Overview

This report provides data on the effects of developmental education* on students at Colorado's public higher education institutions and aims to inform the ongoing dialogue regarding preparation for college. Specifically, it documents the data gathered by the Colorado Department of Higher Education (DHE) on students from the Colorado High School Class of 2016 who participated in development education during the 2016-2017 Academic Year (Summer and Fall 2016 and Spring 2017).

The report is submitted to the Education Committees of the Senate and House of Representatives, the Joint Budget Committee (JBC), the Colorado Department of Education (CDE), and each Colorado public school district superintendent.

As defined in C.R.S. 23-1-113.3, the Colorado Commission on Higher Education is responsible with regard to developmental education in the following areas:

- adopt and implement a remedial policy;
- develop funding policies for remediation appropriate to institutional roles and missions;
- design a reporting system that provides the General Assembly with information on the number, type and costs of remediation;
- establish comparability of placement or assessment tests; and
- ensure each student identified as needing remediation is provided with written notification regarding cost and availability of remedial courses.

*Developmental education is used throughout this report and includes assessment of a need for remediation, participation in traditional remedial education courses, and participation in co-requisite remediation (Supplemental Academic Instruction).

Highlights

1. Overall, the percentage of the 2016 Colorado high school graduates placed into developmental education in at least one subject was 35.3 percent, a slight decrease compared to the previous year of 36.1 percent.
2. The percentage of female college students placed into developmental education was 37.2 percent. The percentage of male college students placed into developmental education was 33.3 percent.
3. At two-year institutions, 76.4 percent of African American students were placed into developmental education (a slight decrease compared to last year). At four-year institutions, 52.1 percent of African American students were placed into developmental education (a slight increase compared to last year).
4. At two-year institutions, 65.1 percent of Hispanic students were placed into developmental education (a more than 6 percent decrease compared to last year). At four-year institutions, 39.2 percent of Hispanic students were placed into developmental education (a slight increase compared to last year).
5. Of Free and Reduced Lunch (FRL) participants, 52.9 percent were placed into developmental education, which represents a slight decrease compared to last year (53.6 percent). Of non-FRL students, 29.3 percent were placed into developmental education (30.6 percent last year).
6. When examining developmental education by subject, students almost equally required support in Math and English.
7. For the fourth year, students placed into developmental education had higher first year retention rates than non-developmental education students at community colleges.
8. At the four-year level, the retention rate for students not placed into developmental education was 78.9 percent, compared to 63.5 percent for those placed into developmental education.
9. Of all developmental courses taken, 62.9 percent were completed successfully.
10. The estimated cost to the state and estimated tuition cost to all college students enrolled in developmental education courses is approximately \$33.2 million in FY 2016-17. This is a slight increase compared to last year due to an increase in developmental education courses.

Report Summary

The Colorado Commission on Higher Education has set a statewide goal of erasing the equity gap and increasing the number of Coloradans who hold a postsecondary credential to 66 percent.¹ There is an economic imperative to reach this goal since by 2020 a projected 74 percent of jobs will require some type of education beyond high school.² More Colorado students must complete some type of post high school credential.

Additionally, developmental education can no longer be allowed to stand as a barrier to student progression along the education-to-workforce pipeline. Research by Complete College America shows that 16 percent of students in remedial Math and 17 percent of students in remedial English at Colorado community colleges complete the associated introductory (gateway) course in two years.³ As outlined in this report, students placed into developmental education have lower retention rates compared to non-developmental education students. Research conducted by the Colorado Community College System shows that only 8 percent of students who took a traditional remedial Math course completed their degree within six years.⁴ Collectively, these data point to a need for stronger academic preparation to ensure Colorado's students enter a postsecondary institution college-ready.

This report summarizes the current developmental education landscape for the Colorado High School Class of 2016, including their enrollment rates and outcomes in developmental education courses and the student and state costs of providing developmental education courses. The report also summarizes reforms to Colorado's traditional developmental education system as well as a number of initiatives across the state targeted at reducing students' need for developmental education courses and decreasing the amount of time they spend taking these classes.

Statewide Rates for the High School Class of 2016

Colorado's developmental education rates are comparable with the nation, historically hovering below 40 percent. For the Colorado High School Class of 2016, the developmental education rate is 35.3 percent compared to last year's rate of 36.1 percent, a decrease of less than 1 percentage point (0.8 percent).

Of students who enrolled in a two-year college, 56.3 percent were placed into developmental education, a decrease from the previous year of 62.9 percent. This rate includes community colleges, local district colleges and two-year students at dual-mission colleges (Adams State University and Colorado Mesa University). The comparable rate for students who enrolled in a four-year institution was 23.1 percent, a slight increase from last year's rate of 21.5 percent.

Figure 1: Longitudinal Trends in Developmental Education

Developmental education rates over the past four years

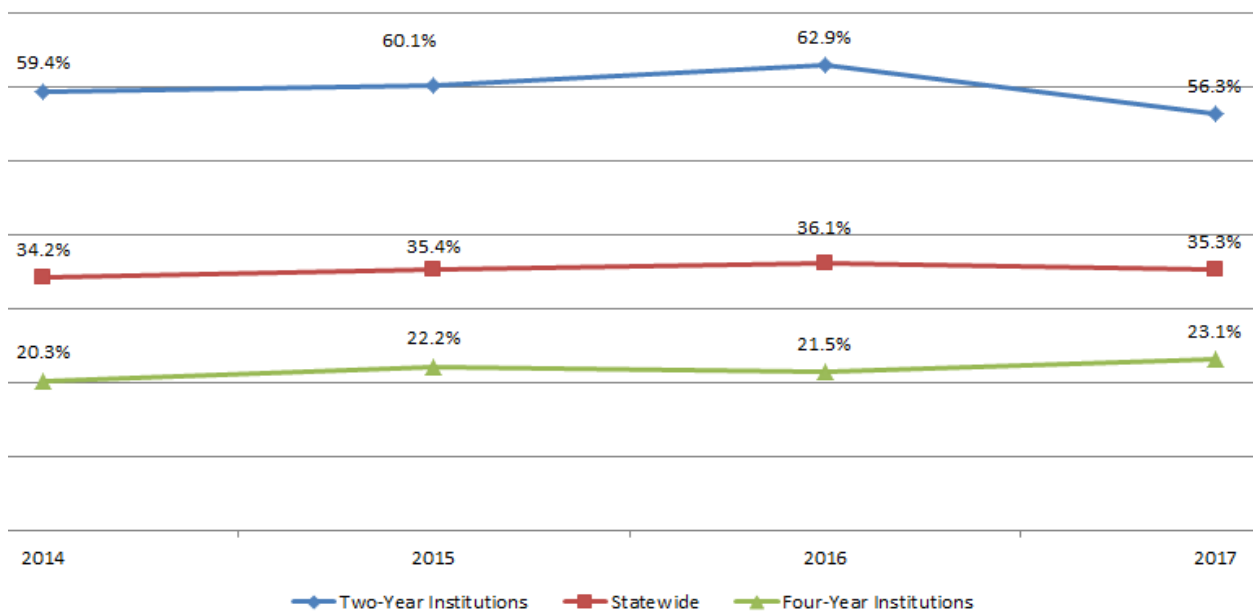

Figure 1 displays developmental education rates from the past four academic years statewide and by educational sector. This year saw a slight decrease in students being placed into developmental education. This includes traditional remedial courses as well as Supplemental Academic Instruction (SAI), or co-requisite remediation. While the percentage of students needing developmental education decreased, the raw counts of students assessed as needing developmental education increased compared to last year (8,271 this year compared to 7,838 last year) due to increases in the number of high school graduates and students pursuing postsecondary education after high school.

Figure 2: Progression Track of the 2016 High School Graduating Cohort

Assessment and Enrollment of Developmental Education Students

In 2016, 56,238 students graduated from a Colorado high school. Of those high school graduates, 55.8 percent enrolled into a postsecondary institution.⁵ The majority, or about 77 percent of the college enrollees, remained in state, while about 23 percent of Colorado high school graduates enrolled in an out-of-state college. Of those high school graduates who matriculated to a Colorado public college, 35.3 percent (8,271 students) were placed into developmental education of any type (English, Math, or both). Of those needing developmental education, 50 percent were assessed as needing developmental education, 34.4 percent enrolled in a developmental education course and 15.7 percent participated in co-requisite remediation, also called Supplemental Academic Instruction (SAI).

Developmental Education Rates by Public Institution of Higher Education in Colorado

The majority of community colleges experienced a decrease in the number of students placed into developmental education compared to the prior academic year. The developmental education rate for Colorado community colleges was 56.3 percent, a decrease from last year's 61.3 percent. The range of rates included a low of 34.7 percent at Morgan Community College to a high of 72 percent at the Community College of Denver (CCD). The high rate at CCD could be a reflection of the unique role the college plays as the only two-year institution on the Auraria Campus as well as their use of co-requisite support for college level course.

The local district colleges had a combined developmental education rate for 2016 Colorado high school graduates of 59.7 percent, while the two-year students enrolled at Colorado dual-mission colleges showed a combined rate of 84.6 percent. Among four-year institutions, Adams State University had the highest percent of four-year students placed into developmental education at 59.2 percent, an increase from last year. The University of Colorado Boulder and the Colorado School of Mines had no enrolled Colorado high school graduates needing developmental education (See Table 1).

Profile of the Developmental Education Student

Demographics of the 2016 High School Graduates Assigned to Developmental Education

Consistent with recent trends, a higher proportion of females were placed into developmental education. When examining the total population of students who were assessed as needing developmental education, 56.3 percent were females compared to 43.6 percent male (see Figure 3). These rates are consistent with enrollment rates that have steadily shown a slight majority of female students matriculating compared to males.

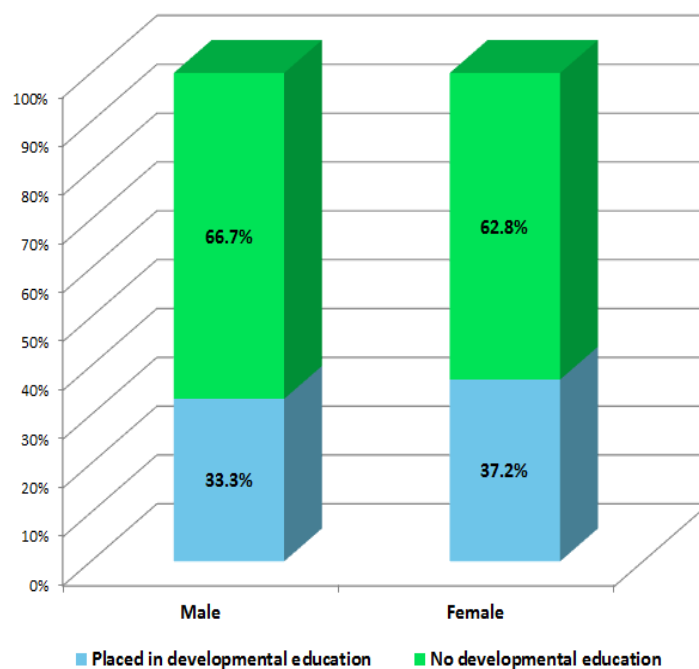

When examining developmental education by gender, 37.2 percent of females who graduated high school in 2016 and went to college were placed into developmental education upon entrance to college compared to 33.3 percent of males (see Figure 3). For students who attended two-year institutions, 56 percent of females and 54.5 percent of males were placed into developmental education, compared to 27.9 percent of females and 22.8 percent of males who were enrolled at a four-year institution (see Table 4 [appendix]).

Figure 3: Gender Breakdown of Developmental Education Population for the Colorado High School Class of 2016 (Statewide)

Gender percentage of total

Developmental education participation by gender

As Colorado’s population becomes increasingly diverse we must not only focus on how we help to ensure that more students are college-ready but also consider the impact of our developmental education strategies on equity gaps.

When examining developmental needs by race/ethnicity, minority students are more likely to be placed into developmental education compared to White, non-Hispanic students. See Figures 4a and 4b and Table 3 [appendix]. Among students from minority populations, African American high school graduates had the highest developmental education placement rate. At two-year institutions, 76.4 percent of African American students were placed into developmental education (a slight decrease compared to last year). At four-year institutions, 52.1 percent of African American students were placed into developmental education (a slight increase compared to last year).

At two-year institutions, 65.1 percent of Hispanic students were placed into developmental education (an over 6 percent decrease compared to last year). At four-year institutions, 39.2 percent of Hispanic students were placed into developmental education (a slight increase compared to last year).

Significant action to support the needs of specific student populations is needed to erase the equity gap, as being college-ready is an important momentum point toward credential completion and statewide attainment. As our diverse population grows, best practices and success measures should be examined and potential expansion of those practices across Colorado explored.

Figure 4a: Developmental Education Rates by Race/Ethnicity for the Colorado High School Class of 2016 (Two-Year Institutions)

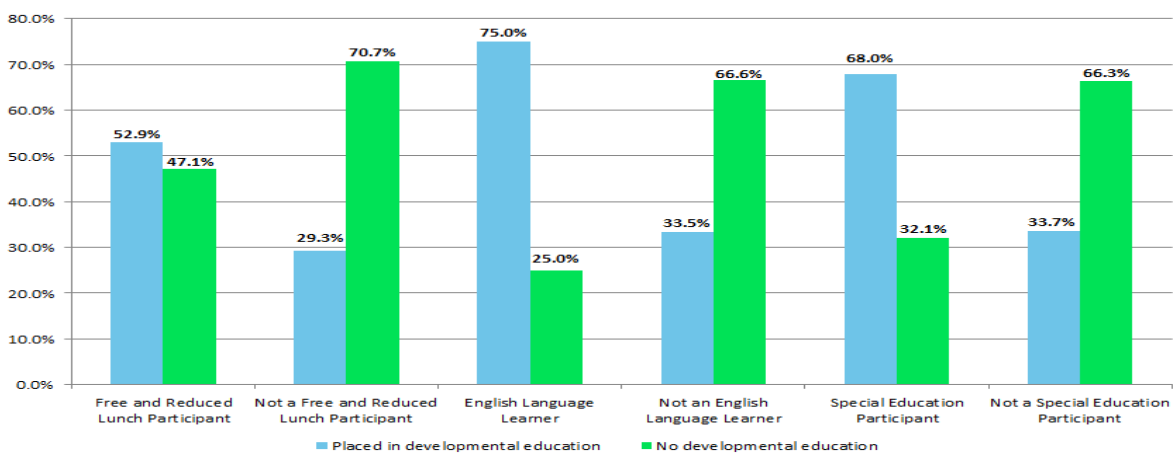

Figure 4b: Developmental Education Rates by Race/Ethnicity for the Colorado High School Class of 2016 (Four-Year Institutions)

When examining developmental education needs by free and reduced lunch (FRL) participation, students who had greater financial needs and participated in FRL were more likely to be in developmental education than their peers who were not FRL participants. Specifically, 52.9 percent of FRL students were placed in developmental education compared to 29.3 percent of non-FRL students.

English Language Learner (ELL) participants were also more likely to be placed in developmental education than non-ELL high school graduates. Approximately, 75 percent of ELL students were placed in developmental education compared 33.5 percent of non-ELL students. Special Education participation in high school is also associated with a greater need for developmental education. For those students who participated in Special Education in high school, 68 percent were placed in developmental education compared to 33.7 percent of traditional education students.

Figure 5: Developmental Education Rates by FRL Participation, ELL Status and Special Education Participation for the Colorado High School Class of 2016

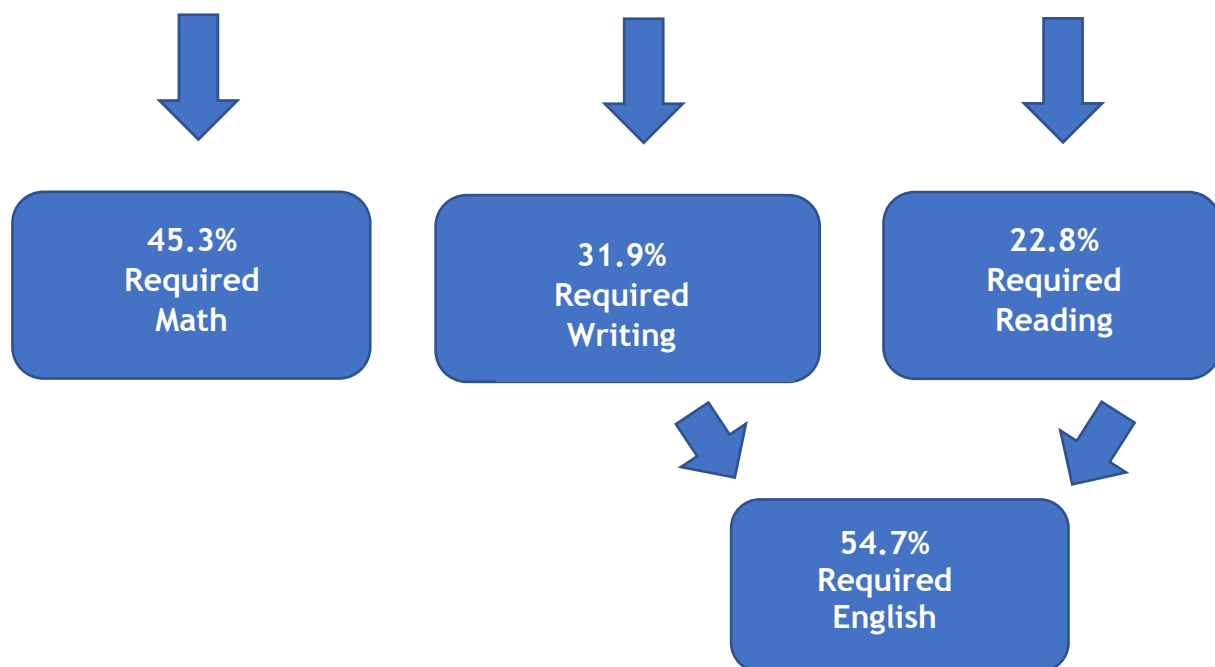

Developmental Education Rates by Subject

Placement in developmental education shows 45.3 percent of 2016 high school graduates needing developmental education in Math and 54.7 percent needing developmental education in English (see Figure 6).

Since 2013, in response to these bleak outcomes, the Colorado Community College System (CCCS) has successfully implemented developmental education redesign. The redesign involved a data-informed, evidence-based approach that reduced the costs, credits required and time-to-complete associated with Colorado's developmental education programs. The goal was to provide students with a curriculum that would be driven by what students needed to learn to be successful in gateway college courses.⁶ Crucially, evidence suggests that students in redesigned developmental education courses are performing equally and sometimes better than students in non-redesigned developmental education courses. Additionally, the students are completing developmental education in a shortened time period, which decreases their time spent to earn a credential.

Figure 6: Developmental Education by Subject

2016 High School Graduates Needing a Developmental Education

⁶ Colorado Community College System. The Redesign of Colorado Community College Developmental Education. Retrieved from:

Developmental Education Course Completion and Costs

Developmental Education Summary by End-of-Term Completion

Figure 7 and Tables 6 and 7 (Appendix) show developmental education courses attempted and total credit hours passed, failed, withdrew or incomplete. This includes the Colorado high school graduates for 2016 and all other students taking developmental education courses during 2016-2017. At all institutions, students enrolled in 31,963 developmental education courses. Of those, students passed 20,117 (62.9 percent, nearly identical to last year's rate), and failed, withdrew, took as incomplete or audited 11,846 (37 percent). The number of courses continues to drop while the rate for passage and failure remain similar. Figure 9 displays pass rates by subject. Please note these percentages are only based upon passed and failed and therefore don't include withdrawn courses. The pass rates for Writing (68.1 percent) and Reading (84.6 percent) are higher than the pass rates for Math (61.9 percent). The overwhelming majority (79.4 percent) of developmental education courses are in Math, far outpacing Reading and Writing.

Figure 7: 2016 Pass Rate for Developmental Education Courses

*Excludes students who withdrew by end of term

For the past three years, Supplemental Academic Instruction (SAI) has been available to students instead of traditional remedial courses. These SAI courses offer co-requisite instruction in Math or English for students with limited academic deficiencies who are placed into college-level coursework that is approved for statewide transfer (i.e., gtPathways).

Research conducted by the Colorado Community College System (CCCS) and Metropolitan State University of Denver (MSU Denver) shows positive outcomes for students enrolled in SAI. CCCS research shows that students enrolled in co-requisite or SAI courses in both English and Math show much higher success rates in college-level courses after a year than students who are in stand-alone developmental education courses.⁷ Additionally, developmental education students appear to have a better chance

of being successful in a college course if they take the developmental course. At MSU Denver, approximately 75 percent of students attending SAI will pass their course with a C or better.⁸

Recent research conducted at CCD shows that the number of students completing the next gateway course has quadrupled after the implementations of developmental education reforms including the use of SAI. With the implementation of SAI, 54 percent of students enrolled in the college-level course with SAI complete the course compared to a 34 percent completion rate for students taking the college-level course without SAI⁹.

⁷ CCCS (2015). Developmental Education and Supplemental Academic Instruction Report, Academic Year 2014-2015

⁸ Internal data provided to DHE from MSU Denver

⁹ The Boston Consulting Group (2018). Community College of Denver Case Study.

Developmental Education Credit-Hour Costs

The estimated total cost for instruction associated with developmental education enrollments is \$33.2 million. This total is comprised of an estimated state cost of \$12.8 million and an estimated student cost of \$20.4 million. Table 8 (Appendix) and Figure 8 show the estimated state cost for Fall 2016 and Spring 2017. Consistent with last year's estimated figures, students carry a high portion of the responsibility to cover the cost for developmental education courses.

The FY 2016-2017 developmental education cost is 12 percent higher compared to last year's estimated cost of \$29.6 million. However, the total cost for developmental education has seen a downward trend over the past four years. Two-year and four-year institutions that are authorized to offer developmental education reported that 31,963 developmental education courses were taken in Fall 2016 and Spring 2017, an increase from last year's figure of 27,680.

The estimated cost for developmental education is calculated by utilizing actual year data provided on total educational and general expenditures and revenue at the public institutions of higher education. Total revenues for educational and general expenditures are comprised of a combination of sources but the primary sources are tuition and state funding (General Fund or College Opportunity Fund dollars). This amount is divided by the total number of credit hours provided by the colleges to students over the same fiscal year to generate an average cost per credit hour. This average credit-hour cost per credit hour is then applied to the number of developmental education credit hours, producing an estimated average cost for total developmental education, which is then further divided into student share and state share. The costs in Figure 8 do not include cash-funded courses or developmental education coursework taken during the summer.

Figure 8: Estimated Developmental Education Cost for FY 2016-2017 and FY2015-2016

First-Year Retention Rates of Developmental Education Students

This section examines the retention rates of students placed into developmental education by institution. First-year retention is an important momentum point on the way to earning a college credential. The measurement of success focuses on the number of students who move through the developmental education sequence into credit-bearing courses, into their second year of college and onto graduation. Table 5 (Appendix) and Figure 9 compare overall retention rates of students assigned to and not assigned to developmental education by type of institution. Looking at all Colorado students, those who required developmental education were less likely to be retained into their second year of college. However, this trend did not apply to students at two-year institutions in Colorado. At Colorado public community colleges, 56.7 percent of students who needed developmental education enrolled in their second year of college compared to 51.5 percent of two-year students who arrived on campus without developmental education needs. At four-year institutions, the difference between one-year retention rates and developmental education placement was more pronounced. The retention rate for four-year students not assigned to developmental education coursework was 78.9 percent compared to 63.5 percent for those assigned to developmental education coursework, an approximately 15 percentage point difference in retention.

Figure 9: Developmental Education Placement and One-Year Retention, Two-Year Institutions and Four-Year Institutions for the Colorado High School Class of 2016

Developmental Education by School District and High School

Table 9 (appendix) shows data on the number of students assigned to developmental education by high school. Table 11 (appendix) shows data on the number of students assigned to developmental education by school district. For confidentiality purposes, data from high schools with 16 or less graduates enrolled are not displayed, though these students are included in the overall developmental education rate. Tables 10 and 12 (Appendix) disaggregate the most current year of data by high school and district.

Developmental education rates by high school with 17 or more graduates range from a low of 5 percent at The Vanguard School in Colorado Springs to a high of 94.4 percent at Jefferson High School in Greeley. For the Colorado High School Class of 2016, 26.2 percent of high schools have a developmental education rate of 25 percent or lower (25 percent last year). For the same high school class, 42.6 percent of high schools have a developmental education rate between 26 percent and 50 percent (39 percent last year). High schools with a developmental education rate above 50 percent decreased this year from 35 percent in 2015-2016 to 30.7 percent in 2016-2017.

Reforming the System of Developmental Education

National research indicates too many students are unnecessarily placed into developmental education, thus delaying their graduation, raising their debt and challenging their persistence. The Colorado Commission on Higher Education master plan, *Colorado Rises: Advancing Education and Talent Development*¹⁰ challenges the state's system of higher education to improve the effectiveness of placement in developmental education and reforms to it thereby increasing student persistence, decreasing time-to-completion and erasing educational attainment gaps.

The Colorado educational system is fully invested in graduating high school students who are college-ready and do not require developmental education. This shared goal is necessary for Colorado to meet our statewide attainment, credential completion and equity goals in order to meet the needs of our workforce. This section highlights the current remediation reform work occurring across the state and discusses future alignment and next steps.

To improve student success in developmental education, institutions of higher education have developed and/or redesigned the ways they offer and structure developmental education. In December 2014 the Commission enacted a policy to allow institutions to adopt the co-requisite developmental education model, known as Supplemental Academic Instruction (SAI). This reform signaled a paradigm shift in the way institutions approach placement and developmental education. Under Colorado's SAI program, students who test into remediation enroll directly into college-level coursework and receive supplemental academic support in a variety of ways, including but not limited to required labs, support courses, workshops and tutoring. Also, institutions are required to ensure that developmental education students who place into SAI or non-college level developmental education complete the sequent, college-level English and Math course(s) required of their programs within the students' first 30 semester credit hours.

Additionally, since October 2014 a faculty-led Math Pathways Task Force¹¹ has been coordinating with advisors and other faculty members on their campuses to help ensure students do not take unnecessary developmental Math courses. A primary concern driving the task force's work is that college freshmen and dually enrolled high school students are often advised into college algebra by default (which has a high failure rate) even though it may not be appropriate Math preparation for the degree program the student will eventually choose. In October 2017, the Math Pathways Task Force convened 30 Math faculty representing seven four-year institutions and nine two-year institutions from across the state for a professional development opportunity that emphasized best

¹⁰ Colorado Commission on Higher Education (2018). *Colorado Rises: Advancing Education and Talent Development*. Retrieved from: <http://masterplan.highered.colorado.gov/>

¹¹ Colorado Department of Higher Education. Math Pathways Taskforce.

<https://highered.colorado.gov/Academics/Groups/Math%20Pathways%20Task%20Force/schedule.html>

practices in the instruction of Quantitative Reasoning and Math for the Liberal Arts. Faculty also trained one another on instructional and classroom strategies for student engagement. The objectives for the convening were as follows:

- Model best practices for student learning in QR courses using the three main themes of developing statistical reasoning, financial literacy and mathematical modeling.
- Revisit the Task Force recommendations and two- to four-year alignment of curricula (Math for the Liberal Arts/QR, Statistics and Modeling).
- Highlight the curriculum development work done at the community colleges.
- Share work being done at scale on Math Pathways.

Additionally, Colorado's admission policy was revised to permit students to meet admission requirements by demonstrated proficiency versus seat time. The Commission's Developmental Education Policy aligns with State Board of Education's Graduation Guidelines, thus providing transparent college-ready expectations to K12 students, counselors and parents. This will change the way students are assessed and placed into developmental education and should decrease the number of students inaccurately identified as needing developmental education.

The alignment of these various initiatives in Colorado holds promising outcomes for students, our education and workforce systems and our state. While progress has been made in transforming developmental education in Colorado, there are still many opportunities for continued success. A few of the next steps include:

- Expand college-ready indicators in the statewide Developmental Education Policy to include the Next Generation Accuplacer scores.
- Use high school GPA as the primary measure to determine if the student is college-ready.
- Offer Supplemental Academic Instruction and/or co-requisite remediation at all Colorado public institutions of higher education with a two-year role and mission.
- Encourage innovation and promote research of successful new practices.
- Integrate developmental education with the current ongoing Math Pathways work.
- Connect developmental education with other student-success strategies like meta majors and open education resources.

Cohort:													
SURDS Dev Ed Course file (Fall 16 & Spring 17)													
Only includes math, english, and reading dev ed (determined by course prefix)													
Cost per credit hour is based upon FY 15-16 actual total education and general expenditures (from Budget Data Books), divided by total credit hours offered (from SURDS).

Report Methodology

The high school graduating cohorts for this developmental education report were provided by the Colorado Department of Education. Utilizing the K12 State Assigned Student ID (SASID), DHE is able to link postsecondary enrollment and developmental education records to the K12 records. High school graduates were linked to enrollment records from Fall 2016 and Spring 2017. Once a college enrollment record was found for a high school graduate their undergraduate applicant file was reviewed for a developmental education assessment record no older than 6 months from their high school graduation (which includes Summer 2016). Additionally, the enrollment file was reviewed for enrollment in a developmental education course in the Fall 2016 or Spring 2017 term. College developmental education students can be duplicated in the college developmental education rates as students can enroll at multiple institutions. Developmental education students are not duplicated in the high school developmental education rate calculations.

This developmental education report methodology begins with the complete high school graduation cohort and looked at whether the student was assessed for developmental education and/or enrolled in a basic skills course, this report adds one additional function upon the recommendation of the local K-12 districts and with the support of the Colorado Department of Education. In this report, developmental education rates for high schools have been calculated based upon two high school cohorts. The first cohort is the completer cohort, which matches last year's report, and is based upon the academic year. In this cohort, early and late graduates are folded into the same class based upon the year. The second cohort presented in Tables 9 and 11 is the on-time graduation cohort in which a student is assigned a graduating class that does not change over time. This change in reporting aligns with the on-time graduation rate currently reported by our local districts and complies with the Every Student Succeeds Act (ESSA), previously known as the No Child Left Behind Act.

Data includes College Composition and Reading (CCR) courses as part of the list of developmental education courses. College Composition and Reading courses replaced many of the Writing and Reading remedial courses as part of the remedial redesign spearheaded by the Colorado Community College System. However, these courses are not considered Supplemental Academic Instruction (SAI). The CCR courses capture many students who would have been in either English or Reading remedial courses.

Data Limitations

In reviewing the tables in this report, one must be mindful that the data do not include recent graduates who enrolled in Colorado institutions for which we do not collect data, an out-of-state college, and or students who are missing a K12 State Assigned Student ID (SASID). Please note the accuracy of record matching of the SASID to college records may vary year to year. Additionally, numerous variables exist that DHE is unable to collect that may account for some of the variance surrounding those students who need developmental education and those adequately prepared for postsecondary education. Despite these limitations, DHE believes that this summary is a *reasonable representation* of the current developmental education landscape of Colorado.
