## OVERVIEW

This report was prepared by The Colorado Department of Higher Education (DHE) pursuant to 23-1-113.3 C.R.S.

The information in this report is presented to inform the ongoing dialogue regarding preparation for college and the effects of remedial education or developmental education\* in Colorado. This report documents data gathered by the Colorado Department of Higher Education (DHE) for academic year 2015 (Summer 2014 – Spring 2015) as required by statute. The report concerns students taking basic skills courses at Colorado’s public higher education institutions. The report is submitted to the Education Committees of the Senate and House of Representatives, the Joint Budget Committee (JBC), the Colorado Department of Education (CDE), and each Colorado public school district superintendent.

C.R.S. 23-1-113.3 defines areas of responsibility for the Commission with regard to remedial education:

- adopt and implement a remedial policy; develop funding policies for remediation appropriate to institutional roles and missions;
- design a reporting system that provides the General Assembly with information on the number, type, and costs of remediation;
- establish comparability of placement or assessment tests; and
- ensure each student identified as needing remediation is provided with written notification regarding cost and availability of remedial courses.

For more information please contact:

Michael Vente, Research and Information Policy Officer, Colorado Department of Higher Education, at 303-996-1321 or by email at [michael.vente@dhe.state.co.us](mailto:michael.vente@dhe.state.co.us)

Beth Bean, Chief Research Officer at the Colorado Department of Higher Education, at 303-974-2661 or by email at [beth.bean@dhe.state.co.us](mailto:beth.bean@dhe.state.co.us)

\*Remedial education, remediation, not college ready and developmental education are used interchangeably throughout this report.

## HIGHLIGHTS

### Highlights from Academic Year 2014-15

- Overall, the percentage of the 2014 high school graduates placed into remediation in at least one subject was 35.4 %, a slight increase from the previous year of 34.2%.
- Of the 22,853 high school graduates who matriculated to college in Colorado, 7,472 students were not college ready and required at least one remedial course.
- About 38.6 percent of college female students were not college ready compared to 31.7 percent of college matriculated males.
- At two-year institutions, 82 percent of Black, non-Hispanic students required developmental education. At four-year institutions, 52.5 percent of Black, non-Hispanic students required developmental education.
- At two-year institutions, almost 70 percent of Hispanic students required developmental education. At four-year institutions, 39 percent of Hispanic students required developmental education.
- Of Free and Reduced Lunch participants, 53.4 percent were not college ready compared to 31.4 percent of non-FRL students who were not college ready.
- When examining remediation by subject, most students required remediation in mathematics.
- For the second year, remedial students had higher first year retention rates than non-remedial students at community colleges.
- At the four-year level, the retention rate for students not assigned to remediation was 76.7 percent, compared to 61.4 percent for those needing remediation.
- More than 62 percent of all remedial courses were completed successfully, an increase from the previous year.
- Combined, the estimated cost to the state and estimated tuition cost to the student for remedial courses amount to approximately \$39.3 million in FY2014-15. This is a \$7.8 million dollar savings from last year due to fewer students taking remedial courses and fewer courses being offered.

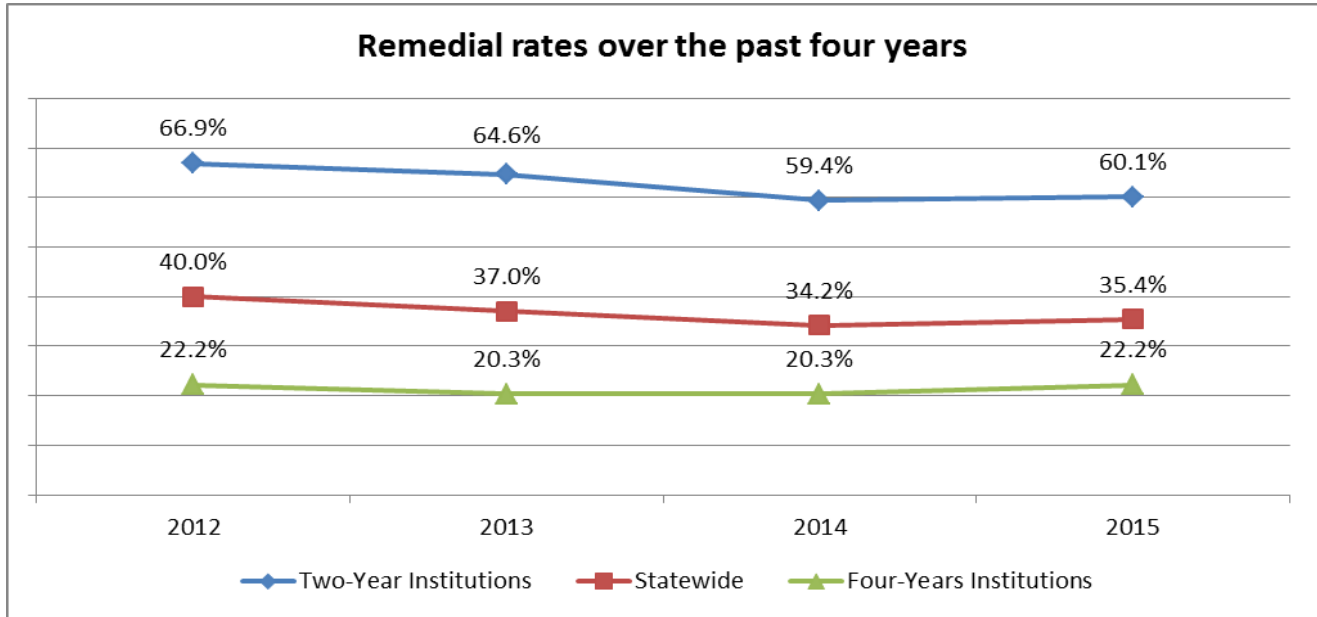

## REPORT SUMMARY

The Colorado Commission on Higher Education has set a statewide goal of closing the attainment gap in half and increasing the number of residents aged 25-34 who hold a high-quality, postsecondary credential to 66 percent.<sup>1</sup> In order to reach this goal, and for Colorado to have an educated workforce to fill the 74% of jobs that will require a college degree by 2020<sup>2</sup>, it is no longer enough to get students to college. Remedial education can no longer hinder a student from progressing along the education to workforce pipeline and ultimately to their success. To that end, a number of initiatives across the state are targeted at reducing students' need for, and lessening their time spent in, remedial classes.

Nationally, it is estimated that nearly two million or 42% of all first-year college students enrolled in at least one developmental course.<sup>3</sup> Statistics suggest that in 2012, around 70 % of all degree granting public and private postsecondary institutions in the country offered developmental courses and other forms of support to first-year students. Considering race and ethnic affiliation, first-year Hispanics/Latinos and Black/African American represented the largest portion of students enrolled in developmental education, 22.4% and 22.2%, respectively.<sup>3</sup> Tying these figures to institutional type shows that around 50% of students entering 2-year colleges and 20% enrolling in 4-year colleges take at least one developmental course.<sup>4</sup> Enrollment in developmental education does not always translate into course completion and credential attainment. Across the nation, at two-year colleges, only 62% of students who enroll in developmental education complete courses, compared to 74% at four-year institutions. Further, of those students who complete developmental courses, only 9.5% actually graduate within three years from a two-year college compared to 35.1% of students who graduate from 4-year institutions within six years.<sup>4</sup>

Colorado's remedial education rates are comparable with the nation and have historically shown statewide remediation to hover below 40 percent. In 2014-2015, the number of students requiring remediation increased by just over 1 percentage point. The 2014-2015 remedial rate is 35.4 percent compared to last year's remediation rate of 34.2 percent. In order to improve students success in remedial education, institutions of higher education have developed and/or redesigned ways they offer and structure developmental education. Colorado has adopted the co-requisite remediation model, known as Supplemental Academic Instruction (SAI), which allows students who are not college ready to enroll directly in college-level courses. These courses are then supplemented with required labs, support courses, workshops, and tutoring. Additionally, a faculty-led Math Pathways Task Force has been working on creating remedial pathways in math to increase success for students. Initial assessment of these efforts shows promise as more students are able to pass courses and continue on with a regular college curriculum.

**Figure 1. Longitudinal Trends in Remediation**

The percentage of 2014 high school graduates who enrolled in a two-year college and needed remediation was 60.1 percent, a slight increase from the previous year of 59.4 percent of students. This rate includes community colleges, local district colleges, and 2-year students at dual mission colleges (Adams State University and Colorado Mesa University). However, remediation continues to decline at the community colleges which saw a 57.9 percent remedial rate this year compared to a 58 percent remedial rate last year. The comparable rate for students who enrolled in a four-year institution was 22.2 percent, a slight increase from last year’s rate of 20 percent of students.

Despite the percentage increase in the remedial rate, the raw counts of students assessed as needing remediation decreased compared to last year (7,472 this year compared to 7,504 last year). Statewide, counts of students requiring remedial education have continued to decrease.

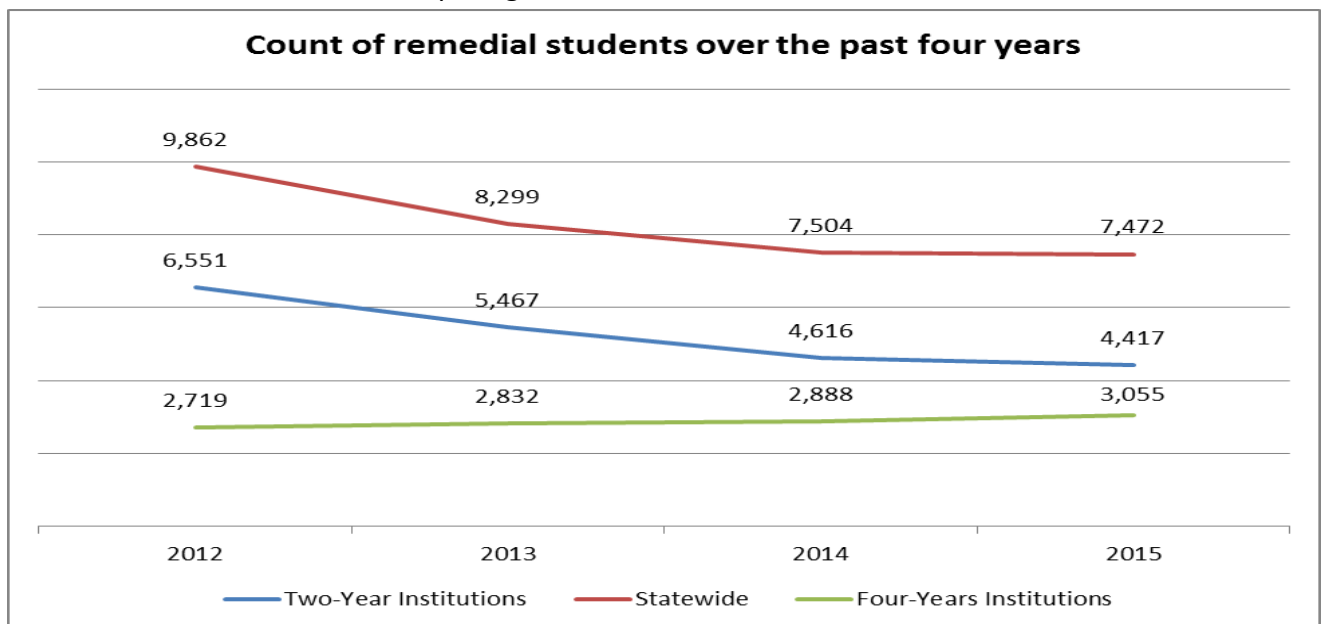

Figure 2. Progression Track of the 2014 High School Graduating Cohort

Figure 1 displays remedial rates from the past four academic years statewide and by educational sector. This year saw a slight increase in students needing remediation. This includes traditional remedial courses as well as Supplemental Academic Instruction (SAI), or co-requisite remediation.

**Assessment and Enrollment of Remedial Students**

In 2014, 53,771 high school students graduated. Of those high school graduates, 55.8% enrolled into a postsecondary institution. The majority or about 76% of the college enrollees remained in state, while about 24% of Colorado high school graduates enrolled into an out-of-state college. Of those high school graduates who matriculated to a Colorado public college, 35.4% were assessed as needing remediation. This 35.4% is comprised of 80.4 percent being assessed as not college ready, 15.2 percent enrolling in a remedial course and over 19 percent participating in Supplemental Academic Instruction (SAI).

**Remedial Rates by Public Institution of Higher Education in Colorado**

In 2014-15, the majority of community colleges experienced a decrease in the number of students needing remediation compared to the prior academic year and as a positive result of the remedial education redesign. The combined remedial rate for Colorado community colleges was 57.9, a slight decrease from last year’s 58 percent. The range of remedial rates included a low of 20% at Morgan Community College to a high of 79.7% at the Community College of Denver. The high rate at the Community College of Denver could be a reflection of the unique role the college plays as the only two-year member of the Auraria Campus.

**Table 1: Remedial Rates by Public Institution**

INSTITUTION NAME	COHORT	REMEDIAL	PERCENT REMEDIAL
Arapahoe Community College	736	383	52.0%
Colorado Northwestern Community College	76	39	51.3%
Community College of Aurora	450	261	58.0%
Community College of Denver	1054	840	79.7%

University of Colorado Boulder	2740	9	0.3%
University of Colorado Colorado Springs	1183	338	28.6%
University of Colorado Denver	1102	212	19.2%
University of Northern Colorado	1563	537	34.4%
Western State Colorado University	287	143	49.8%
<b>GRAND TOTAL FOR FOUR YEAR INSTITUTIONS</b>	<b>13734</b>	<b>3055</b>	<b>22.2%</b>
<b>COMBINATION 2 AND 4 YEAR UNIVERSITIES</b>			
Total - Adams State University	306	186	60.8%
Total - Colorado Mesa University	1302	630	48.4%
<b>Total - Dual Mission Colleges</b>	<b>1608</b>	<b>816</b>	<b>50.7%</b>
<b>Grand Total</b>	<b>21085</b>	<b>7472</b>	<b>35.4%</b>

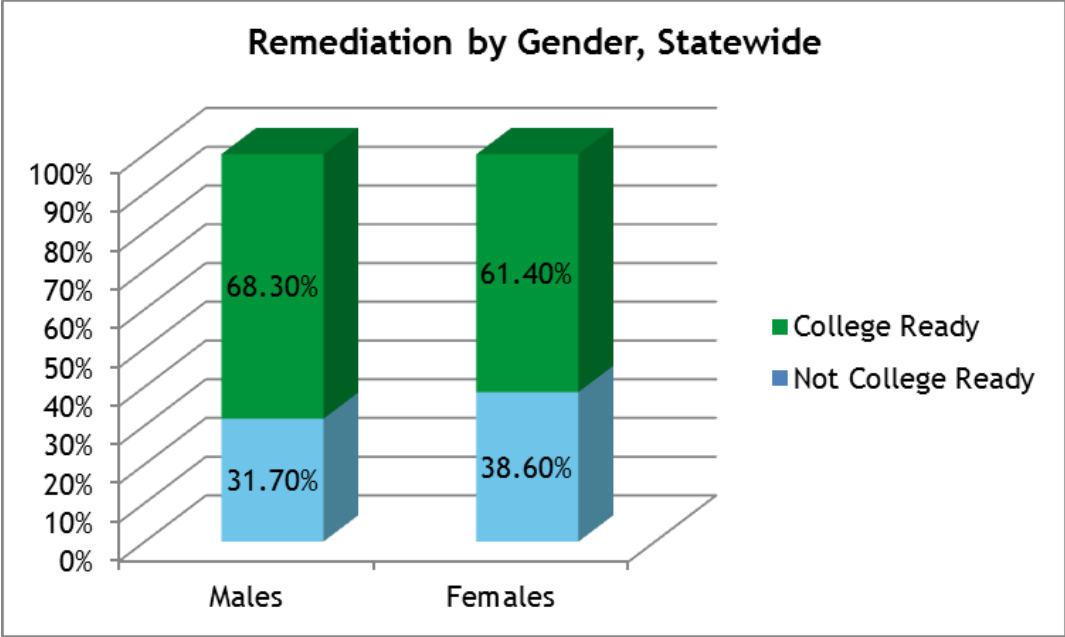

The local district colleges had a combined remedial rate of 60%, while the two year students enrolled at Colorado dual mission colleges showed a combined remedial rate of 87.1%. Among four-year institutions, Colorado State University - Pueblo, had the highest percent of four-year students needing remediation at 56.9%, an increase from last year. The University of Colorado Boulder and the Colorado School of Mines had 0.3 percent or less of the 2014 enrolled high school graduates needing developmental education. Please see Table 1. Please note college cohort size may vary year to year depending on the accuracy of matching the K12 State Assigned Student ID (SASID) to college records.

**PROFILE OF A REMEDIAL STUDENT: Demographics of the 2014 High School Graduates Assigned to Developmental Education**

Consistent with recent trends, a slightly higher proportion of females were assigned to remediation. When examining the students who were assessed as needing developmental education, 58.5% were females compared to 41.3% of males. These remedial rates are consistent with enrollment rates that have steadily shown a slight majority of female students matriculating compared to males. When examining remediation by gender, 38.6% of females needed remediation upon entrance to college and 31.7% of males needed remediation. At two-year institutions in the fall of 2014, 62 percent of females and 54.3 percent of males were assessed as needing remediation, compared to 27.6 percent of females and 21.5 percent of males who were enrolled at a four-year institution. (Please see Figure 3 and Table 4 [appendix]).

**Figure 3. Remediation in at Least One Subject by Gender (Statewide)**

When examining developmental needs by race/ethnicity, minority students are more likely to not be college ready compared to White, non-Hispanic students. Among students from minority populations, Black, non-Hispanic high school graduates had the highest remedial placement rate. Eighty-two percent of Black, non-Hispanic students at two-year institutions and 52.5 percent of such students at four-year institutions were not ready for college level courses. This represents a 32 point gap in college readiness between White students and Black students, the largest gap at the two-year college level.

Thirty-nine percent of Hispanic students at four-year institutions required developmental education. Nearly 70 percent of Hispanic students enrolled at two-year institutions required developmental education. Increased attention on specific populations will help close the attainment gap, as being college ready is an important momentum point towards credential completion. As our diverse populations experience dramatic growth in Colorado, an analysis of best practices and success measures should be examined and potential expansion across the state explored.

(See Figures 4a and 4b and Table 3 [appendix]).

**Figure 4a. College Readiness by Race/Ethnicity (Two-Year Institutions)**

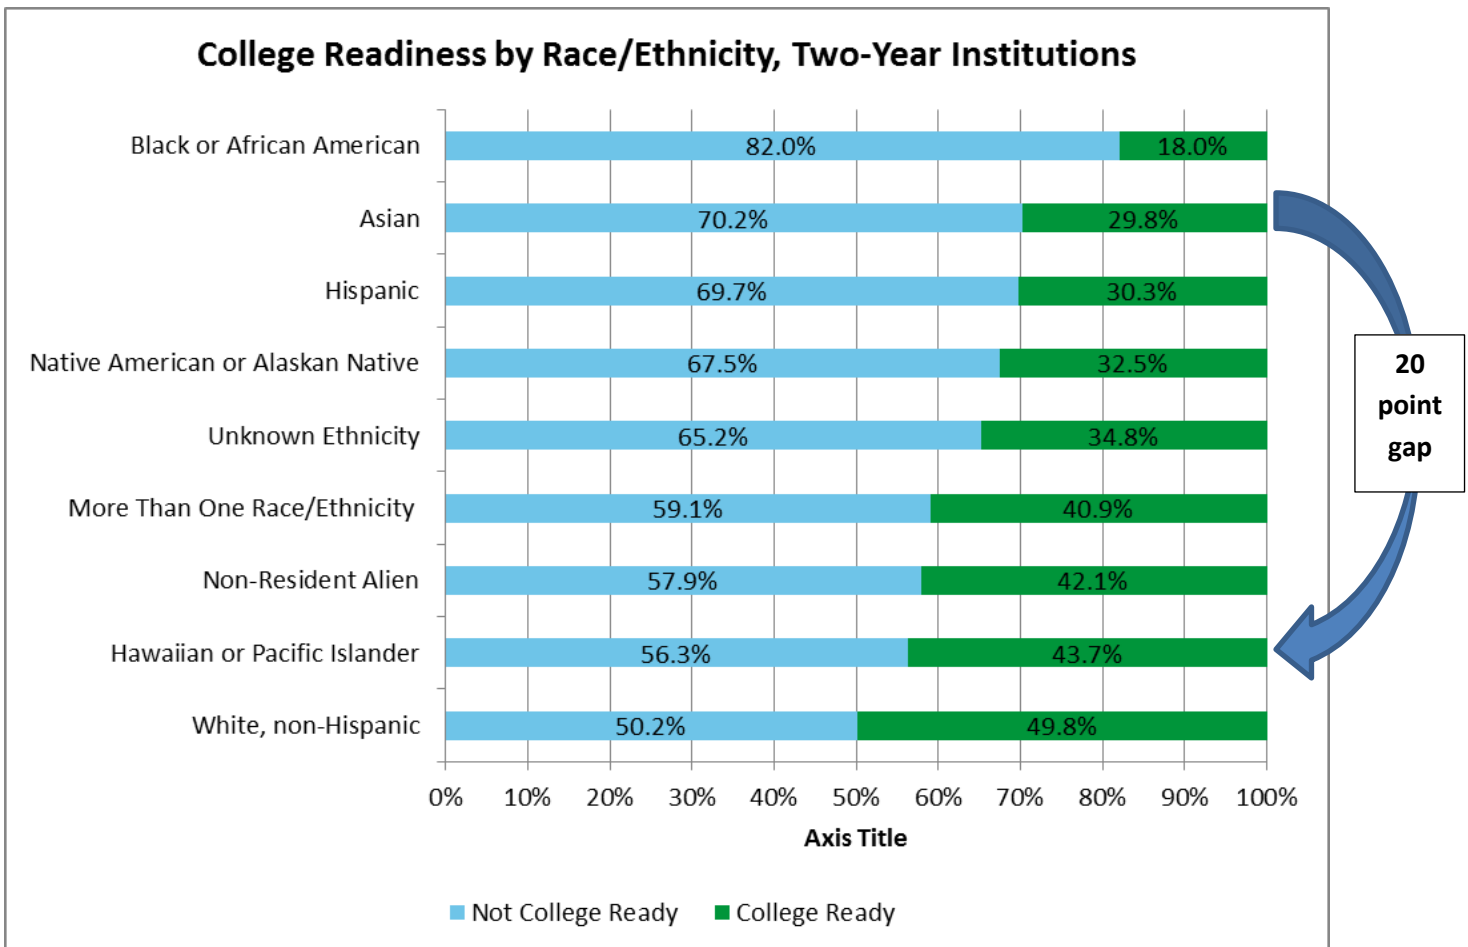

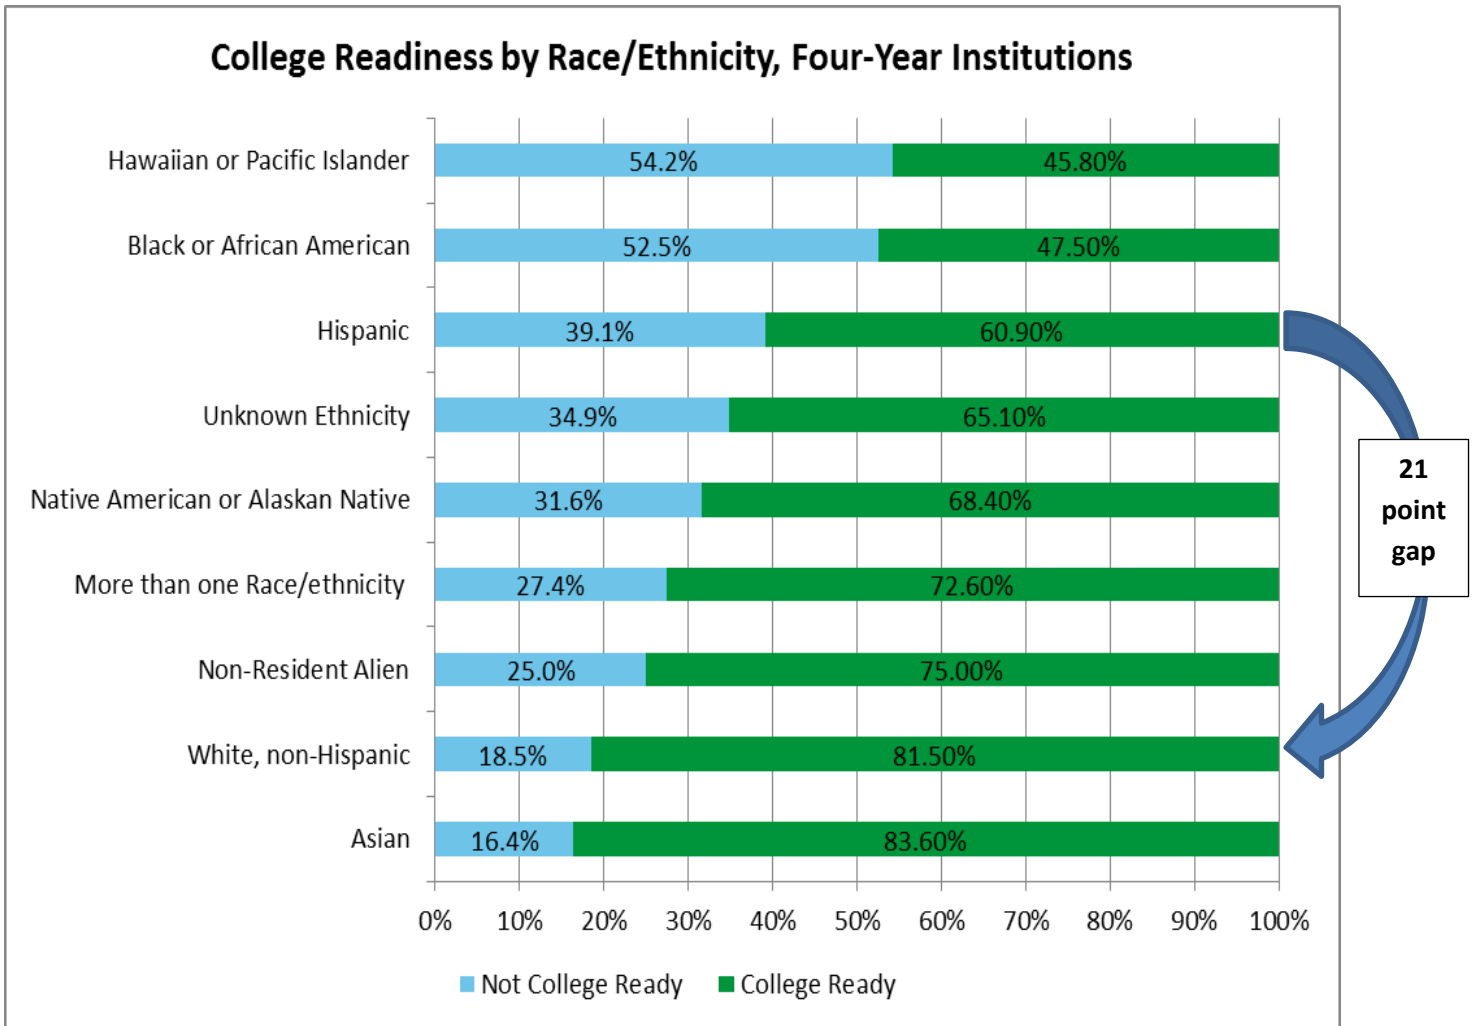

Figure 4b. College Readiness by Race/Ethnicity (Four-Year Institutions)

When examining developmental needs by free and reduced lunch (FRL) participation, students who had greater financial needs and participated in FRL were less likely to be college ready than their peers who were not participants in the FRL program. Specifically, 53.4% of FRL students needed remediation compared to 31.4% of non-FRL students who needed remediation. Please see Figure 5.

English Language Learner (ELL) participants were also more likely to need remediation than non-ELL high school graduates. Approximately, 77.73% of ELL students need remediation compared 33.83% of non-ELL students. Please see Figure 6.

Special Education participation in high school is also associated with a greater need for remediation. For those students who participated in special education in high school, 73.45% needed remediation compared to 33.98% of traditional education students. Please see Figure 7.

Figure 5. College Readiness by Free and Reduced Lunch Participation in High School

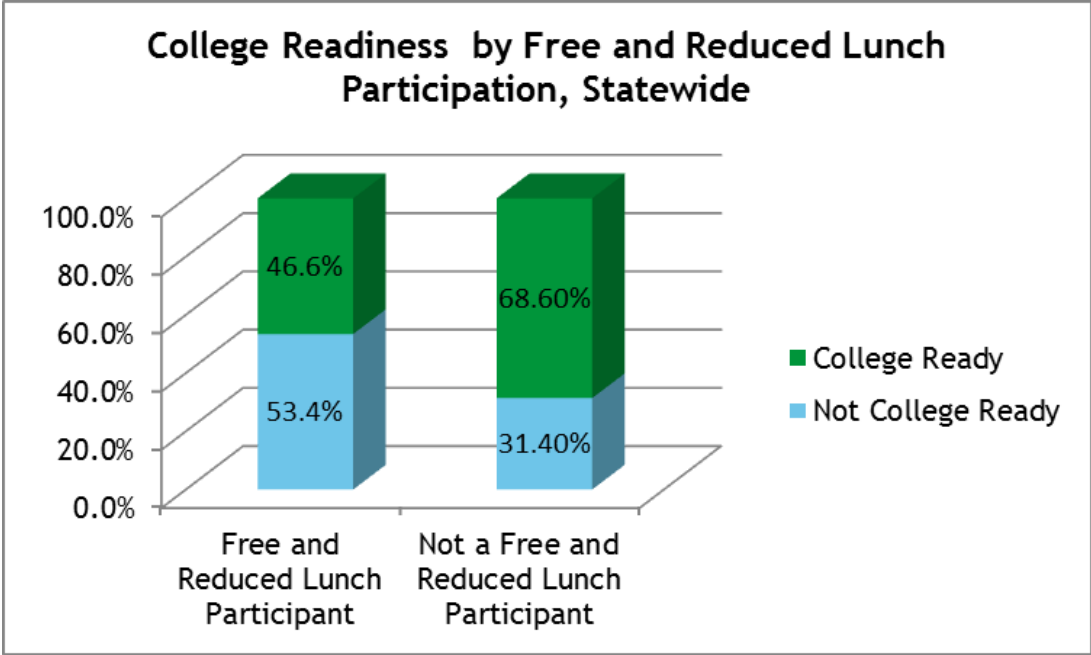

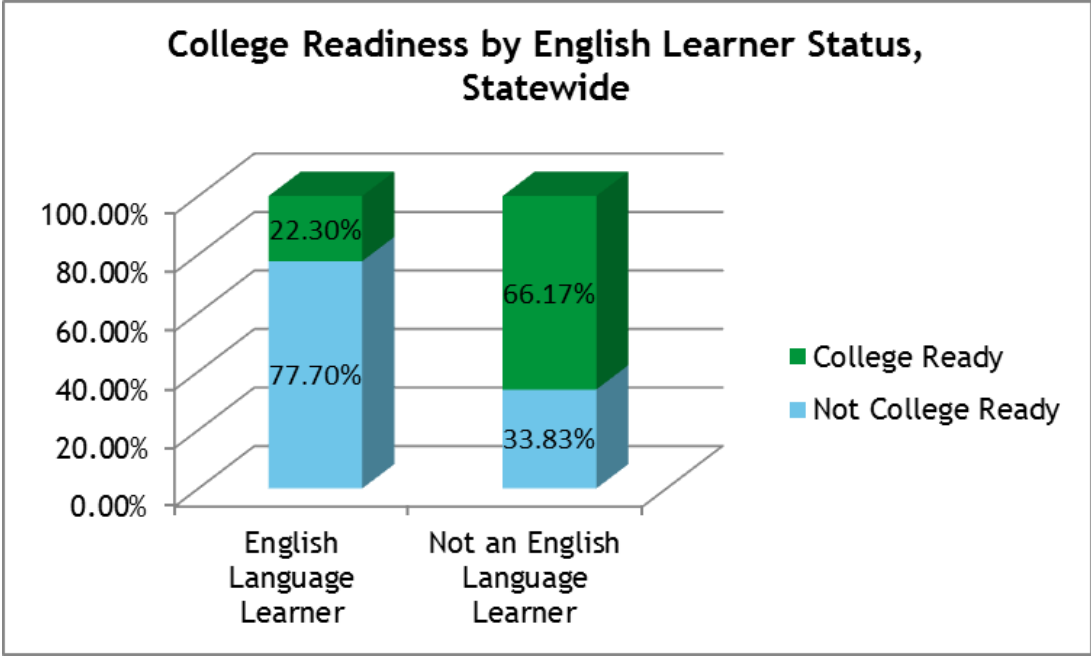

Figure 6. College Readiness by English Language Learner Status in High School

**Figure 7. College Readiness by Special Education Participation in High School**

### **Remedial Rates by Subject**

The largest number of students in need of remediation required additional help in math (51.5%), a finding consistent with previous state reports and national trends. This rate is followed in magnitude by writing (30%) and reading (18.4%). Figure 8 below illustrates the percentage of 2014 high school graduates assigned to remediation by subject.

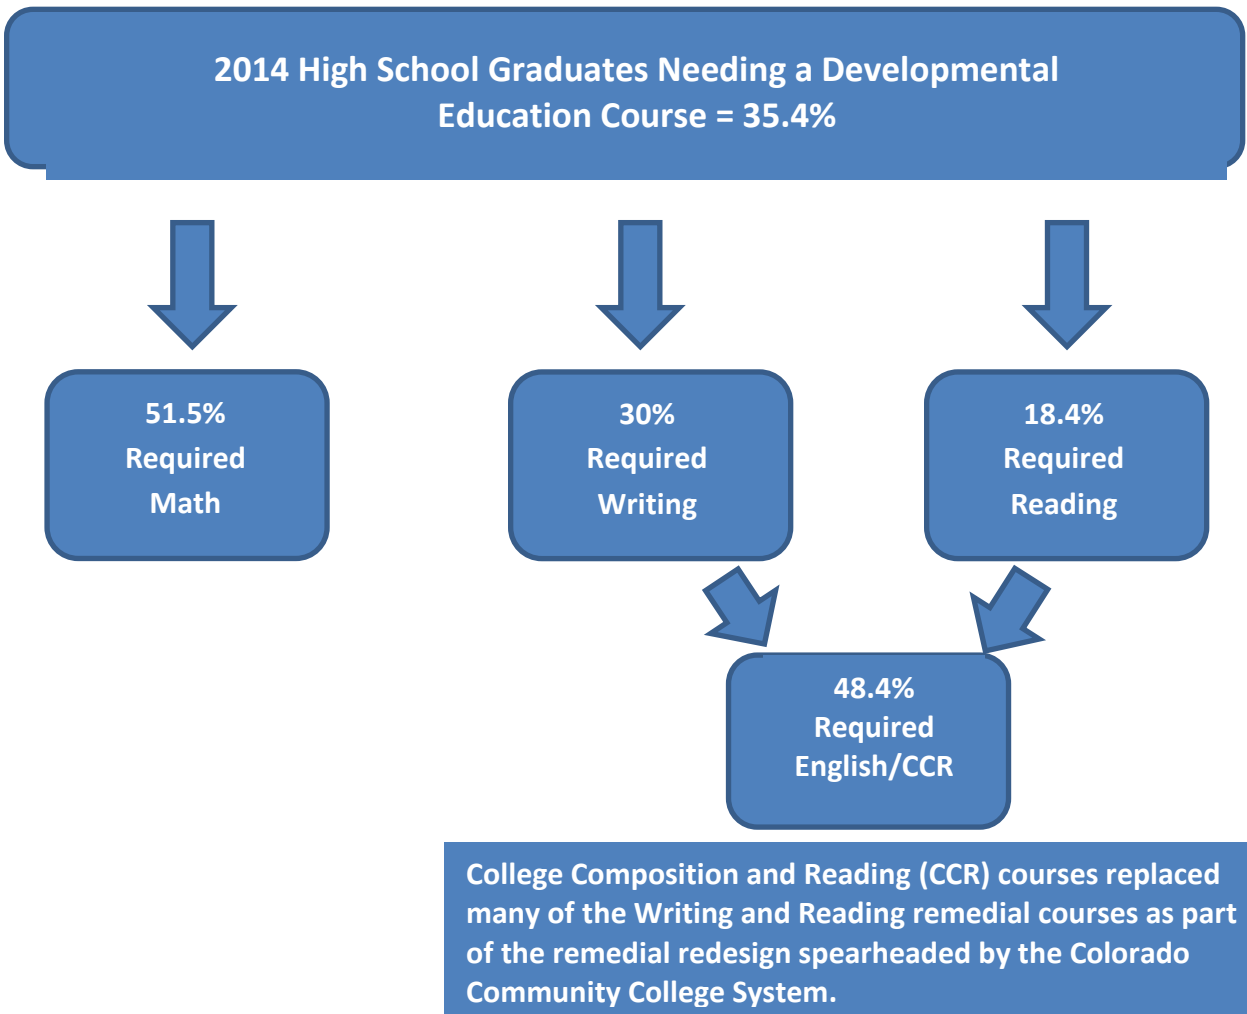

As Figure 8 shows, most remedial students required a course in math. Research has shown there is a negative relationship between the number of remedial classes needed and a student’s chance of academic success<sup>6</sup>. The Colorado Community College System has estimated that less than five percent of students assigned to a remedial course will eventually go on to earn a degree.

Since 2013, the Colorado Community College System (CCCS) has successfully implemented their developmental education redesign. The redesign involved a data-informed, evidence-based approach that reduced the costs, credits-required, and time-to-complete associated with Colorado’s developmental education programs. The goal was to provide students with a curriculum that would be driven by what students needed to learn to be successful in gateway college courses<sup>7</sup>.

Based upon initial research conducted by the CCCS, the redesign outcomes look promising. Early evidence suggests that students in redesigned remedial courses are performing equally and sometimes better than students in non-redesigned remedial courses. Additionally, the students are completing the necessary remedial courses in a shortened time period. Link to the CCCS report:

[https://www.cccs.edu/Docs/SBCCOE/Agenda/2014/11Nov/2\\_WS\\_IE\\_Update\\_DevEdRedesign.pdf](https://www.cccs.edu/Docs/SBCCOE/Agenda/2014/11Nov/2_WS_IE_Update_DevEdRedesign.pdf)

**Figure 8. Developmental Education by Subject**

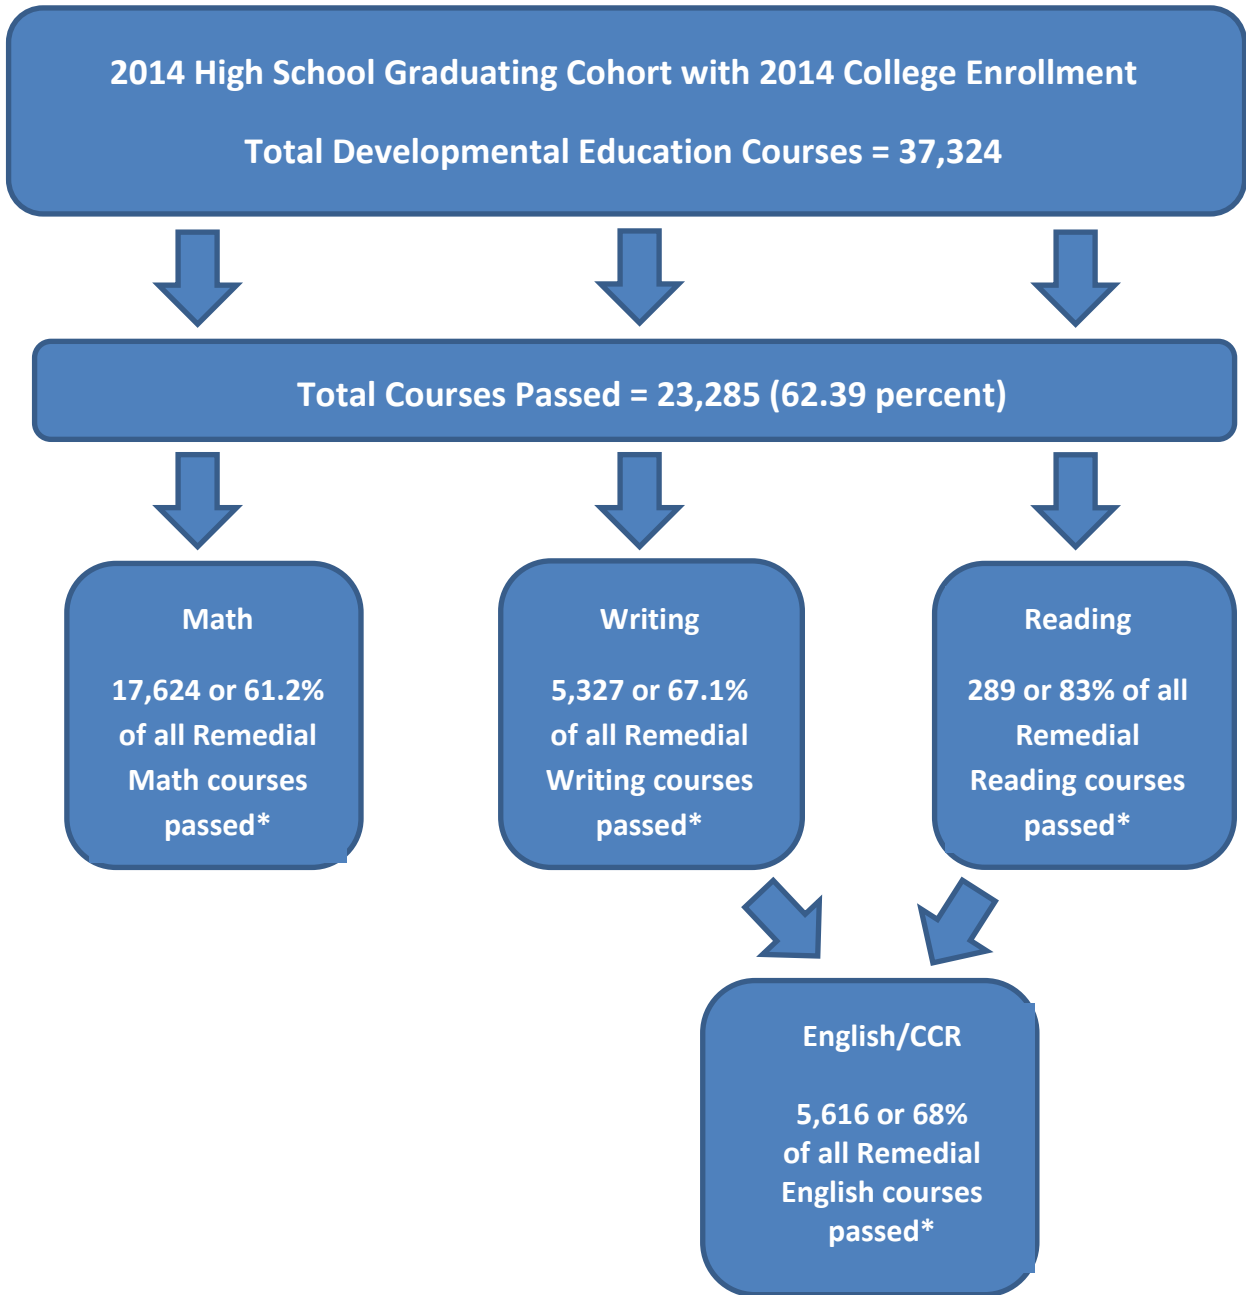

## REMEDIAL COURSE COMPLETION AND COSTS

### Remedial Summary by End of Term Completion

Figure 9 and Tables 6 and 7 in the appendix show developmental courses attempted and total credit hours passed, failed, withdrew or incomplete. At all institutions, students enrolled in 37,324 remedial courses. Of those, students passed 23,285 (62.39 percent), and failed, withdrew, took as incomplete or audited 14,039 (37.6 percent). While the number of courses dropped significantly from last year the rate for passage and failure remained similar. Figure 9 displays remedial pass rates by subject. Please note these percentages are only based upon passed and failed and therefore don't include withdrawn courses. The pass rates for Math (76.5 percent) and Reading (83 percent) are higher than the pass rates for Writing (67.1 percent). The overwhelming majority (approximately 77 percent) of remedial courses are in Math, far outpacing Reading and Writing.

**Figure 9: 2014 College Going Cohort Pass Rate for Developmental Education Courses**

College Composition and Reading courses replaced many of the Writing and Reading remedial courses as part of the remedial redesign spearheaded by the Colorado Community College System.

\*Excludes students who withdrew by end of term

For the past two years, Supplemental Academic Instruction (SAI) has been available to students instead of traditional remedial courses. These SAI courses offer co-requisite instruction in writing or mathematics for students with limited academic deficiencies who are placed into college-level course work that is approved for statewide transfer (i.e., gtPathways). Analysis of the data available for the past two years (2014-2016) provides important insights into students who use SAI.

Of the students who took SAI courses during the past two years, roughly half were low-income (53.8% were Pell Eligible and 47.7% received a Pell Grant). Approximately one-third (32.6%) were Hispanic and just under half (43.5%) were White. A small percentage was African American or Black (6.9%), Asian (3.9%), Native American or Alaskan Native (0.5%), and Hawaiian or Pacific Islander (0.2%). The sample also included Non-Resident Alien (1.9%), "unknown ethnicity" (5.7%), and non-Hispanic/more than one race/ethnicity (4.8%). Additionally, 23.3% of SAI students took a SAI class in math while 76.7% of SAI students took a SAI class in writing.

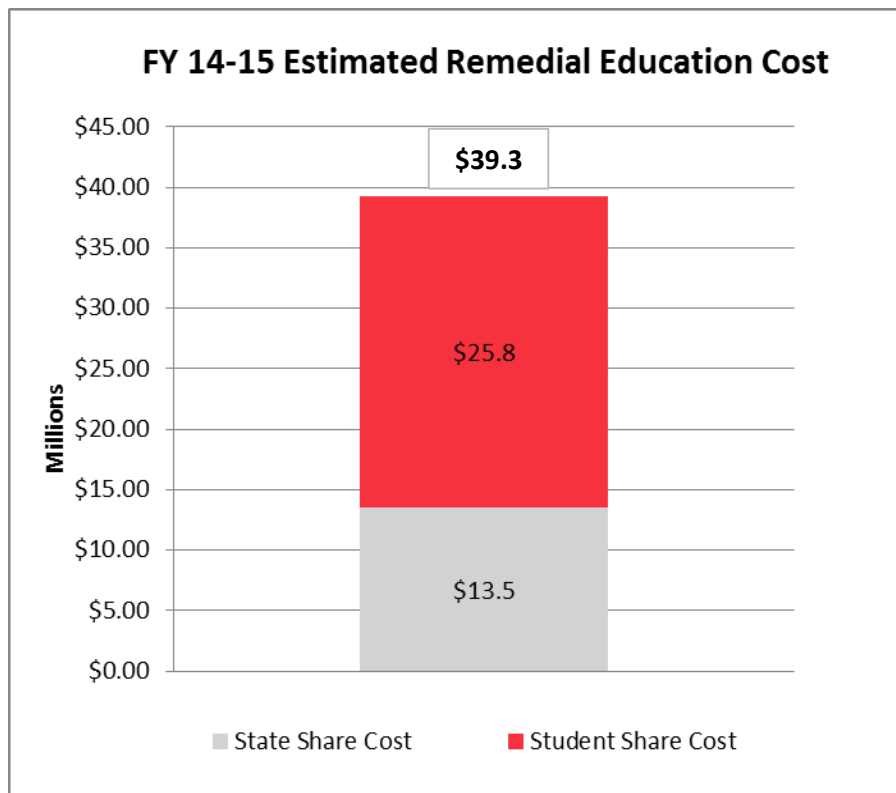

The Department continues to research the characteristics and successes of students using SAI. An analysis which compares student success in SAI to student success in traditional developmental education courses will be released in fall 2016.

### **Remedial Credit Hour Costs**

The estimated cost for remediation is calculated by utilizing actual year data provided on total educational and general expenditures and revenue at the public institutions of higher education. Total revenues for educational and general expenditures are comprised of a combination of sources but are primarily comprised of tuition and state funding (General Fund or College Opportunity Fund dollars). This amount is divided by the total number of credit hours provided by the colleges to students over the same fiscal year to general an average cost per credit hour. This average cost per credit hour is then applied to the number of remedial credit hours which generates an estimated average cost for total remedial education, which is further divided into student share and state share. Table 8 and Figure 10 show the estimated state cost for Fall 2014 and Spring 2015. Two-year and four-year institutions that are authorized to offer remedial instruction reported that 37,324 remedial courses were taken in Fall 2014 and Spring 2015, a decrease from last year's figure of 51,874. The estimated *total* cost for remedial instruction associated with these enrollments is \$39.3 million. This total is comprised of an estimated state cost of \$13.5 million and an estimated student cost of \$25.8 million. These cost tables do not include cash funded courses or remedial coursework taken during the summer. The FY 2014-2015 remedial education cost is a decrease over last year's estimated cost of \$47.1 million and shows a savings of \$7.8 million due to fewer remedial courses being offered and fewer remedial credit hours taken by students. This is driven by the implementation of Supplemental Academic Instruction (SAI), a method of co-requisite remediation. Consistent with last year's estimated figures is the high portion of responsibility on the student to cover the cost.

**Figure 10. FY 2014-15 Estimated Remedial Education Cost**

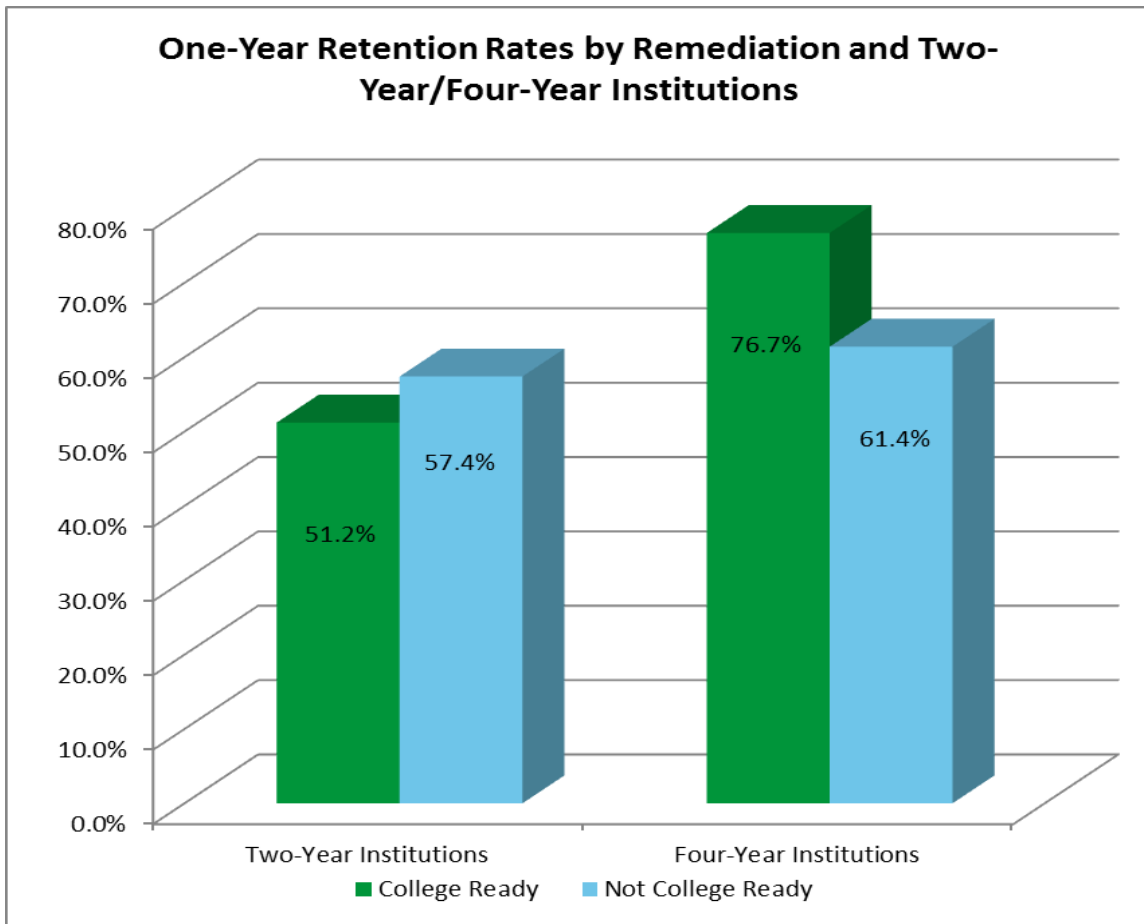

**FIRST YEAR RETENTION: Retention Rates of Remedial and Non-Remedial Students**

This section examines the retention rates of remedial and non-remedial students by institution. First year retention is an important momentum point on the way to earning a college credential. Measuring success is focused on the number of students who move through the remedial sequence into credit-bearing courses, into their second year of college and on to graduation.

Table 5 (in appendix) and Figure 11 compare overall retention rates of students assigned to remediation and those not assigned to remediation by type of institution. Looking at all Colorado students, those who required developmental education were less likely to be retrained into their second year of college. However, this trend did not apply to students at two-year institutions in Colorado. At our public community colleges, 57.4% of students who needed remediation enrolled in their second year of college compared to 51.2% of two-year students who arrived on campus without developmental education needs. At four-year institutions, the difference between one-year retention rates and remediation was more pronounced. The retention rate for four-year students not assigned to remedial coursework was 76.7% compared to 61.4% for those assigned to remediation, an approximately 15 percentage point difference in retention.

**Figure11. Remediation and One-Year Retention (Community Colleges and Four-Year Institutions)**

### REMEDICATION BY SCHOOL DISTRICT AND HIGH SCHOOL

Table 9 shows data on the number of students assigned to remediation by school district and high school. For confidentiality purposes, data from high schools with 16 or less graduates enrolled are not displayed, though these students are included in the overall remedial rate. Table 10 disaggregates the most current year of data by developmental education subject, district and high school.

Remedial rates by high school with 17 or more graduates range from a low of 0 percent at D’Evelyn High School in Jefferson County to a high of 88 percent at Jefferson High School in Greeley. A number of high schools have consistently had low remedial rates for their high school graduates. These schools include D’Evelyn High School and Evergreen High School in Jefferson County, Colorado Springs Early College, and Fairview High School in Boulder. Approximately 42 percent of high schools have a 2014 remedial rate of 25% or lower, while 40 percent of secondary schools have a remedial rate between 26 and 50 percent. Approximately 7.6 percent of high schools have a remedial rate greater than 75 percent of their graduates not being college ready.

## REFORMING THE SYSTEM OF REMEDIATION

The Colorado educational system is fully invested in graduating high school students who are college ready and do not require remediation. This shared goal is necessary for Colorado to meet our credential completion and closing the attainment gap goals, build equity and prepare our future workforce. This following section highlights the current remediation reform work occurring across the state and discusses future alignment and next steps.

- The Colorado Commission on Higher Education, as part of the 2012 Statewide Master Plan, includes “improving student success through better outcomes in basic skills education” as one of its top four goals. This vital goal will be measured at the institutional level by “eliminating the disparities in the completion rates of college-level English and mathematics courses between students originally assigned to remediation and those not assigned to remediation”.<sup>1</sup> This is a major shift in accountability as institutions are committing to being responsible for getting students through the remedial sequence and completing their first college credit bearing courses within their first 30 credit semester hours. The first round of reporting related to this goal will occur in December 2016 as part of the performance funding initiative of Senate Bill 52 and will further be expanded with the recent passing of House Bill 1319.
- Colorado’s admission policy was revised to permit students to meet admission requirements by demonstrated proficiency versus seat time. The Commission’s Remedial Education policy is currently being revised to ensure students are 1) not inappropriately assessed and inaccurately placed into developmental education courses and 2) to align with State Board of Education’s Graduation Guidelines, thus providing transparent college-ready expectations to K12 students, counselors and parents. This will change the way students are assessed and placed into a remedial course and should decrease the number of students inaccurately identified as needing developmental education.
- In March 2013, the Colorado Commission on Higher Education approved a Supplemental Academic Instruction (SAI) policy. By way of this policy, institutions can place students with limited academic deficiencies directly into college-level, credit-bearing courses with corequisite academic support. This policy permits these students to enroll directly into college-level courses at their home institution rather than placing them into remedial coursework at a local community college. Institutions authorized to offer SAI include Aims Community College, Colorado Community College System, Metropolitan State University of Denver, University of Northern Colorado and Western State Colorado University. These institutions’ SAI data are currently being analyzed and will be available summer of 2016.
- Last, the Colorado Department of Higher Education is convening a faculty-led Math Pathways Task Force. The task force’s overall goal is to:
  - Develop expectations and processes that result in each institution of higher education in Colorado offering pathways in mathematics that yield (1) increased success for students in the study of mathematics; (2) a higher proportion of students completing in a timely manner the appropriate gateway

math course(s) for their intended degree program; and (3) effective transferability of credits for students moving from one institution to another.

The task force's final report and recommendations can be retrieved at:

<http://highered.colorado.gov/Academics/MathPathways/Default.html>. The task force's recommendations are currently being implemented and will augment the other remediation reforms listed above.

The alignment and revision work occurring in Colorado holds promising outcomes for students, our education and workforce systems, and our state. Colorado public secondary and postsecondary institutions are dedicated to improving and eventually eliminating remedial education. Despite a small increase in the percent of students requiring remediation, there have been pockets of positive and incremental movement in the right direction towards all college students being ready and successful, with the ultimate goal of earning a credential.

Cohort:  
 Source: SURDS Remedial Course file (Fall 14 & Spring 15), All courses taken during during the time period;  
 \* Please note that the percents shown are represented differently than in previous reports. This table shows a percent per subject. Previous reports show percents based on the total population.  
 \*\* Failed includes Remedial Course End Of Term Completion codes 2 (Failed) and 5 (Withdrawn); In previous years, withdrawn was included in the Other category  
 \*\*\* Other includes Remedial Course End Of Term Completion codes 3,4,6 (Audit, Incomplete, In Progress)  
 Only includes math, english, and reading remediation (determined by course prefix); FLC uses course number (Math-82, 83, 92, 93, Eng-90, 91)  
 Data pulled 4/30/2016

## **Appendix B: Technical Information**

## REMEDIAL METHODOLOGY AND DATA LIMITATIONS

### Methodology

The high school graduating cohorts for this remedial report were provided by the Colorado Department of Education. Utilizing the State Assigned Student ID (SASID), DHE is able to link postsecondary enrollment and remedial records to the K12 records. High school graduates were linked to enrollment records from Fall 2014 and Spring 2015. Once a college enrollment record was found for a high school graduate their applicant file was reviewed for a remedial assessment record no older than 6 months from their high school graduation. Additionally, the enrollment file was reviewed for enrollment in a remedial course in the Fall 2014 or Spring 2015 term. College remedial students can be duplicated in the college remedial rates as students can enroll at multiple institutions. Remedial students are not duplicated in the high school remedial rate calculations.

Expanding upon last year's report, which applied a new remedial report methodology beginning with the complete high school graduation cohort and looked at whether the student was assessed for remediation and/or enrolled in a basic skills course, this report adds one additional function upon the recommendation of the local K-12 districts and with the support of the Colorado Department of Education. In this report, remedial rates for high schools have been calculated based upon two high school cohorts. The first cohort is the completer cohort, which matches last year's report, and is based upon the academic year. In this cohort, early and late graduates are folded into the same class based upon the year. The second cohort presented in Table X is the on-time graduation cohort in which a student is assigned a graduating class that does not change over time. This change in reporting aligns with the on-time graduation rate currently reported by our local districts and complies with the Every Student Succeeds Act (ESSA), previously known as the No Child Left Behind Act.

Data in this year's report includes College Composition and Reading (CCR) courses as part of the list of remedial courses. College Composition and Reading courses replaced many of the Writing and Reading remedial courses as part of the remedial redesign spearheaded by the Colorado Community College System. However, these courses are not considered Supplemental Academic Instruction (SAI). The CCR courses capture many students who would have been in either English or Reading remedial courses. The inclusion of CCR courses is a new addition for this year's report and was not included in previous reports.

### Data Limitations

In reviewing the tables in this report, one must be mindful that the data do not include recent graduates who enrolled in Colorado institutions for which we do not collect data, an out-of-state college, and or students who are missing a SASID. Additionally, numerous variables exist that DHE is unable to collect that may account for some of the variance surrounding those students who need remediation and those adequately prepared for postsecondary education. Despite these limitations, DHE believes that this summary is a *reasonable representation* of the current remedial landscape of Colorado.
