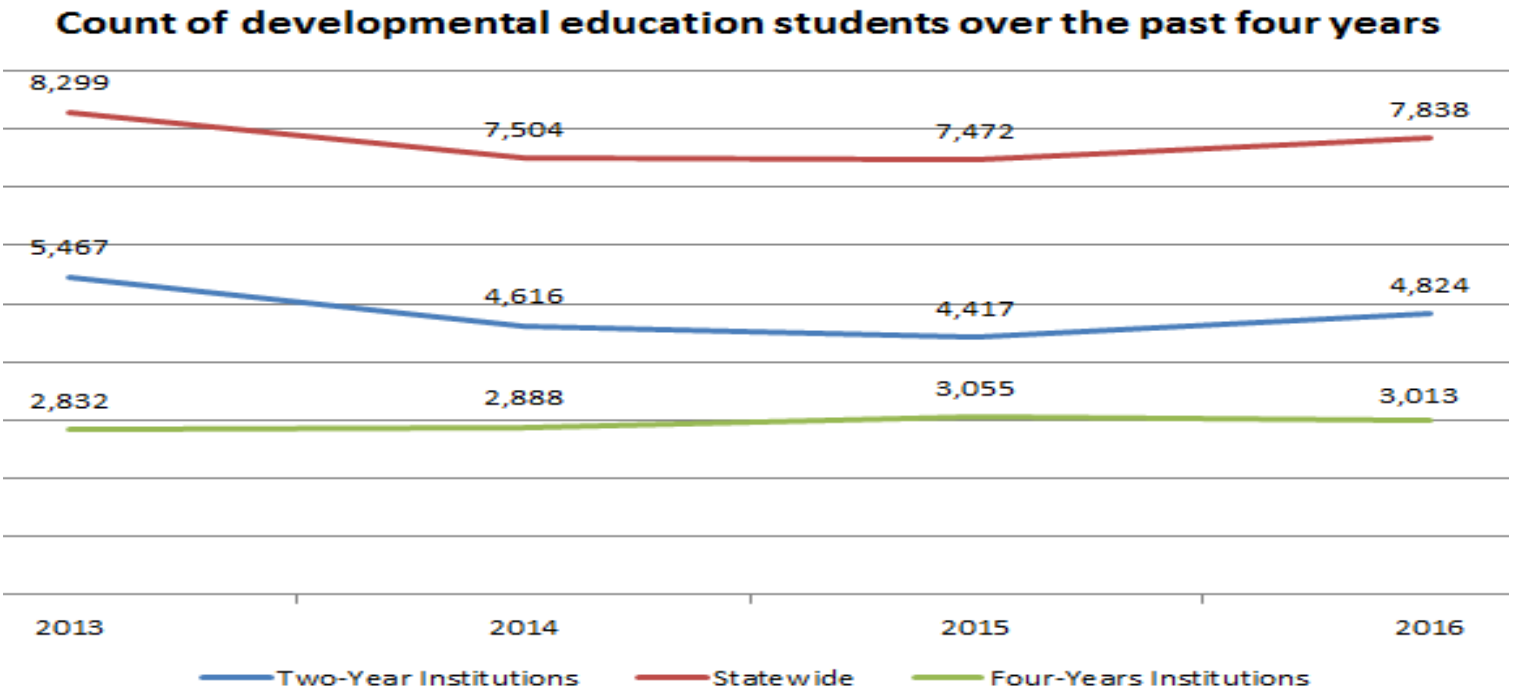
The percentage of 2015 high school graduates who enrolled in a two-year college and were placed into developmental education was 62.9 percent, an increase from the previous year of 60.1 percent of students. This rate includes community colleges, local district colleges, and 2-year students at dual mission colleges (Adams State University and Colorado Mesa University). The comparable rate for students who enrolled in a four-year institution was 21.5 percent, a slight decrease from last year's rate of 22.2 percent of students.

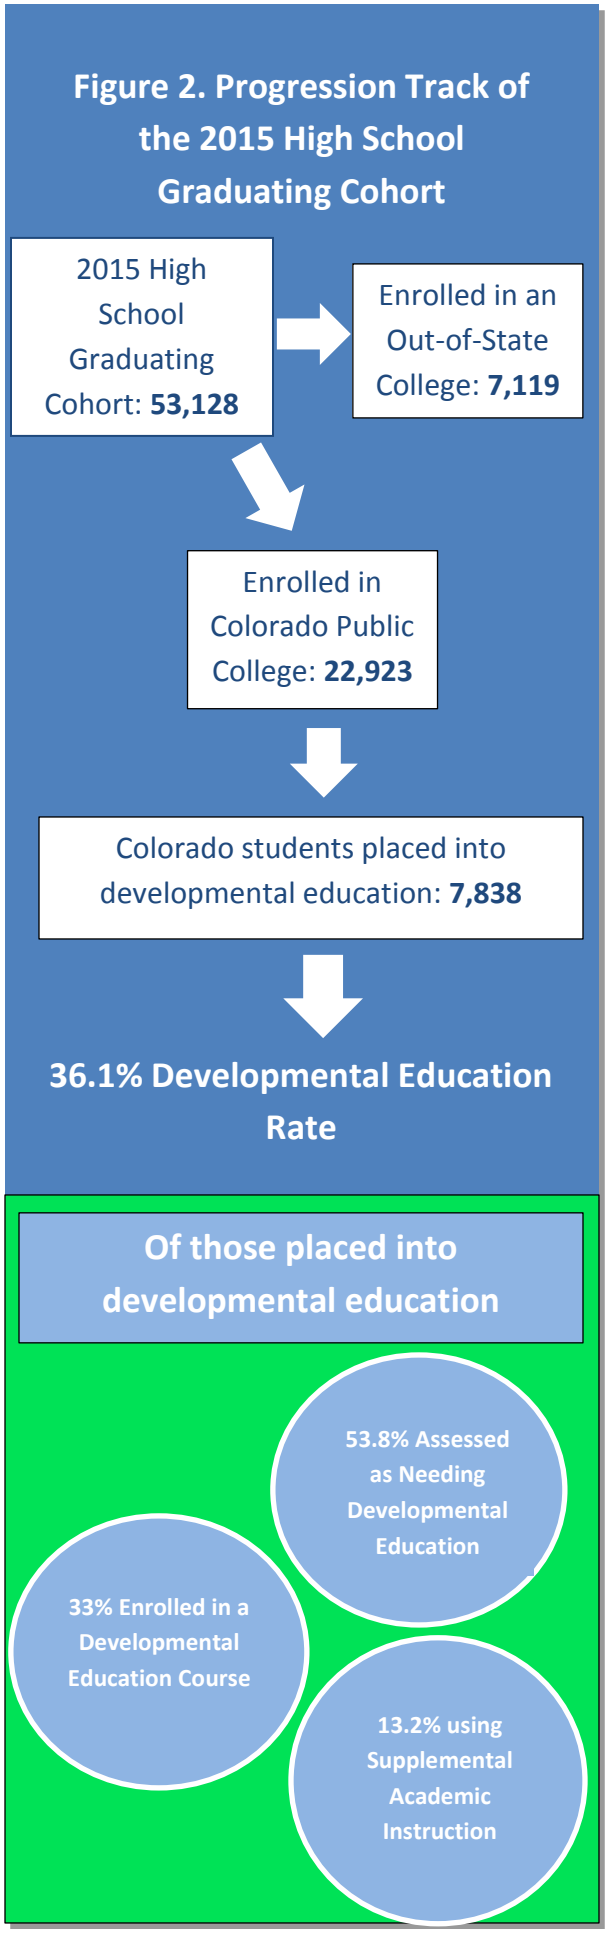
Figure 1 displays developmental education rates from the past four academic years statewide and by educational sector. This year saw a slight increase in students being placed into developmental education. This includes traditional remedial courses as well as Supplemental Academic Instruction (SAI), or co-requisite remediation. Along with the percentage increase in developmental education

rates, the raw counts of students assessed as needing developmental education increased compared to last year (7,838 this year compared to 7,472 last year).

Figure 1. **Longitudinal Trends in Developmental Education**







Assessment and Enrollment of Developmental Education Students

In 2015, 53,128 high school students graduated. Of those high school graduates, 56.5% enrolled into a postsecondary institution. The majority or about 76% of the college enrollees remained in state, while about 24% of Colorado high school graduates enrolled into an out-of-state college. Of those high school graduates who matriculated to a Colorado public college, 36.1 percent were placed into developmental education. This 36.1 percent is comprised of 53.8 percent being assessed as needing developmental education, 33 percent enrolling in a developmental education course and 13.2 percent participating in Supplemental Academic Instruction (SAI).

Developmental Education Rates by Public Institution of Higher Education in Colorado

In 2015-2016, the majority of community colleges experienced an increase in the number of students placed into developmental education compared to the prior academic year. The developmental education rate for Colorado community colleges was 61.3 percent, an increase from last year's 57.9 percent. The range of rates included a low of 40 percent at Morgan Community College to a high of 78.3 percent at the Community College of Denver. The high rate at the Community College of Denver could be a reflection of the unique role the college plays as the only two-year member of the Auraria Campus. The local district colleges had a combined development education rate for 2015 Colorado high school graduates of 60.3 percent, while the two year students enrolled at Colorado dual mission colleges showed a combined rate of 84.6 percent. Among four-year institutions, Metropolitan State University of Denver had the highest percent of four-year students placed into developmental education at 54.7 percent, an increase from last year. The University of Colorado Boulder and the Colorado School of Mines had no 2015 enrolled Colorado high school graduates needing developmental education. See Table 1.

PROFILE OF A DEVELOPMENTAL EDUCATION STUDENT:
Demographics of the 2015 High School Graduates Assigned to Developmental Education

Consistent with recent trends, a slightly higher proportion of females were placed into developmental education. When examining the students who were assessed as needing developmental education, 56.6 percent were females compared to 43.2 percent male (see Figure 3a). These rates are consistent with enrollment rates that have steadily shown a slight majority of female students matriculating compared to males. When examining developmental education by gender, 37.9 percent of females who graduated high school in 2015 were placed into developmental education upon entrance to college and 34 percent of males (see Figure 3b). At two-year institutions in the fall of 2015, 63.4 percent of females and 59.5 percent of males were placed into developmental education, compared to 25.7 percent of females and 21.9 percent of males who were enrolled at a four-year institution (see Table 4 [appendix]).

Figure 3a. **Gender breakdown of developmental education population (Statewide)**

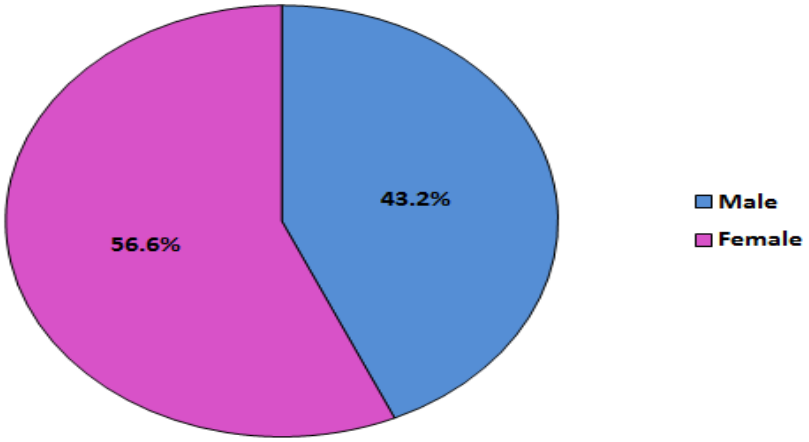

Figure 3b. **Developmental Education by Gender (Statewide)**

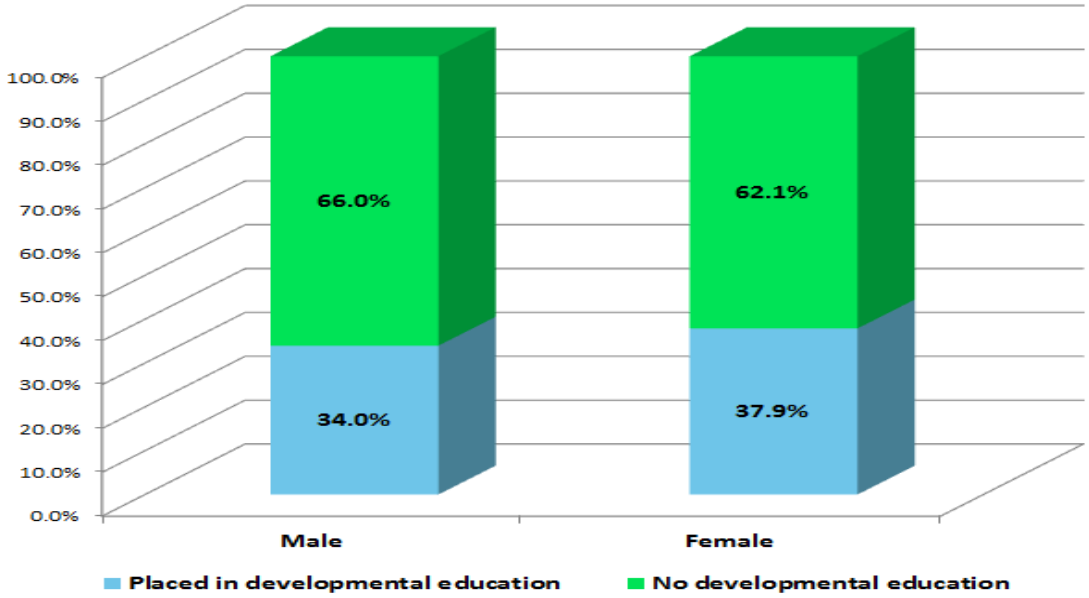

When examining developmental needs by race/ethnicity, minority students are more likely to be placed into developmental education compared to White, non-Hispanic students. See Figures 4a and 4b and Table 3 [appendix]. Among students from minority populations, African American high school graduates had the highest developmental education placement rate. Seventy-nine percent of African American students at two-year institutions and 49.3 percent of such students at four-year institutions were placed into developmental education. These rates are a slight improvement for African American students compared to last year's report. However, a nearly 25 point gap in developmental education placement between White students and African American students still exists which is the largest gap at the two-year college level.

Thirty-nine percent of Hispanic students at four-year institutions required developmental education. Over 70 percent of Hispanic students enrolled at two-year institutions required developmental education. These rates have slightly increased compared to last year. Significant action to support the needs of specific student populations is needed to erase the equity gap, as being college ready is an important momentum point towards credential completion and statewide attainment. As our diverse populations experience dramatic growth in Colorado, an analysis of best practices and success measures should be examined and potential expansion across the state explored.

Figure 4a. **Developmental Education rates by Race/Ethnicity (Two-Year Institutions)**

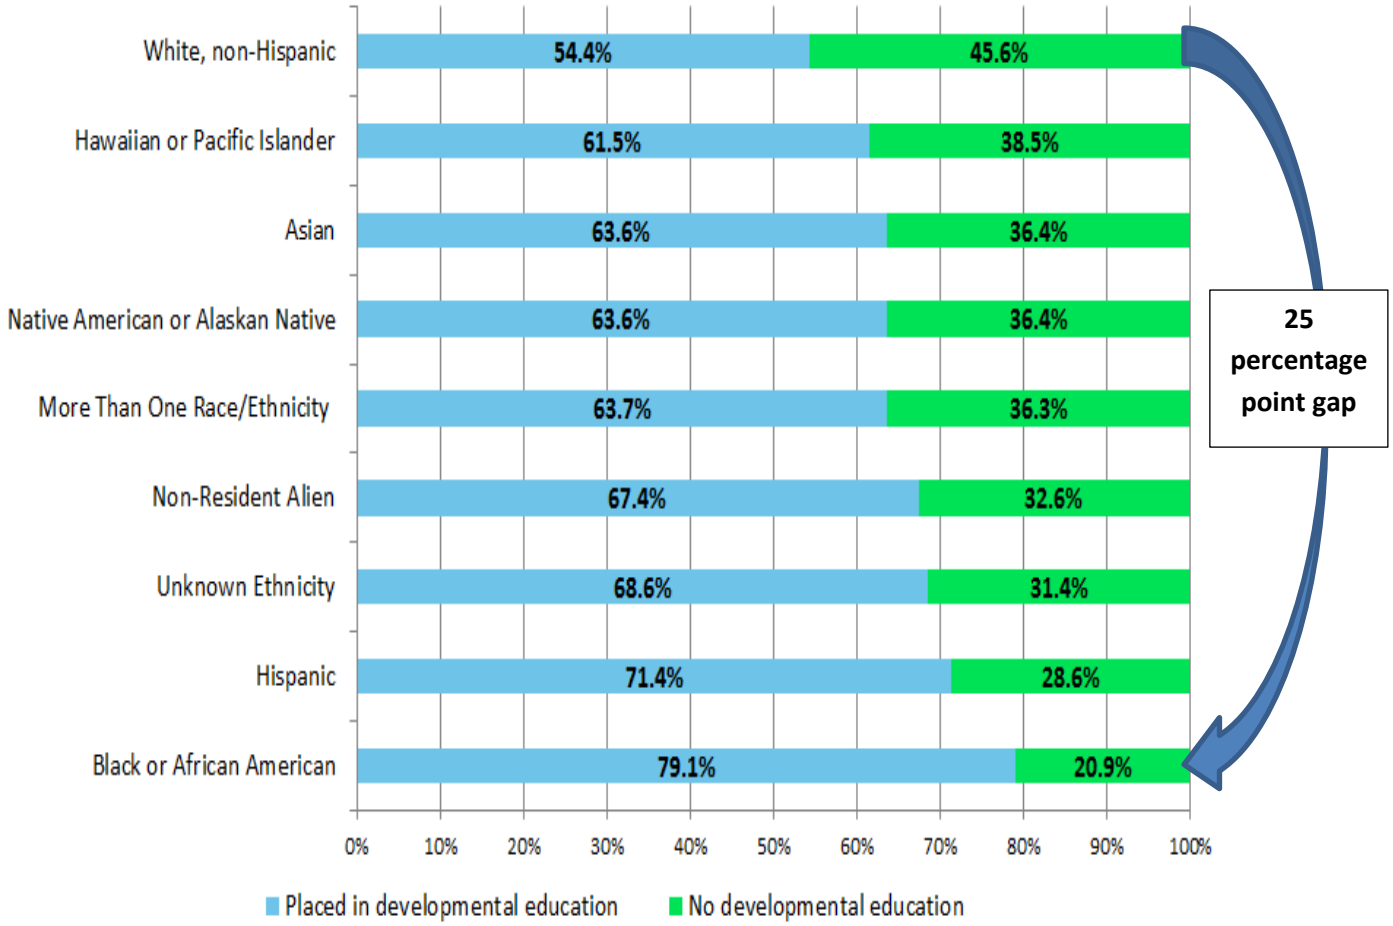

Figure 4b. **Developmental Education rates by Race/Ethnicity (Four-Year Institutions)**

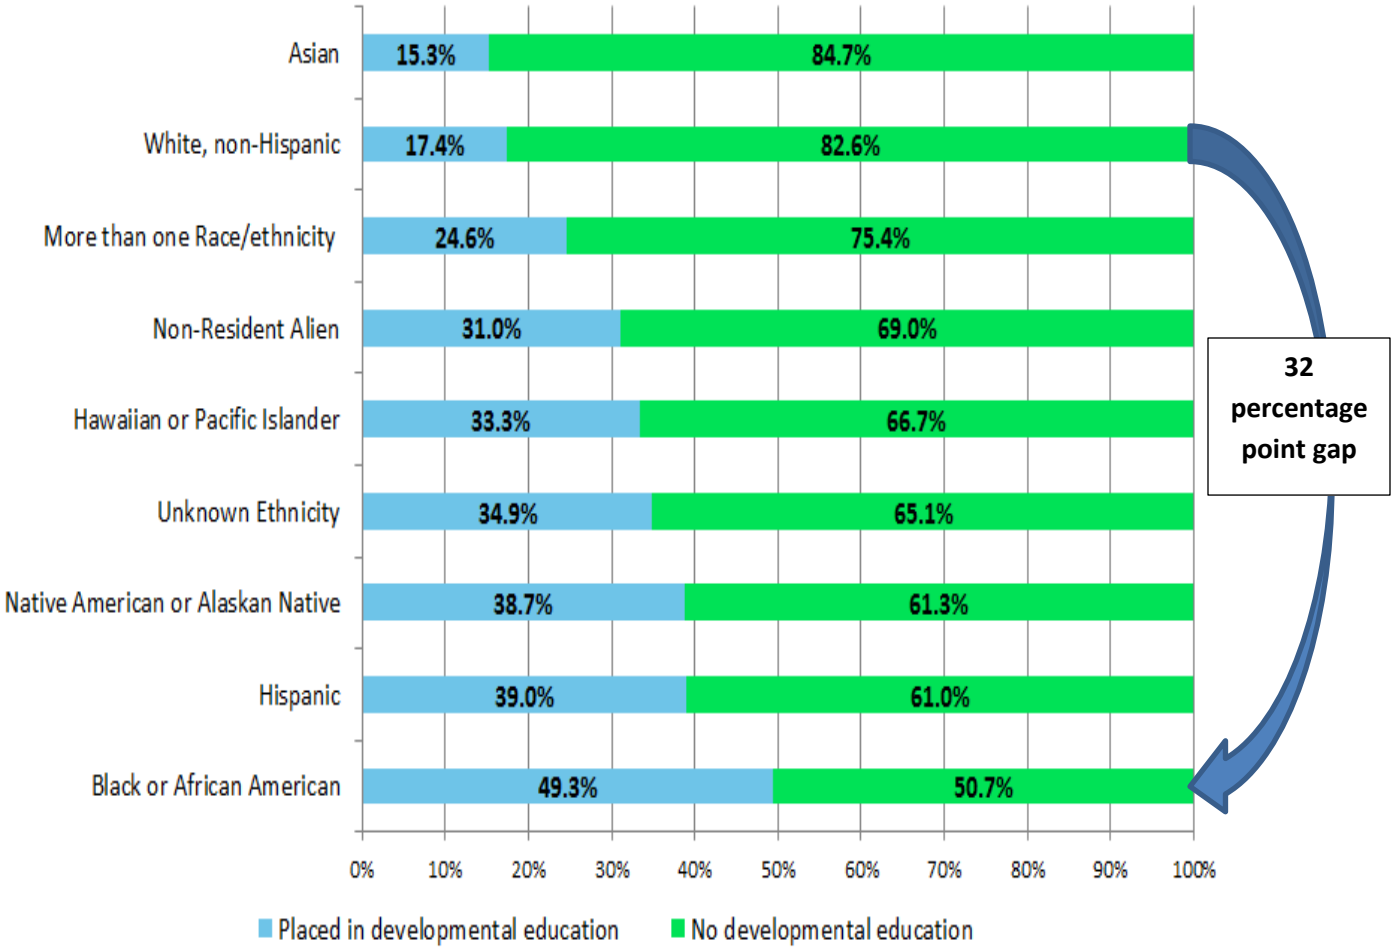

When examining developmental education needs by free and reduced lunch (FRL) participation, students who had greater financial needs and participated in FRL were more likely to be in developmental education than their peers who were not participants in the FRL program. Specifically, 53.6% of FRL students needed developmental education compared to 30.6% of non-FRL students who needed developmental education (Please see Figure 5).

English Language Learner (ELL) participants were also more likely to need developmental education than non-ELL high school graduates. Approximately, 75.7 percent of ELL students need developmental education compared 34.2 percent of non-ELL students (Please see Figure 6).

Special Education participation in high school is also associated with a greater need for developmental education. For those students who participated in special education in high school, 72.8 percent needed developmental education compared to 34.5 percent of traditional education students (Please see Figure 7).

Figure 5. **Developmental Education rates by Free and Reduced Lunch Participation in High School**

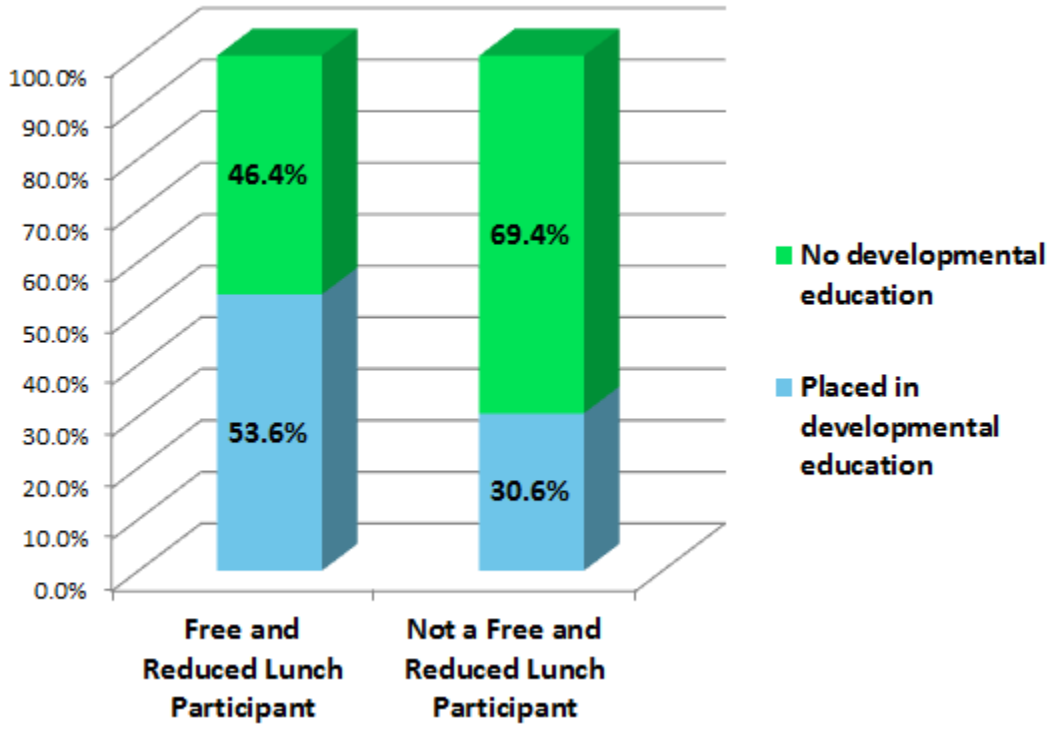

Figure 6. **Developmental Education rates by English Language Learner Status in High School**

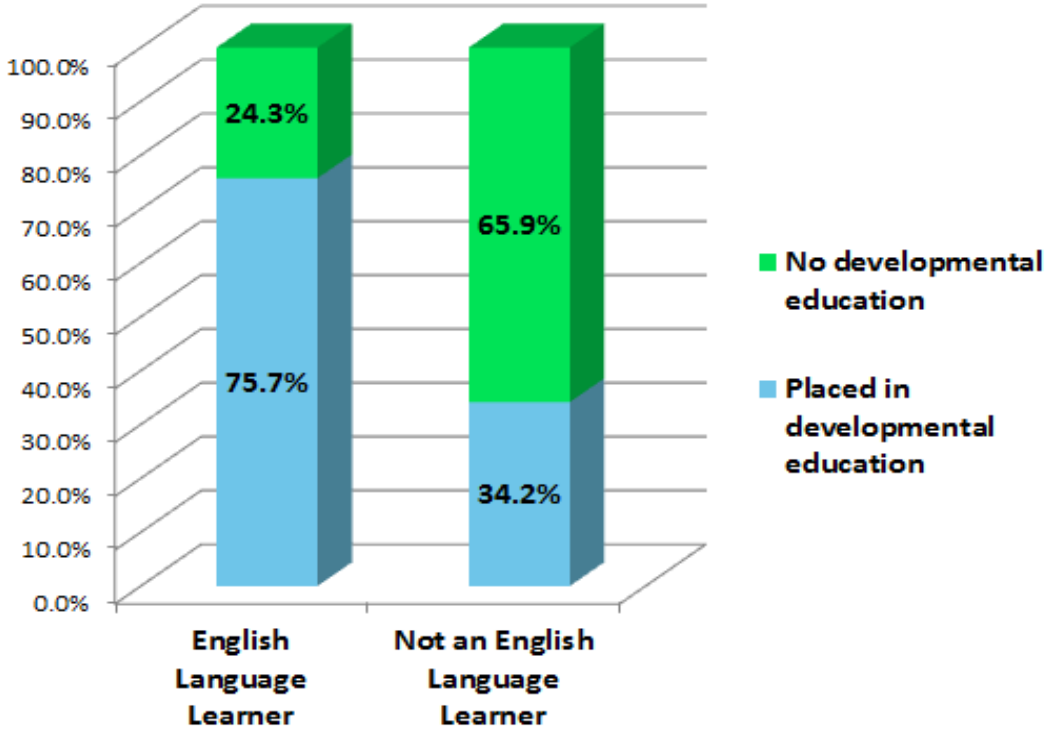
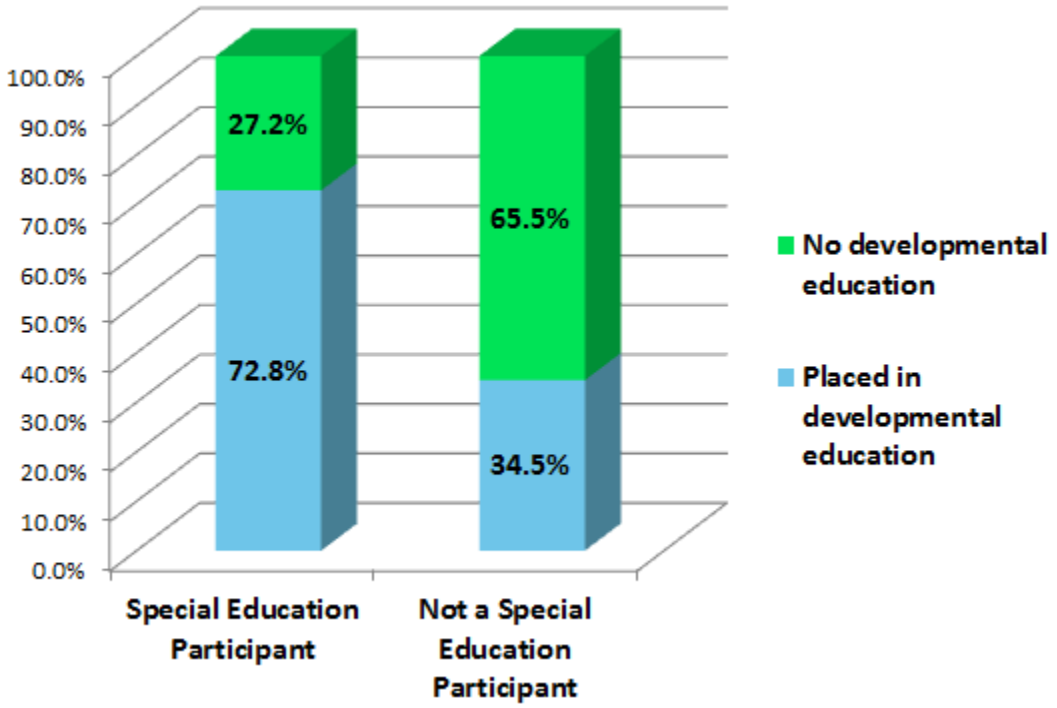


<u>Figure 7.</u> Developmental Education rates by Special Education Participation in High School

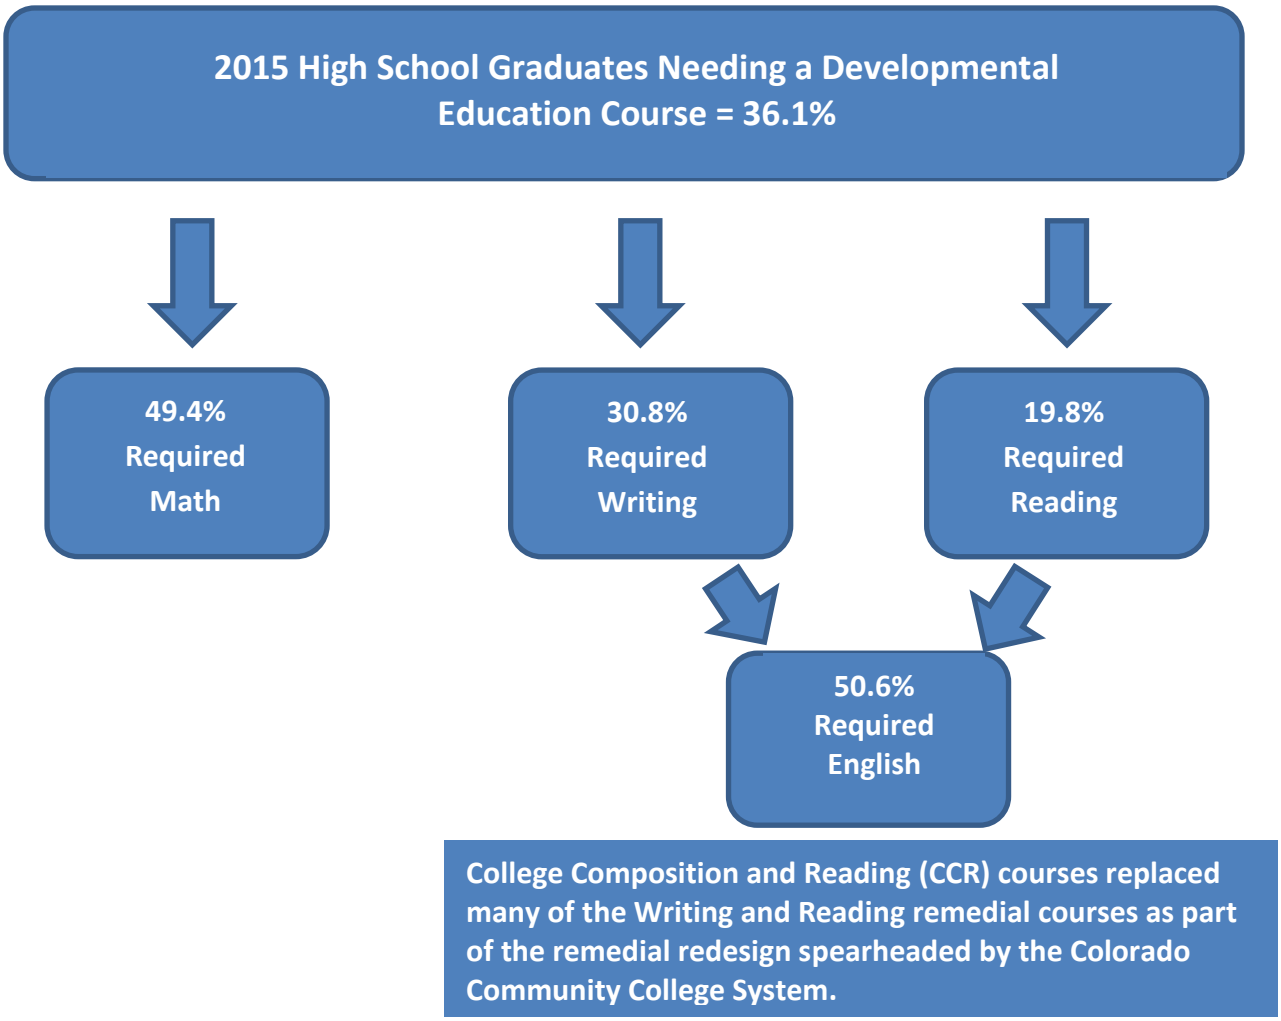


Developmental Education Rates by Subject

By subject, the placement in developmental education is fairly evenly split between Math and English with 49.4 percent needing Math developmental education and 50.6 percent needing English developmental education. Figure 8 illustrates the percentage of 2015 high school graduates assigned to developmental education by subject. Research has shown there is a negative relationship between the number of developmental education classes needed and a student's chance of academic success[3]. The Colorado Community College System has estimated that less than five percent of students assigned to a developmental education course will eventually go on to earn a degree.

Since 2013, in response to these bleak outcomes, the Colorado Community College System (CCCS) has successfully implemented developmental education redesign. The redesign involved a data-informed, evidence-based approach that reduced the costs, credits-required, and time-to-complete associated with Colorado's developmental education programs. The goal was to provide students with a curriculum that would be driven by what students needed to learn to be successful in gateway college courses[4]. Based upon initial research conducted by the CCCS, the redesign outcomes look promising. Early evidence suggests that students in redesigned developmental education courses are performing equally and sometimes better than students in non-redesigned developmental education courses. Additionally, the students are completing developmental education in a shortened time period, thus decreasing time to degree.

Figure 8. **Developmental Education by Subject**

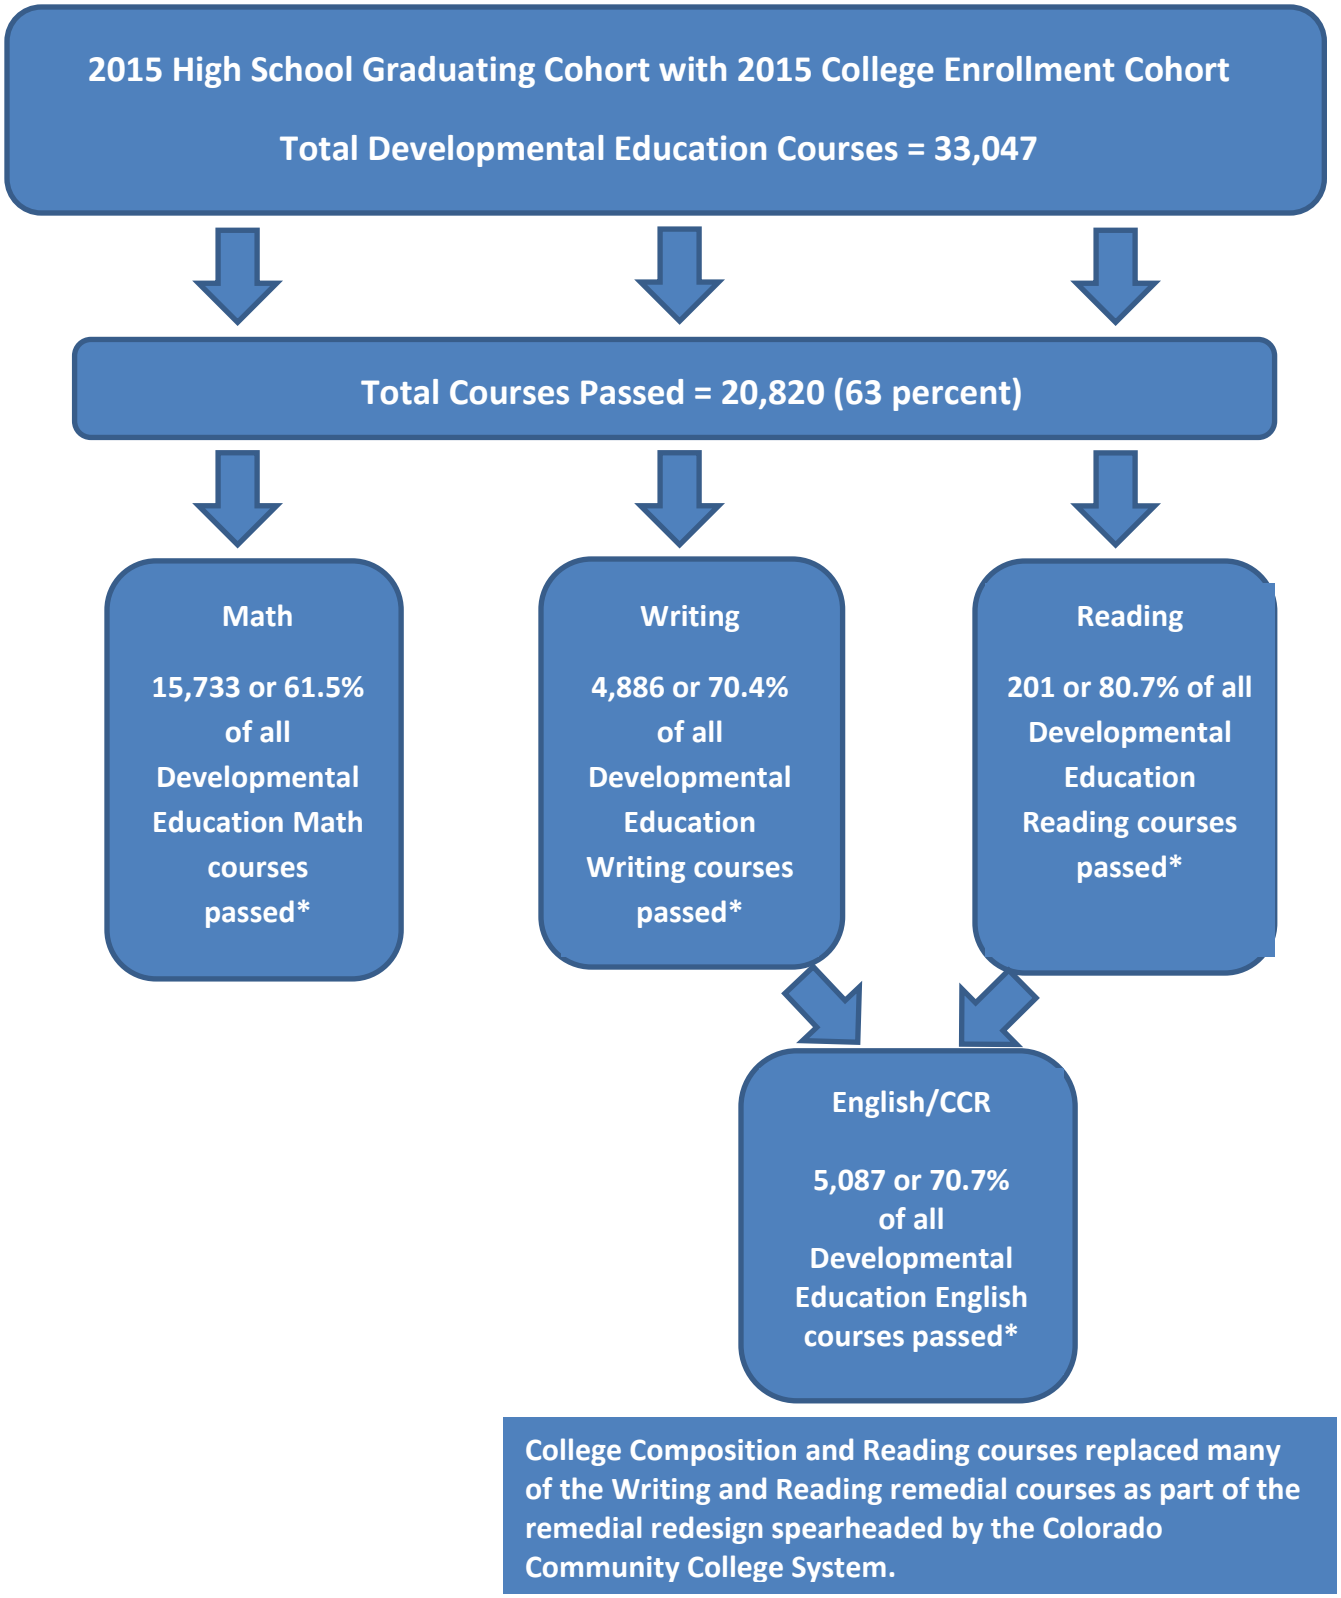


DEVELOPMENTAL EDUCATION COURSE COMPLETION AND COSTS

Developmental Education Summary by End of Term Completion

Figure 9 and Tables 6 and 7 in the appendix show developmental education courses attempted and total credit hours passed, failed, withdrew or incomplete. This includes the Colorado high school graduates for 2015 and all other students taking developmental education courses during 2015-2016. At all institutions, students enrolled in 33,047 developmental education courses. Of those, students passed 20,820 (63 percent, a 0.6 percent increase from last year), and failed, withdrew, took as incomplete or audited 12,226 (36.9 percent). The number of courses continues to drop while the rate for passage and failure remain similar. Figure 9 displays pass rates by subject. Please note these percentages are only based upon passed and failed and therefore don't include withdrawn courses. The pass rates for Writing (70.4 percent) and Reading (80.7 percent) are higher than the pass rates for Math (61.5 percent). The overwhelming majority (approximately 78 percent) of developmental education courses are in Math, far outpacing Reading and Writing.

Figure 9: **2015 College Going Cohort Pass Rate for Developmental Education Courses**



*Excludes students who withdrew by end of term

For the past two years, Supplemental Academic Instruction (SAI) has been available to students instead of traditional remedial courses. These SAI courses offer co-requisite instruction in writing or mathematics for students with limited academic deficiencies who are placed into college-level course work that is approved for statewide transfer (i.e., gtPathways). Analysis of the data available for the past two years (2014-2016) provides important insights into students who use SAI.

Research conducted by the Colorado Community College System (CCCS) and Metropolitan State University of Denver shows positive outcomes for students enrolled in SAI. CCCS research shows that students enrolled in co-requisite or SAI courses in both CCR and in math show much higher success rates in college-level courses after a year than students who are in standalone developmental education courses[5]. Additionally, developmental education students in CCR appear to have a better chance of being successful in a college course if they take the developmental course. At Metropolitan State University of Denver, approximately 75 percent of students attending SAI will pass their course with a C or better[6].

Of the students who took SAI courses during the past two years, roughly half were low-income (53.8% were Pell Eligible and 47.7% received a Pell Grant). Approximately one-third (32.6%) were Hispanic and just under half (43.5%) were White. A small percentage was African American or Black (6.9%), Asian (3.9%), Native American/Alaskan Native (0.5%), or Hawaiian/Pacific Islander (0.2%). The sample also included Non-Resident Alien (1.9%), "unknown ethnicity" (5.7%), and non-Hispanic/more than one race/ethnicity (4.8%). The Department continues to research the characteristics and outcomes of students using SAI.

Developmental Education Credit Hour Costs

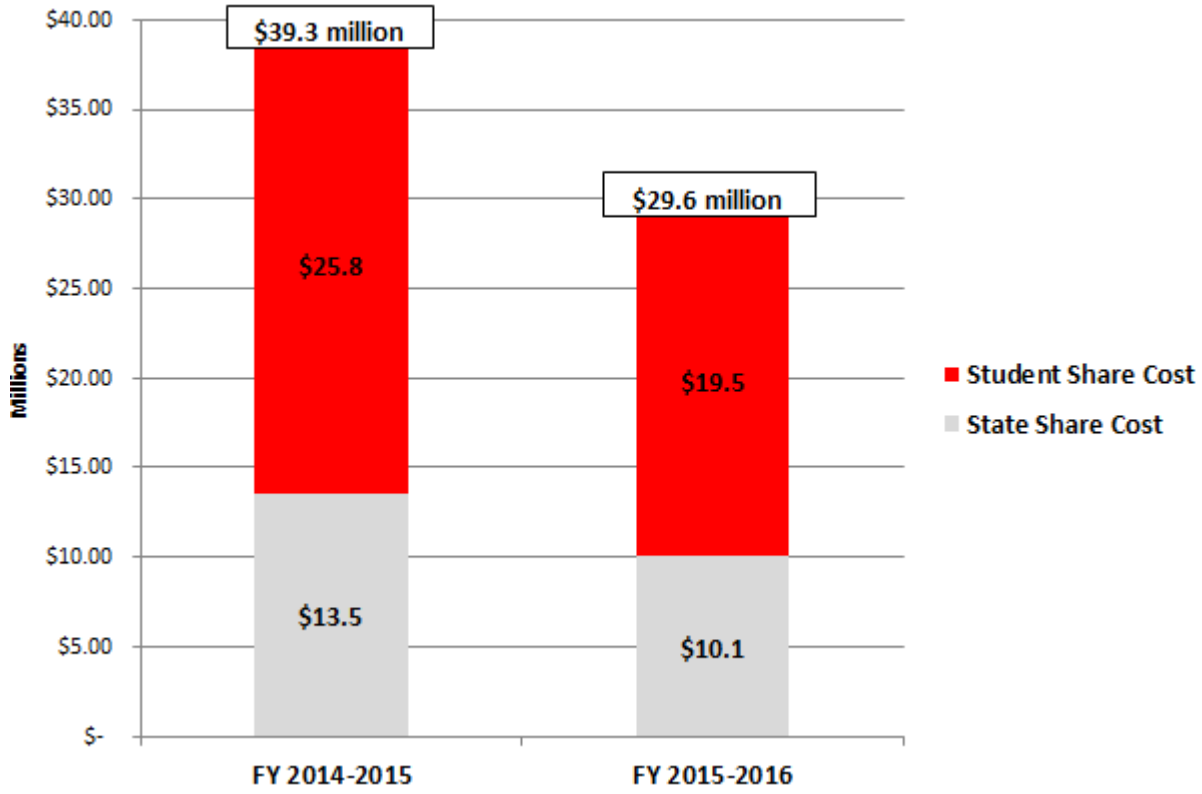
The estimated total cost for instruction associated with developmental education enrollments is $29.6 million. This total is comprised of an estimated state cost of $10.1 million and an estimated student cost of $19.5 million. Table 8 and Figure 10 show the estimated state cost for Fall 2015 and Spring 2016. Consistent with last year's estimated figures, students carry a high portion of the responsibility to cover the cost for developmental education courses.

The FY 2015-2016 developmental education cost is a decrease over last year's estimated cost of $39.3 million and shows a savings of $9.7 million due to fewer developmental education courses being offered and fewer developmental education credit hours taken by students. Two-year and four-year institutions that are authorized to offer developmental education reported that 27,680 developmental education courses were taken in Fall 2015 and Spring 2016, a decrease from last year's figure of 37,324. This is driven by the implementation of Supplemental Academic Instruction (SAI), a method of co-requisite developmental education.

The estimated cost for developmental education is calculated by utilizing actual year data provided on total educational and general expenditures and revenue at the public institutions of higher education. Total revenues for educational and general expenditures are comprised of a combination of sources but are primarily comprised of tuition and state funding (General Fund or College Opportunity Fund dollars). This amount is divided by the total number of credit hours provided by the colleges to students over the same fiscal year to generate an average cost per credit hour. This

average cost per credit hour is then applied to the number of developmental education credit hours which generates an estimated average cost for total developmental education, which is further divided into student share and state share. These cost tables do not include cash funded courses or developmental education coursework taken during the summer.

Figure 10. **FY 2015-16 Estimated Developmental Education Cost with comparison to FY 2014-15**

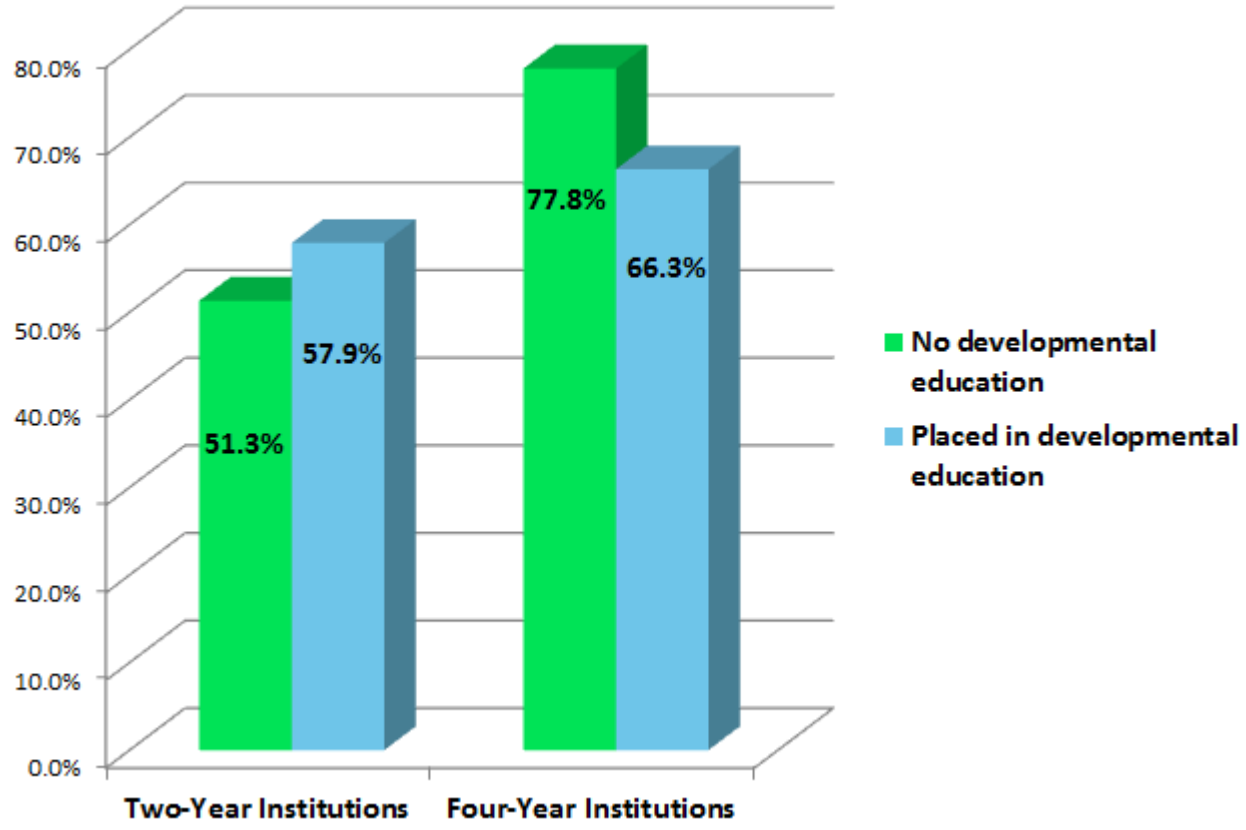


FIRST YEAR RETENTION: Retention Rates of Developmental Education Students

This section examines the retention rates of student placed into developmental education by institution. First year retention is an important momentum point on the way to earning a college credential. Measuring success is focused on the number of students who move through the developmental education sequence into credit-bearing courses, into their second year of college and on to graduation. Table 5 (appendix) and Figure 11 compare overall retention rates of students assigned to developmental education and those not assigned to developmental education by type of institution. Looking at all Colorado students, those who required developmental education were less likely to be retained into their second year of college. However, this trend did not apply to students at two-year institutions in Colorado. At Colorado public community colleges, 57.9% of students who needed developmental education enrolled in their second year of college compared to 51.3% of two-year students who arrived on campus without developmental education needs. At four-year institutions, the difference between one-year retention rates and developmental education placement was more pronounced. The retention rate for four-year students not assigned to

developmental education coursework was 77.8% compared to 66.3% for those assigned to developmental education coursework, an approximately 12 percentage point difference in retention.

Figure11. **Developmental Education Placement and One-Year Retention (Two-Year Institutions and Four-Year Institutions)**



DEVELOPMENTAL EDUCATION BY SCHOOL DISTRICT AND HIGH SCHOOL

Table 9 (appendix) shows data on the number of students assigned to developmental education by high school. Table 11 (appendix) shows data on the number of students assigned to developmental education by school district. For confidentiality purposes, data from high schools with 16 or less graduates enrolled are not displayed, though these students are included in the overall developmental education rate. Tables 10 and 12 disaggregate the most current year of data by high school and district.

Developmental education rates by high school with 17 or more graduates range from a low of 0 percent at The Vanguard School in Colorado Springs and D'Evelyn Junior/Senior High School in Jefferson County to a high of 88.5 percent at Jefferson High School in Greeley. Approximately 25 percent of high schools have a 2015 developmental education rate of 25 percent or lower, while nearly 40 percent of secondary schools have a developmental education rate between 26 and 50 percent. Approximately 35 percent of high schools have a developmental education rate greater than 50 percent of their graduates not being college ready.

REFORMING THE SYSTEM OF DEVELOPMENTAL EDUCATION

The Colorado educational system is fully invested in graduating high school students who are college ready and do not require developmental education. This shared goal is necessary for Colorado to meet our statewide attainment, credential completion, and equity goals in order to meet the needs of our workforce. This following section highlights the current remediation reform work occurring across the state and discusses future alignment and next steps.

A recent revision of the Colorado Commission of Higher Education's Statewide Remedial Education Policy (now known as the Developmental Education Policy) signals a paradigm shift in the way institutions approach placement and developmental education. Whereas the previous policy was interpreted to mean that "no student should be left untested for possible remediation," the purposes of the newly revised policy are 1) to enroll students in credit bearing, college-level courses whenever possible; 2) to prevent unnecessary placement testing of students; and 3) to ensure that each student identified as having developmental education needs is afforded appropriate opportunities to:

- enter directly into college-level English and mathematics courses; or
- receive other alternatives to developmental education, such as summer boot camps and refresher courses; or,
- receive the appropriate co-requisite, Supplemental Academic Instruction (SAI) while enrolled in college-level English and mathematics courses; or
- receive, as a last resort, non-college level developmental education.

Also, institutions shall ensure that developmental students who place into SAI or non-college level developmental education complete the sequent, college-level English and mathematics course(s) required of their programs within the students' first 30 semester credit hours. (It should be noted that institutions may also offer SAI to non-developmental education students but that instance is not subject to this policy.) Institutions shall also ensure that after students have completed developmental education coursework with a C- or higher that the students are exempt from further placement testing (even if they transfer to another institution) and may enroll in the sequent college-level course the following semester. Institutions shall integrate advising and other student supports early on in the placement process. Prior to first semester registration, institutions shall notify students:

- if they have been identified as needing developmental education;
- their options for developmental education; and
- which courses they should register for.

Colorado's admission policy was revised to permit students to meet admission requirements by demonstrated proficiency versus seat time. The Commission's Developmental Education policy aligns with State Board of Education's Graduation Guidelines, thus providing transparent college-ready expectations to K12 students, counselors and parents. This will change the way students are assessed and placed into developmental education and should decrease the number of students inaccurately identified as needing developmental education.

In March 2013, the Colorado Commission on Higher Education approved a Supplemental Academic Instruction (SAI) policy. By way of this policy, institutions can place students with limited academic deficiencies directly into college-level, credit-bearing courses with co-requisite academic support. For students at four-year institutions who previously were referred to a community college for developmental education, this policy permits these students to now enroll directly into college-level courses at their home institution rather than taking developmental education coursework at a community college. The only four-year university that could be utilizing SAI but currently does not is Colorado State University - Pueblo. However, CSU-Pueblo has indicated it will submit a request for SAI authorization to the Commission this year and begin offering SAI to remedial math students in selected placement ranges for a version of their MATH 109: Mathematical Explorations course for spring 2018. All fifteen public community colleges utilize SAI, though levels of current implementation vary between campuses. Participating institutions' SAI outcomes data are currently being analyzed.

Last, the Colorado Department of Higher Education is convening a faculty-led Math Pathways Task Force. The task force's overall goal is to:

- Develop expectations and processes that result in each institution of higher education in Colorado offering pathways in mathematics that yield (1) increased success for students in the study of mathematics; (2) a higher proportion of students completing in a timely manner the appropriate gateway math course(s) for their intended degree program; and (3) effective transferability of credits for students moving from one institution to another.
  The task force's final report and recommendations can be retrieved at: http://highered.colorado.gov/Academics/MathPathways/Default.html. The task force's recommendations are currently being implemented and will augment the other remediation reforms listed above.

The alignment and revision work occurring in Colorado holds promising outcomes for students, our education and workforce systems, and our state. Colorado public secondary and postsecondary institutions are dedicated to improving student college and career readiness. Despite a small increase in the percent of high school graduates being placed into developmental education, there have been pockets of positive and incremental movement in the right direction including, 1) using other methods of developmental education (like SAI) that allow students to enter directly into college-level coursework, 2) working with high schools to ensure Concurrent Enrollment students do not default enroll into College Algebra, which has high developmental education and failure rates, and 3) other K12 reforms to ensure all students graduating high school are college and career ready, with the ultimate goal of earning a credential.

Source: SURDS Student Course file (Fall 15 & Spring 16), All courses taken during during the time period;

* Please note that the percents shown are represented differently than in previous reports. This table shows a percent per subject. Previous reports show percents based on the total population.

** Failed includes Dev Ed Course End Of Term Completion codes 2 (Failed) and 5 (Withdrawn); In previous years, withdrawn was included in the Other category

*** Other includes Dev Ed Course End Of Term Completion codes 3,4,6 (Audit, Incomplete, In Progress)

Only includes math, english, and reading developmental education (determined by course prefix); FLC uses course number (Math-82, 83, 92, 93,Eng-90, 91)

Data pulled 1/30/2017

Table 8: Estimated Cost of Developmental Education Course Work at Public Two-Year and Four-Year Institutions - Fall 2015 & Spring 2016								Calculation from Budget Data Books					
Institution Offering Dev Ed Courses	2-year or 4-year	Courses fall 15-spring 16	Total Dev Ed Credit Hours	Total Dev Ed FTE	State Dev Ed Instruction Cost	Student Dev Ed Instruction Cost	Total Dev Ed Instruction Cost	Total Credit Hours Attempted	BDB Total E & G (less non-approp E & G)	Cost per Credit Hour	Total Dev Ed Instruction Cost (New Calculation)	State Share Cost	Student Share Cost

Appendix B: Technical Information

DEVELOPMENTAL EDUCATION METHODOLOGY AND DATA LIMITATIONS

Methodology

The high school graduating cohorts for this developmental education report were provided by the Colorado Department of Education. Utilizing the K12 State Assigned Student ID (SASID), DHE is able to link postsecondary enrollment and developmental education records to the K12 records. High school graduates were linked to enrollment records from Fall 2015 and Spring 2016. Once a college enrollment record was found for a high school graduate their undergraduate applicant file was reviewed for a developmental education assessment record no older than 6 months from their high school graduation (which includes Summer 2015). Additionally, the enrollment file was reviewed for enrollment in a developmental education course in the Fall 2015 or Spring 2016 term. College developmental education students can be duplicated in the college developmental education rates as students can enroll at multiple institutions. Developmental education students are not duplicated in the high school developmental education rate calculations.

This developmental education report methodology begins with the complete high school graduation cohort and looked at whether the student was assessed for developmental education and/or enrolled in a basic skills course, this report adds one additional function upon the recommendation of the local K-12 districts and with the support of the Colorado Department of Education. In this report, developmental education rates for high schools have been calculated based upon two high school cohorts. The first cohort is the completer cohort, which matches last year's report, and is based upon the academic year. In this cohort, early and late graduates are folded into the same class based upon the year. The second cohort presented in Tables 9 and 11 is the on-time graduation cohort in which a student is assigned a graduating class that does not change over time. This change in reporting aligns with the on-time graduation rate currently reported by our local districts and complies with the Every Student Succeeds Act (ESSA), previously known as the No Child Left Behind Act.

Data includes College Composition and Reading (CCR) courses as part of the list of developmental education courses. College Composition and Reading courses replaced many of the Writing and Reading remedial courses as part of the remedial redesign spearheaded by the Colorado Community College System. However, these courses are not considered Supplemental Academic Instruction (SAI). The CCR courses capture many students who would have been in either English or Reading remedial courses.

Data Limitations

In reviewing the tables in this report, one must be mindful that the data do not include recent graduates who enrolled in Colorado institutions for which we do not collect data, an out-of-state college, and or students who are missing a K12 State Assigned Student ID (SASID). Please note the accuracy of record matching of the SASID to college records may vary year to year. Additionally, numerous variables exist that DHE is unable to collect that may account for some of the variance surrounding those students who need developmental education and those adequately prepared for postsecondary education. Despite these limitations, DHE believes that this summary is a *reasonable representation* of the current developmental education landscape of Colorado.
