

ACCESS TO HIGH-QUALITY, AFFORDABLE EDUCATION FOR ALL COLORADANS

2008 LEGISLATIVE REPORT ON REMEDIAL EDUCATION

December 11, 2008

REVISED FEBRUARY 17, 2009

This revision incorporates error corrections from the original report. Specifically, Table 6, on page 15 was revised to incorporate numerical corrections to the "Assigned to Remediation in at least one Subject" column. The text which refers to this table on page 13 was also revised to incorporate the corrections.

1560 Broadway, Suite 1600 • Denver, Colorado 80204 • (303) 866-2723 DAVID E. SKAGGS, EXECUTIVE DIRECTOR

I. <u>INTRODUCTION</u>

This report documents action taken and data gathered by the Colorado Department of Higher Education (DHE) as required by statute to report annually on students taking basic skills courses at Colorado's public higher education institutions. DHE has prepared this report which summarizes: 1) actions by DHE and the Commission on Higher Education (CCHE) since adoption of the Remedial Policy in 2000; and, 2) data on assessed and remediated students collected from Colorado public higher education institutions; data on students enrolled in college basic skills courses; and data on the remedial needs of first-time enrolling students from Colorado public high schools. The report is submitted to the Education Committees of the Senate and House of Representatives, the Joint Budget Committee, the Colorado Department of Education, and each Colorado public school district superintendent

C.R.S. 23-1-113.3 defines areas of responsibility for the Commission with regard to remedial education:

- adopt and implement a remedial policy; develop funding policies for remediation appropriate to institutional roles and missions;
- design a reporting system that provides the General Assembly with information on the number, type, and costs of remediation;
- establish comparability of placement or assessment tests; and
- Ensure each student identified as needing remediation is provided with written notification regarding cost and availability of remedial courses.

II. <u>CCHE POLICIES RELATED TO REMEDIATION</u>

A. Remedial Policy

In August 2000, the Commission adopted a remedial policy designed to ensure that:

- All enrolled first-time undergraduate students are prepared to succeed in collegelevel courses.
- Students assessed as needing remedial instruction have accurate information regarding course availability and options to meet the college entry-level competencies.
- Colorado public high schools are informed about the level of college readiness of their recent high school graduates.

The policy applies to all state-supported institutions of higher education (i.e., four-year and two year colleges), and governing boards and institutions of the public system of higher education in Colorado are obligated to conform to the policies set by the Commission within the authorities delegated to it by C.R.S. 23-1-113.3.

B. FTE Policy

The Commission revised its FTE Policy in March 2001, clearly identifying the public institutions that may claim state support for remedial education – Colorado community colleges, Adams State College, and Mesa State College – and the circumstances under which it may be claimed. A separate FTE reporting form was added to enable monitoring of state costs associated with the delivery of basic skills courses.

C. Revised Remedial Policy

The Commission revised its Remedial Policy again in 2003, effective for fiscal year 2005 to clarify: 1) a minimum passing score for placement in college-level mathematics; 2) determining concordances for scores between different types of assessment tests; 3) specifying the undergraduate student population to be assessed, and if necessary remediated; and, 4) clarifying when institutions are required to enforce mandatory remediation.

III. <u>REVISED REMEDIAL PLANS</u>

The original undergraduate student population subject to entry-level assessment and possible remediation was first-time degree-seeking undergraduates and non-degree-seeking undergraduates changing to degree-seeking status. Beginning in fiscal year 2005, institutions submitted course and student registration data files to DHE that served as the basis for Colorado-specific evaluation of cut scores and the study of remediated student success in courses. And also in fiscal year 2005 an assessment, and where necessary remediation, of non-degree-seeking recent high school graduates, was added.

DHE staff identifies recent high school graduates in the SURDS files using actual year of high school graduation or an age-based estimate. When the year of high school graduation is not provided by institutions, date of birth is used to calculate a student's age as of September 15 of the specified year, and those students with a calculated age of 17, 18, or 19 years of age will be included in the frequencies. In fiscal year 2007, DHE staff added students with a calculated age of 16 to the frequencies.

The final component of the revised remedial plans outlined how institutions advised students with academic deficiencies about options for meeting their responsibility to enroll in appropriate developmental coursework. Effective fiscal year 2005, assessed students not meeting the specific minimum cut score may be placed in college-level courses provided that a student's transcript(s) or secondary level assessment justifies such placement. Institutions were also required to implement mandatory advising of students with 30 hours of course work if the student still has unmet basic skills deficiencies.

IV. EVALUATION OF REMEDIAL POLICY

In FY2009, an evaluation of the remedial policy will continue to determine whether the policy is carrying out what it was intended to do at its inception.

V. DATA ON ASSESSMENT AND REMEDIATION

During FY 2001, DHE staff and representatives from governing boards developed a reporting system in order to provide the General Assembly with information on remediated students and the type of remediation needed. Beginning summer/fall 2001, institutions submitted the first data files.

A. Methodology and Data

• Methodology: Student cohorts are based on: 1) entering degree-seeking and non-degree seeking undergraduates assessed by a Colorado public institution of higher education for the specified year; or 2) a recent Colorado public high school graduate¹. DHE produced the calculations by linking student data from ACT and the College Board with DHE's Student Unit Record Data System (SURDS) enrollment and applicant files.

• **Report Format:** This report presents information in two parts. Initially, data are provided on undergraduates assigned to remediation by Colorado public colleges and universities in fiscal year 2007. The second section focuses on a subgroup of undergraduates: recent graduates from Colorado public high schools assigned to remediation. In the second section, data are organized by school district and high school reporting on the number of students from each high school being assigned for remediation and in what subject.

• **Data Limitations:** In reviewing the following tables, one must be mindful that the data do not include recent graduates who enrolled in an out-of-state college, delayed entry into higher education for at least one year after completing high school, were not assessed, or were reported by institutions with missing data (e.g., year of high school graduation, age, high school code, and/or assessment status).

As is often the case with an undertaking of this magnitude, some issues remain to be addressed by the higher education institutions that have affected rates from year to year and limit interpretation over multiple years. While data collection has improved over the five years, colleges and universities continue implementation of new assessment processes which subtly influence who is included in the population that is reported on. At the state level, revisions to the remedial policy were made in fiscal year 2005 which made significant changes to the population reported on with the inclusion of non-degreeseeking students. Four years of data are now available which include the non-degree population. DHE believes that the summary is a reasonable representation of remedial

¹ Recent high school graduates are defined as students who a) have graduated from a Colorado public or private high school (or its equivalent) during the previous academic year; or b) are 16, 17, 18, or 19 years of age. Age will be calculated as of September 15 of the specified fiscal year.

needs of first time recent high school graduates entering higher education during fiscal year 2008.

B. Remedial Data Summary for All Assessed Undergraduates

In FY2008 approximately 30% of all students were assigned to remediation in at least one discipline (Table 1, page 6). At the two-year institutions the overall remediation rate in FY2008 was approximately 53%, with a low of 43.6% at Arapahoe Community College and a high of 69.5% at Pueblo Community College. At the four-year institutions the overall remediation rate was approximately 21%, with a low of 0.5% at UCCS and a high of 66.7% at Adams State College.

At both two-year and four institutions, the subject with the highest number of students assigned for remediation was mathematics (Figures 1 & 2).

Figure 1 illustrates the percentage of recent high school graduates at two-year public institutions assigned to remediation by discipline. 16% of entering students at two-year institutions were assigned to remediation in all three subjects, mathematics, reading and writing.

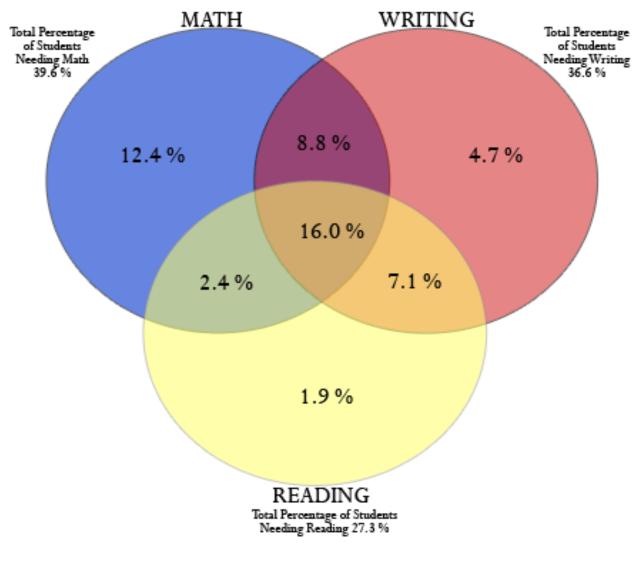

Figure 2 illustrates the percentage of recent high school graduates at four-year public institutions assigned to remediation by subject area. Approximately, 3% of entering students at four-year institutions were assigned to remediation in all three subjects, mathematics, reading and writing.

Table 2 (page 9) is an overview of assessment activity for FY 2005, 2006, 2007 and 2008. For both two-year and four-year institutions, the overall remediation rates over the four years remain consistent with a range of 53.2% to 55.9% at the two year institutions and a range of 18 % to 20.8% at the four year institutions. The overall remediation rates across all institutions over the four years remained constant at approximately 30%.

C. Remedial Data Summary for Recent High School Graduates

Demographics of Recent High School Graduates Assigned to College-Level vs. Remedial Coursework

Tables 3 & 4 (see pages 11 and 12) compare the demographic characteristics of recent high school graduates assigned to remediation by gender and by race/ethnicity.

By gender, a slightly higher proportion of females were assigned to remediation in both institutional sectors. At two-year institutions, over the last three years, 57%, 58%, 56% and 55% of females were assigned to remediation, compared to 53%, 54%, and 53% and 52% for males.

At four-year institutions, over the last four years, approximately 20%, 21%, 22% and 23% of females were assigned to remediation compared to 16%, 18%, 17% and 19% for males.

By race/ethnicity (2008), at two-year institutions the percentage of students assigned to remediation was 63% for Asian/Pacific Islanders, 79% for Black, non-Hispanics, 65% for Hispanics, 60% for Native Americans, and 47% for White, non-Hispanic students. Over the last fiscal year, the number of students assigned to remediation increased for Hispanics and Black, non-Hispanic students, and decreased for Asian/Pacific Islanders, Native Americans and White, non-Hispanic students.

By race/ethnicity (2008), at four-year institutions, the percentage of students assigned to remediation was 20% for Asian/Pacific Islanders, 44% for Black, non-Hispanic, 37% for Hispanics, 43% for Native Americans, and 17% for White, non-Hispanic students. Over the last fiscal year, the number of students assigned to remediation increased for Asian/Pacific Islanders, Hispanics, Native Americans and White, non-Hispanic students and decreased for Black, non-Hispanic students.

D. Remedial Data Summary for High Schools

Recent High School Graduates Assigned to Remediation by High School and School District

Table 8 (See pages 17-29) shows data on the number of student assigned to remediation by high school and school district. The remediation rates of high schools will have more meaning for school district superintendents and principals who have a better understanding of the high schools in their districts. Data from high schools with less than 25 recent high school graduates are not displayed but the number of students who were assigned to remediation is included in the total number of students assigned to remediation.

VI. <u>REMEDIAL COURSE COMPLETION RATES AND COSTS</u>

Beginning with FY 2005, institutions that offer remedial course work submitted files on enrollments and end of term completion rates. Based on the enrollment information, DHE staff calculates estimated costs associated with these enrollments.

A. Remedial Summary by End of Term Completion

Table 5 (Page 14) shows the enrollment in remedial courses by headcount and credit hours. Also shown is the end of term completion status of students enrolled in remedial courses.

At the two year institutions, 41,224 students enrolled in remedial courses. Of these, 25,182 students (61%) passed the remedial courses, and the remaining 16,042 (39%) students failed, withdrew, took incompletes or audited the remedial courses.

At the four year institutions, 4,356 students enrolled in remedial courses. Of these students 2,578 (59%) passed the courses, and the remaining 1,778 (41%) failed, withdrew, took incompletes or audited the courses.

At all institutions, 45,580 students enrolled in remedial course work. Of these, 27,760 (61%) passed the remedial courses, and 17,820 (39%) failed, withdrew, took incompletes or audited the courses.

B. Retention Rates of First-Recent High School Graduates

Table 6 (page 15) shows the retention rates of first time students assigned to remediation compared to retention of first time students in the general enrollment cohort at the institution. At the two year institutions, the retention rate for all first time students is 43% compared to 46% for first time students assigned to remediation. At the four year institutions the retention rate for all first time students is 72% compared to 59% for first time students is 64% compared to 52% for first time students assigned to remediation.

At the two year institutions, the retention rate for all first time students is 43% compared to 48% for first time students assigned to remediation. At the four year institutions the retention rate for all first time students is 72% compared to 55% for first time students assigned to remediation. At all institutions the retention rate for all first time students is 64% compared to 52% for first time students assigned to remediation.

C. Remedial Credit Hour Costs

Table 7 (page 16) shows the general fund cost for fall 2007 and spring 2008. Two-year and four-year institutions that are authorized to offer remedial instruction reported that 44,139 students were enrolled in remedial courses. The estimated general fund cost associated with these enrollments is \$13.5 million. Added to the cost of remedial instruction would be an additional \$10 million in tuition paid by students. Not included in the cost tables is remedial course work taken in cash funded courses, or remedial course work taken during the summer.
