OVERVIEW

This report was prepared by The Colorado Department of Higher Education (DHE) pursuant to 23-1-113.3 C.R.S.

The information in this report is presented to inform the ongoing dialogue regarding preparation for college and the effects of remedial education or developmental education* in Colorado. This report documents data gathered by the Colorado Department of Higher Education (DHE) for academic year 2014 (Summer 2013 - Spring 2014) as required by statute. The report concerns students taking basic skills courses at Colorado's public higher education institutions. The report is submitted to the Education Committees of the Senate and House of Representatives, the Joint Budget Committee (JBC), the Colorado Department of Education (CDE), and each Colorado public school district superintendent.

C.R.S. 23-1-113.3 defines areas of responsibility for the Commission with regard to remedial education:

- adopt and implement a remedial policy; develop funding policies for remediation appropriate to institutional roles and missions;
- design a reporting system that provides the General Assembly with information on the number, type, and costs of remediation;
- establish comparability of placement or assessment tests; and
- ensure each student identified as needing remediation is provided with written notification regarding cost and availability of remedial courses.

For more information please contact:

Michael Vente, Research and Information Policy Officer at the Colorado Department of Higher Education, at 303-866-4266 or by email at michael.vente@dhe.state.co.us

Beth Bean, Chief Research Officer at the Colorado Department of Higher Education, at 303-866-2661 or by email at beth.bean@dhe.state.co.us

*Remedial education, remediation, not college ready and developmental education are used interchangeably throughout this report.

HIGHLIGHTS

Highlights from Academic Year 2013-14

- Overall, the percentage of the 2013 high school graduates placed into remediation in at least one subject was 34.2%, an improvement from the previous year of 37.0%.
- Of the 23,490 high school graduates who matriculated to college in Colorado, 6,926 students were not college ready and required at least one remedial course.
- About 36 percent of college female students were not college ready compared to 31 percent of college matriculated males.
- Eighty percent of Black, non-Hispanic students at two-year colleges and 50 percent of such students at four-year institutions were not ready for college level courses.
- Almost 69 percent of Hispanic students enrolled at a two-year college required developmental education compared to 36 percent at four-year institutions.
- Fifty-one percent of Free and Reduced Lunch participants were not college ready compared to 28% of non-FRL students who were not college ready.
- When examining remediation by subject, most students required remediation in mathematics, followed by writing and then reading.
- At the four-year level, the retention rate for students not assigned to remediation was 77 percent, compared to 61 percent for those needing remediation.
- For the second year in a row, remedial students had higher first year retention rates than non-remedial students at community colleges.
- Approximately 62 percent of all remedial courses were completed successfully, the same rate as the previous year.
- Combined, the estimated cost to the state and estimated tuition cost to the student for remedial courses amount to approximately \$47.1 million in FY2013-14. This is a nine million dollar savings from last year due to fewer students taking remedial courses and fewer courses being offered.

REPORT SUMMARY

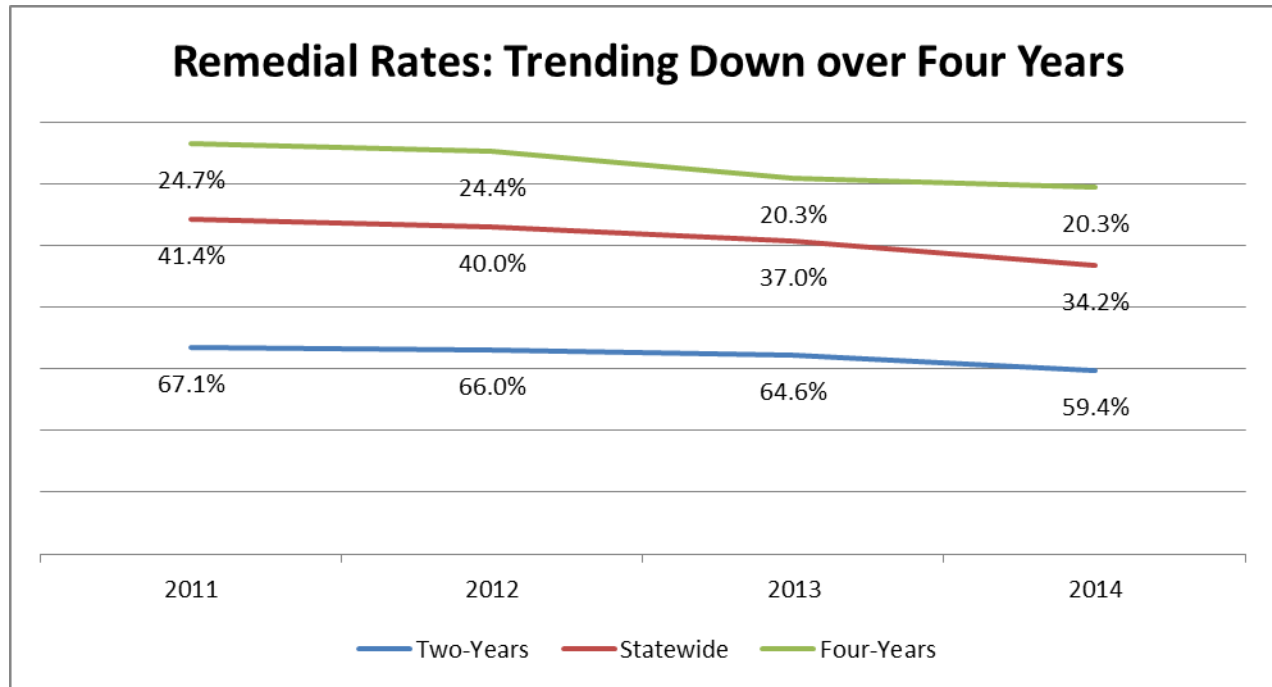

The Colorado Department of Higher Education has set a recent primary goal of closing the attainment gap by at least half by 2025. Closing the attainment gap is a necessary component of helping us meet the Colorado Commission on Higher Education's goal of increasing the number of residents aged 25-34 who hold a high-quality, postsecondary credential to 66 percent.¹ In order to close the attainment gap and meet Colorado's economic workforce needs, nearly all college students, regardless of their demographics, must be successful and earn a college credential. Remedial education can no longer impede the pathway to credential completion for our students. National research has shown students needing remediation are more likely to drop out of college without earning a degree. Compounding the matter is the fact that more low income and Hispanic and African American students require developmental education compared to their White counterparts which ultimately feeds the attainment gap. Developmental education is a key indicator of credential success and continued reduction of remediation through redesign and innovation will be a continued focus of closing the attainment gap. The last several years have seen an array of focused initiatives implemented to decrease the remediation needs of students. These initiatives appear to be working as the overall number of Colorado high school students needing remediation decreased for the second year in a row.

The 2013-2014 remedial rate decreased to 34 percent of students needing remedial education from last year's 37 percent.

Prior national research estimated half of all community college students and 20% of students entering a four-year institution required remediation³. Other national studies cite upwards of 60 percent of students attending two-year institutions need basic skill courses⁴. Colorado's rates are comparable with the nation and have historically shown statewide remediation to hover around 40 percent. However, the state remediation rate has shown substantial decrease, totaling six percentage points, in the last two years. In 2013-2014, the number of students requiring remediation decreased by three percentage points to 34.2 percent compared to last year's remediation rate of 37.0 percent. The remediation rate two years ago was 40

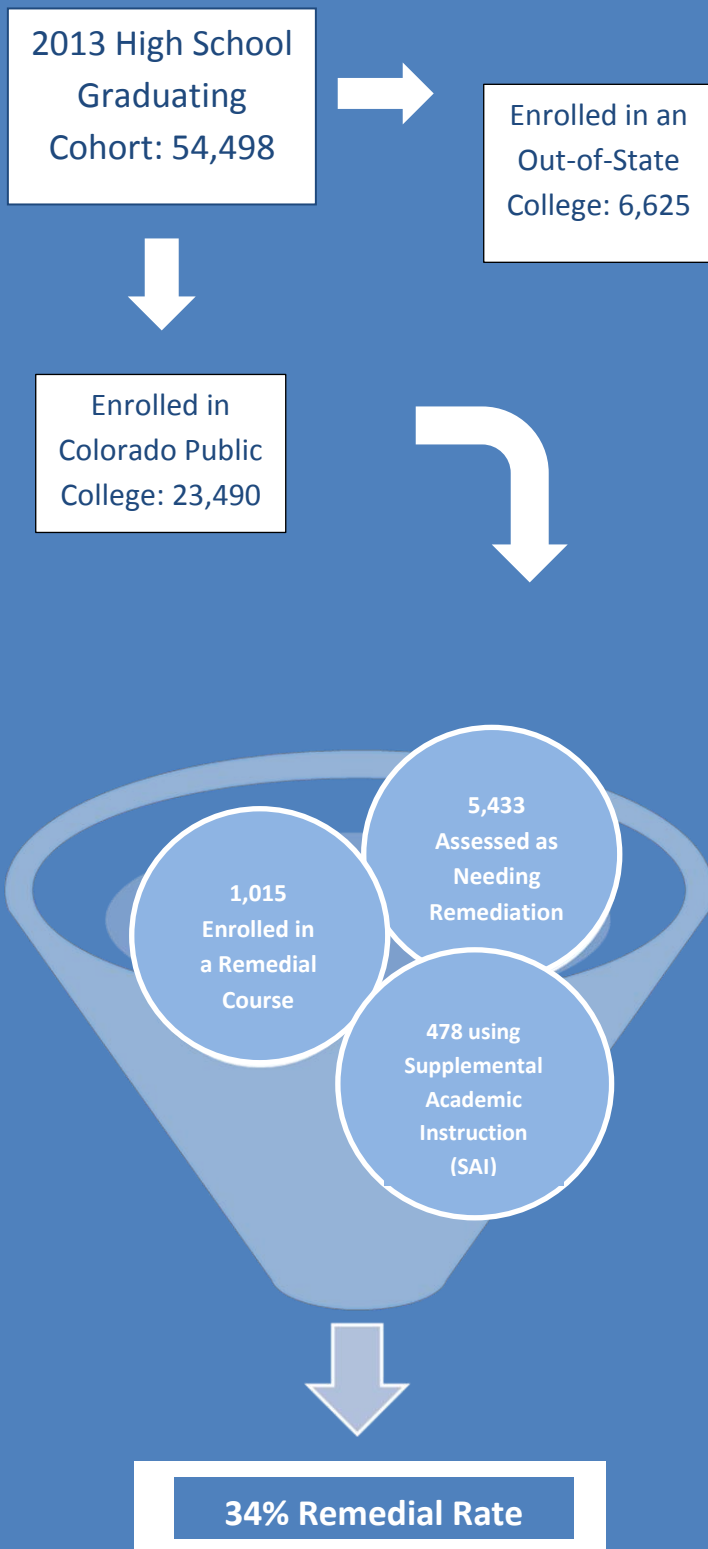

percent. The decrease in the number of students needing remediation demonstrates continued movement in the right direction and points to the success of recently implemented remedial initiatives and implementation of Supplemental Academic Instruction. This year's report and the calculated remedial rate include students participating in Supplemental Academic Instruction or co-requisite remediation. A complimentary report to the remedial report focusing on supplemental academic instruction will be released later this summer. Please note the decrease in the number of students needing remediation is related to the remedial redesign at community colleges and the elimination of the lowest level of remedial classes.

Figure 1. Longitudinal Remedial Rates by Sector

Specifically, of the 2013 public high school completers who enrolled in a state college or university 34.2 percent were assessed as needing remediation or were enrolled in a basic skills course. The percentage of 2013 high school graduates who enrolled in a two-year college and needed remediation was 59.4 percent, a substantial improvement from the previous year of 64.6 percent of students. The comparable rate for students who enrolled in a four-year institution remained the same at 20 percent, but an improvement from 24 percent of students, which was the rate two years ago. Figure 1 displays remedial rates from the past four academic years statewide and by educational sector. As the graphic displays, there has been a downward trend in the number of students needing remediation across each sector within the state. Please note, this year's report counts students utilizing Supplemental Academic Instruction (SAI), or co-requisite remediation, in the overall remedial percentages. A later report released summer 2015, will discuss specific numbers and outcomes of the SAI programs, currently authorized at MSU Denver, Colorado Community College System, Western State Colorado University and Aims Community College.

Figure 2. Progression Track of the 2013 High School Graduating Cohort

Assessment and Enrollment of Remedial Students

In 2013, over 54,000 high school students graduated. Of those high school graduates, 55% enrolled into a postsecondary institution. The majority or about 78% of the college enrollees remained in state, while about 22% of Colorado high school graduates enrolled into an out-of-state college. Of those high school graduates who matriculated to a Colorado public college, 5,433 were assessed as needing remediation. An additional 1,015 students enrolled in a remedial course. Additionally, 478 students participated in Supplemental Academic Instruction (SAI). Not all students who were assessed as needing a basic skill course enrolled immediately into a class.

Remedial Rates by Public Institution of Higher Education in Colorado

In 2013-14, the majority of community colleges experienced a decrease in the number of students needing remediation compared to the prior academic year and as a positive result of the remedial education redesign. The combined remedial rate for Colorado community colleges was 58.0%; a significant decrease from last year's sixty-three percent. The range of remedial rates included a low of 41.1% at Morgan Community College to a high of 82.1% at the Community College of Denver. The high rate at the Community College of Denver could be a reflection of the unique role the college plays as the only two-year member of the Auraria Campus.

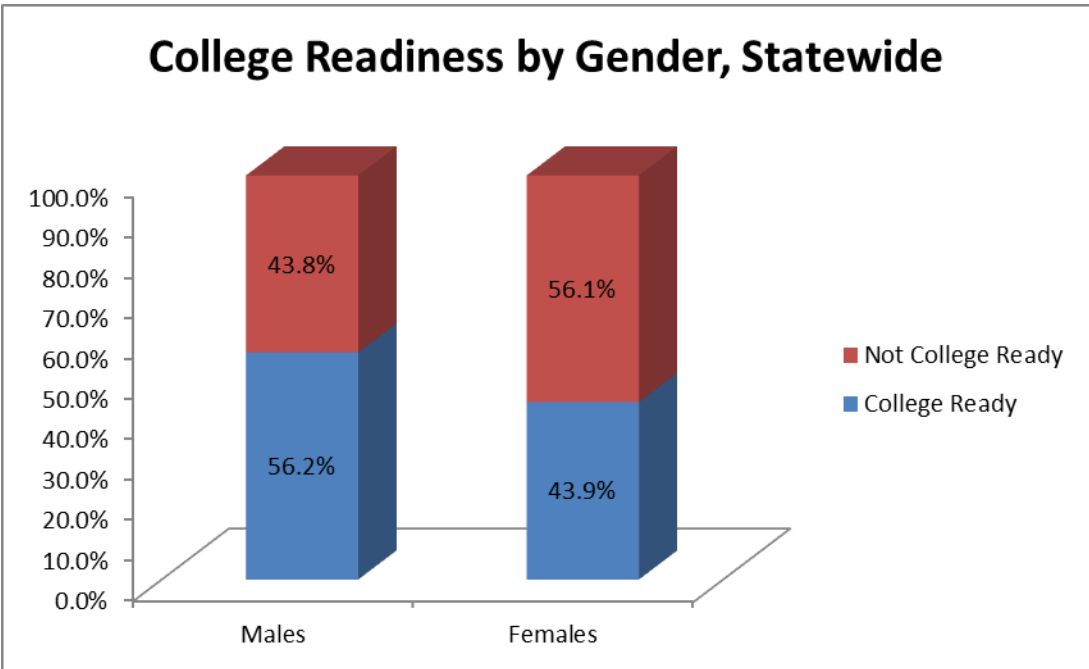

Table 1: Remedial Rates by Public Institution			
INSTITUTION NAME	COHORT	REMEDIAL	PERCENT REMEDIAL
Arapahoe Community College	818	460	56.2%
Colorado Northwestern Community College	79	42	53.2%
Community College of Aurora	488	277	56.8%
Community College of Denver	526	432	82.1%
Front Range Community College	1621	926	57.1%
Lamar Community College	115	51	44.3%
Morgan Community College	124	51	41.1%

Otero Junior College	191	102	53.4%
Pikes Peak Community College	950	547	57.6%
Pueblo Community College	505	311	61.6%
Red Rocks Community College	676	355	52.5%
Trinidad State Junior College	158	90	57.0%
CC SubTotal	6482	3761	58.0%
Aims Community College	191	123	64.4%
Colorado Mountain College	369	173	46.9%
Local District Colleges	560	296	52.9%
Adams State University - 2 yr. students only	62	61	98.4%
Western Colorado Community College	668	498	74.6%
Dual Mission Colleges - 2 yr. Students only	730	559	76.6%
GRAND TOTAL FOR TWO YEAR INSTITUTIONS	7772	4616	59.4%
Adams State University - 4 yr. students only	288	155	53.8%
Colorado Mesa University- 4 yr. students only	927	274	29.6%
Colorado School of Mines	499	0	0.0%
Colorado State University	3006	216	7.2%
Colorado State University - Pueblo	598	325	54.3%
Fort Lewis College	100	27	27.0%
Metro State University of Denver	1758	782	44.5%
University of Colorado Boulder	2898	11	0.4%
University of Colorado Colorado Springs	1250	318	25.4%
University of Colorado Denver	962	157	16.3%
University of Northern Colorado	1608	515	32.0%
Western State Colorado University	298	108	36.2%
GRAND TOTAL FOR FOUR YEAR INSTITUTIONS	14192	2888	20.3%
Grand Total	21964	7504	34.2%

The local district colleges had a combined remedial rate of 52.9%, while the two year students enrolled at our dual mission colleges, showed a combined remedial rate of 76.6%. Among four-year institutions, Colorado State University - Pueblo, had the highest percent of four-year students needing remediation at 54.3%, a decrease from last year. The University of Colorado Boulder and the Colorado School of Mines had .5 percent or less of the 2013 enrolled high school graduates needing developmental education. Please see Table 1. Please note college cohort size may vary year to year depending on the accuracy of matching the K12 State Assigned Student ID (SASID) to college records.

PROFILE OF A REMEDIAL STUDENT: Demographics of the 2013 High School Graduates Assigned to Developmental Education

Consistent with recent trends, a slightly higher proportion of females were assigned to remediation. When examining the students who were assessed as needing developmental education, 56% were females compared to 44% of males. These remedial rates are consistent with enrollment rates that have steadily shown a slight majority of female students matriculating compared to males. Within the buckets of gender, 36% of females were not college ready upon entrance to college and 31% of males were not college ready. At two-year institutions in the fall of 2013, 60.5 percent of females and 54.5 percent of males was assigned to a remedial course, compared to approximately 25 percent of females and 21 percent of males who were enrolled at a four-year institution. (Please see Figure 3 and Table 4 [appendix]).

Figure 3. Remediation in at Least One Subject by Gender (Statewide)

When examining developmental needs by race/ethnicity, minority students are more likely to not be college ready compared to White, non-Hispanic students. Among students from minority populations, Black, non-Hispanic high school graduates had the highest remedial placement rate. *Eighty percent of Black, non-Hispanic students at two-year colleges and 50 percent of such students at four-year institutions were not ready for college level courses. At the two-year college level, this is a 29 point gap in college readiness between White students and Black students. Sixty-nine percent of Hispanic students enrolled at two-year colleges required developmental education compared to 36 percent at four-year institutions. As our diverse populations experience dramatic growth in Colorado, our schools must be prepared to help students pass the necessary remedial courses and succeed through to a postsecondary credential (See Figures 4a and 4b and Table 3 [appendix]).*

Figure 4a. College Readiness by Race/Ethnicity (Two-Year Institutions)

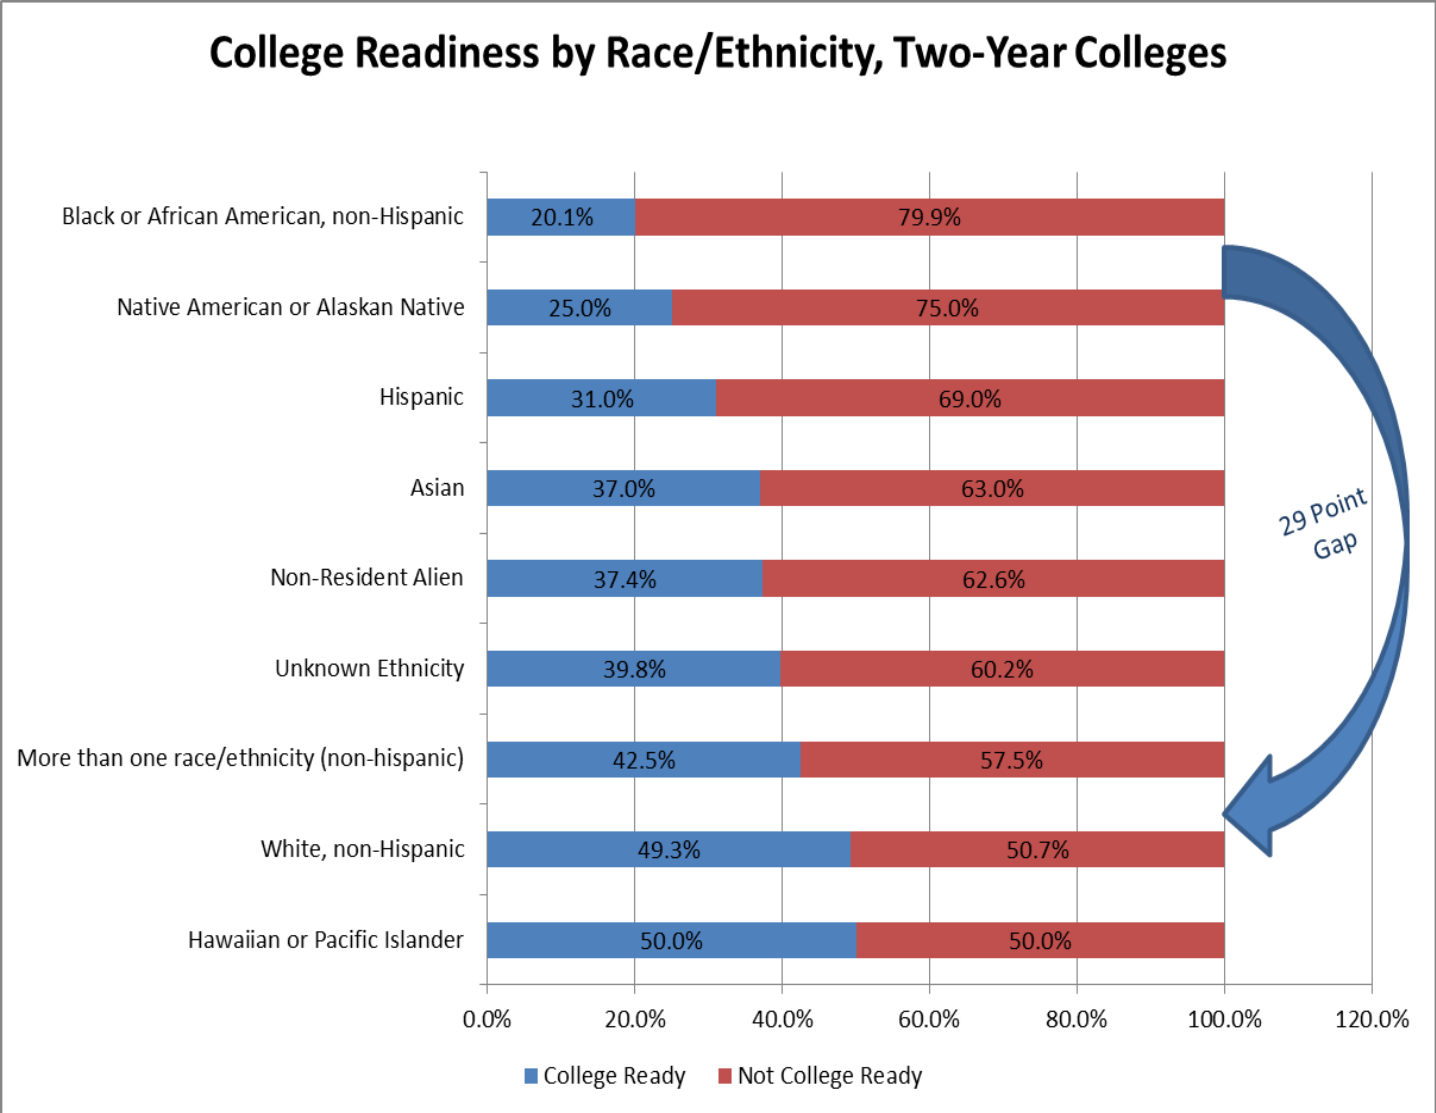

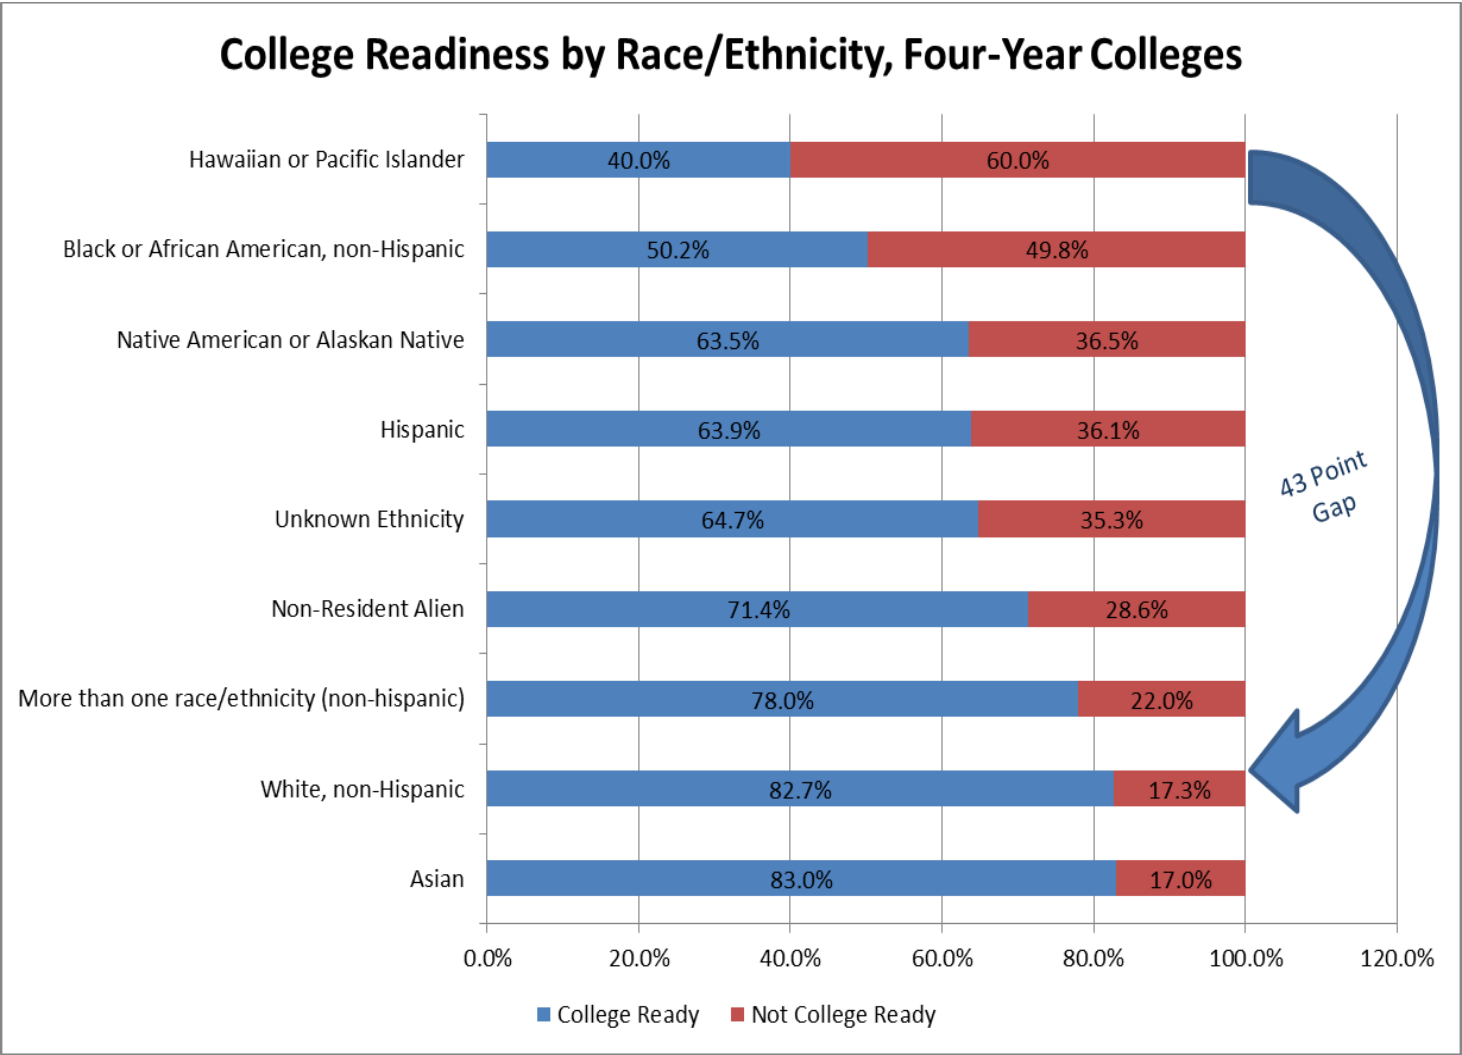

Figure 4b. College Readiness by Race/Ethnicity (Four-Year Institutions)

When examining developmental needs by free and reduced lunch (FRL) participation, students who had greater financial needs and participated in FRL were less likely to be college ready than their peers who were not participants in the FRL program. Specifically, 51% of FRL students were not college ready compared to 28% of non-FRL students who needed remediation. Please see Figure 5.

English Language Learner (ELL) participants were also more likely to need remediation than non-ELL high school graduates. Approximately, 69% of ELL students need remediation compared 31% of non-ELL students. Please see Figure 6.

Special Education participation in high school is also associated with a greater need for remediation. For those students who participated in special education in high school, 68% needed remediation compared to 31% of traditional education students. Please see Figure 7.

Figure 5. College Readiness by Free and Reduced Lunch Participation in High School

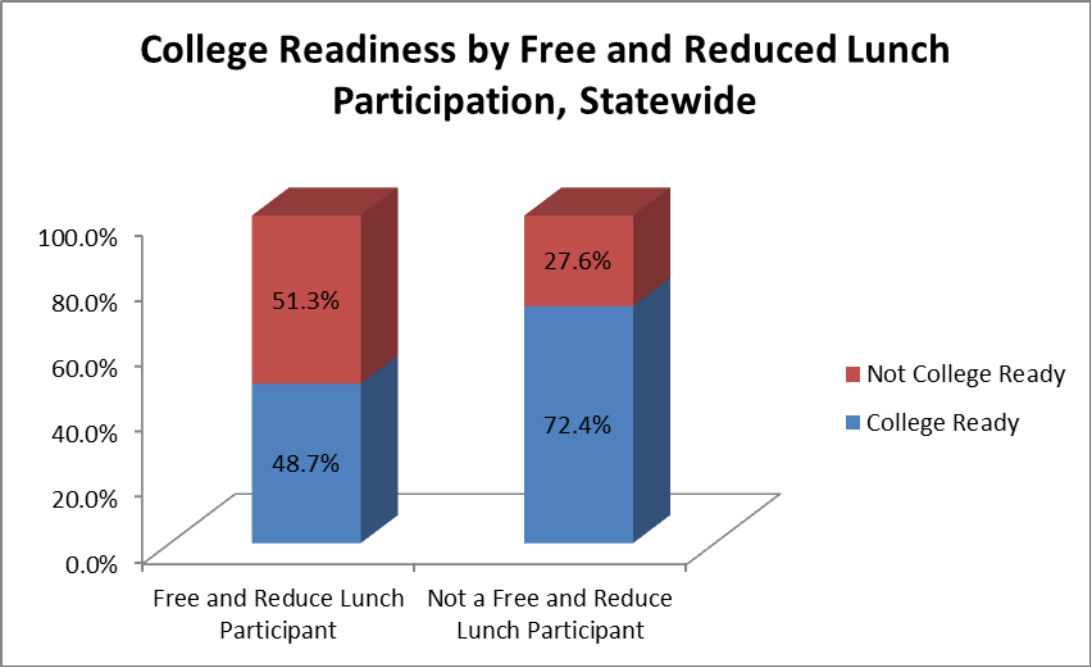

Figure 6. College Readiness by English Language Learner Status in High School

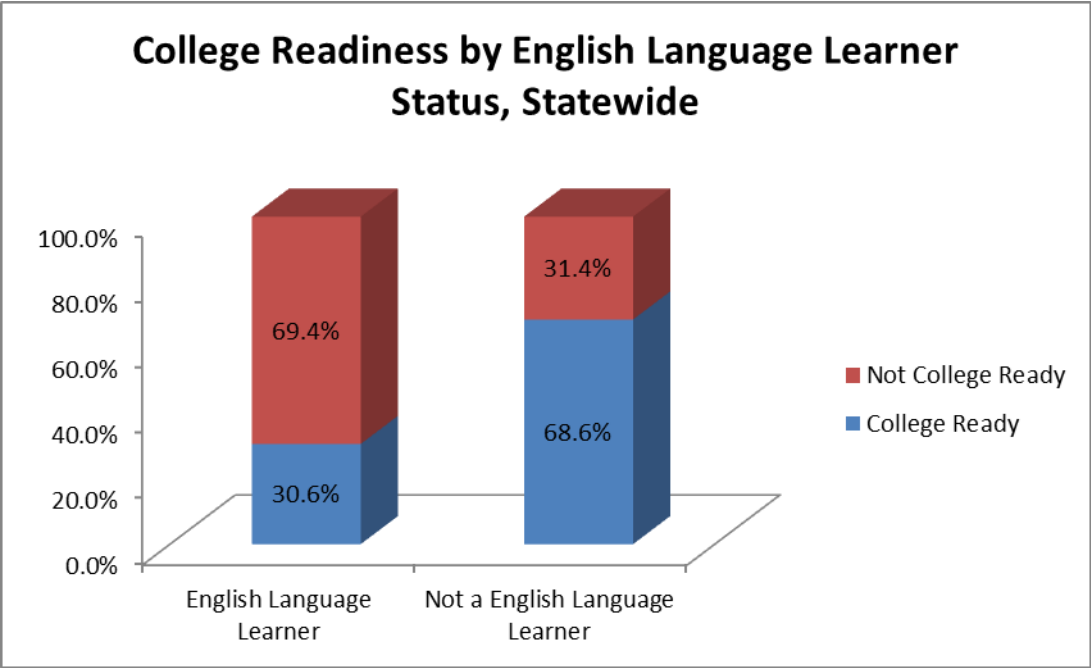

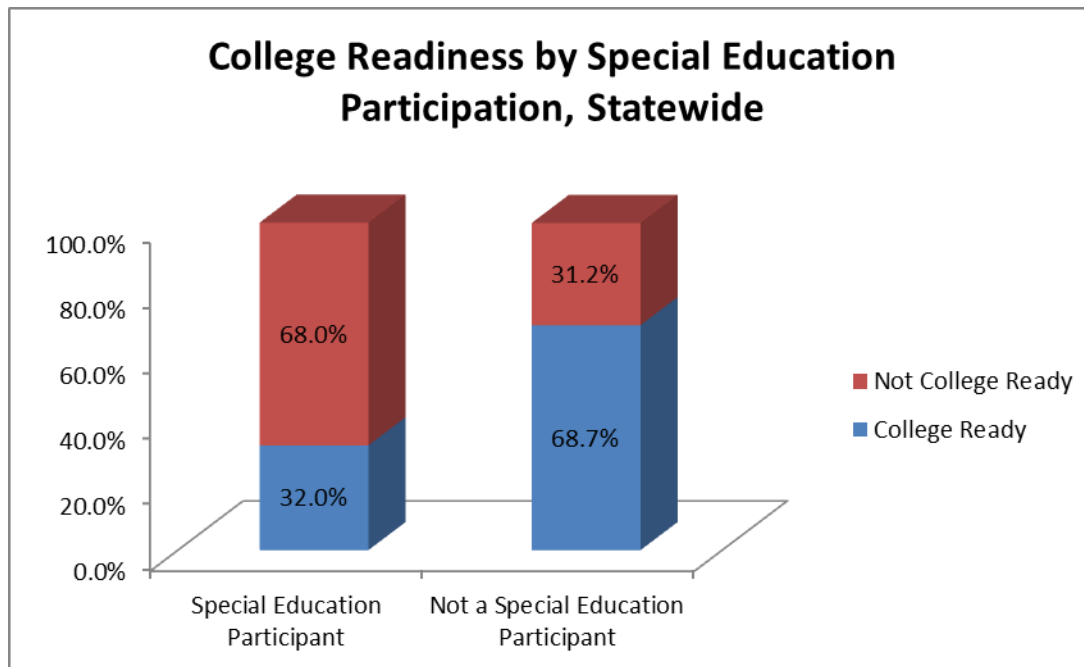

Figure 7. College Readiness by Special Education Participation in High School

Remedial Rates by Subject

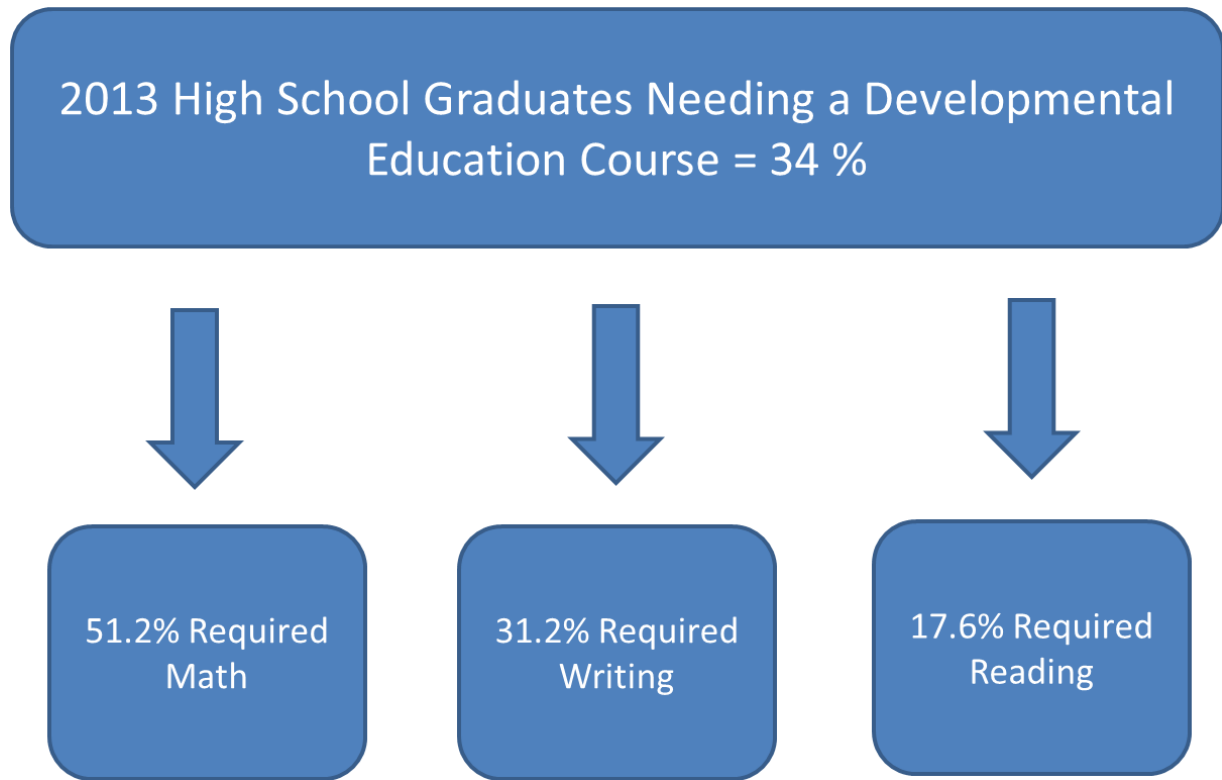

The largest number of students in need of remediation required additional help in math (51%), a finding consistent with previous state reports and national trends. This rate is followed in magnitude by writing (31%) and reading (18%). Figure 8 below illustrates the percentage of 2013 high school graduates assigned to remediation by subject.

As Figure 8 shows, the greatest remedial intensity is in math. Research has shown there is a negative relationship between the number of remedial classes needed and a student's chance of academic success⁵. The Colorado Community College System has estimated that less than five percent of students assigned to a remedial course will eventually go on to earn a degree⁶.

Since 2013, the Colorado Community College System (CCCS) has successfully implemented their developmental education redesign. Based upon initial research conducted by the CCCS, the redesign outcomes look promising. Early evidence suggests that students in redesigned remedial courses are performing equally and sometimes better than students in non-redesigned remedial courses. Additionally, the students are completing the necessary remedial courses in a shortened time period. Link to the CCCS report:

https://www.cccs.edu/Docs/SBCCOE/Agenda/2014/11Nov/2_WS_IE_Update_DevEdRedesign.pdf

Figure 8. Developmental Education by Subject

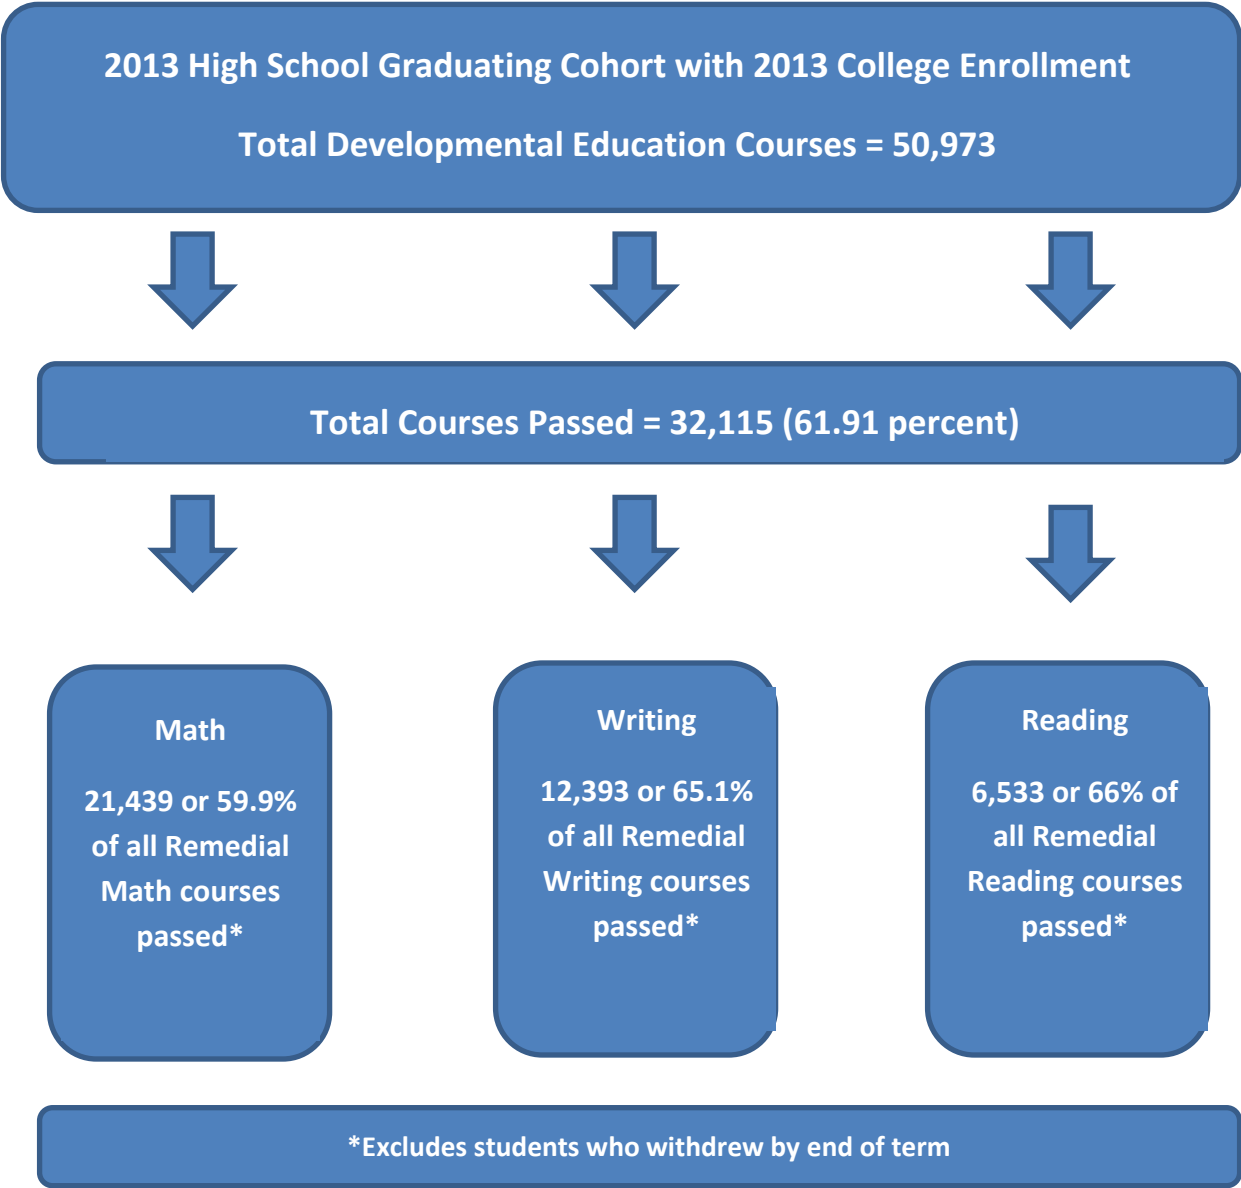

REMEDIAL COURSE COMPLETION AND COSTS

Remedial Summary by End of Term Completion

Please note the decrease in remedial courses and the cost of remediation are a result of the community college system remedial redesign and the elimination of the lowest level of remedial classes. Figure 9 and Tables 6 and 7 in the appendix show developmental courses attempted and total credit hours passed, failed, withdrew or incomplete. At all institutions, students enrolled in 51,874 remedial courses. Of those, students passed 32,115 (62 percent), and failed, withdrew, took as incomplete or audited 19,363 (37 percent). While the number of courses dropped significantly from last year the rate for passage and failure remained similar. Figure 9 displays remedial pass rates by subject. Please note these percentages are only based upon passed and failed and therefore don't include withdrawn courses. The pass rates for Math, English, and Reading are comparable with 69 percent of remedial students passing Reading, 66 percent passing Writing, and 60

percent passing Math. The overwhelming majority (approximately 70 percent) of remedial courses are in Math, far outpacing Reading and Writing.

Figure 9.
2012 College Going Cohort Pass Rate for Developmental Education Courses

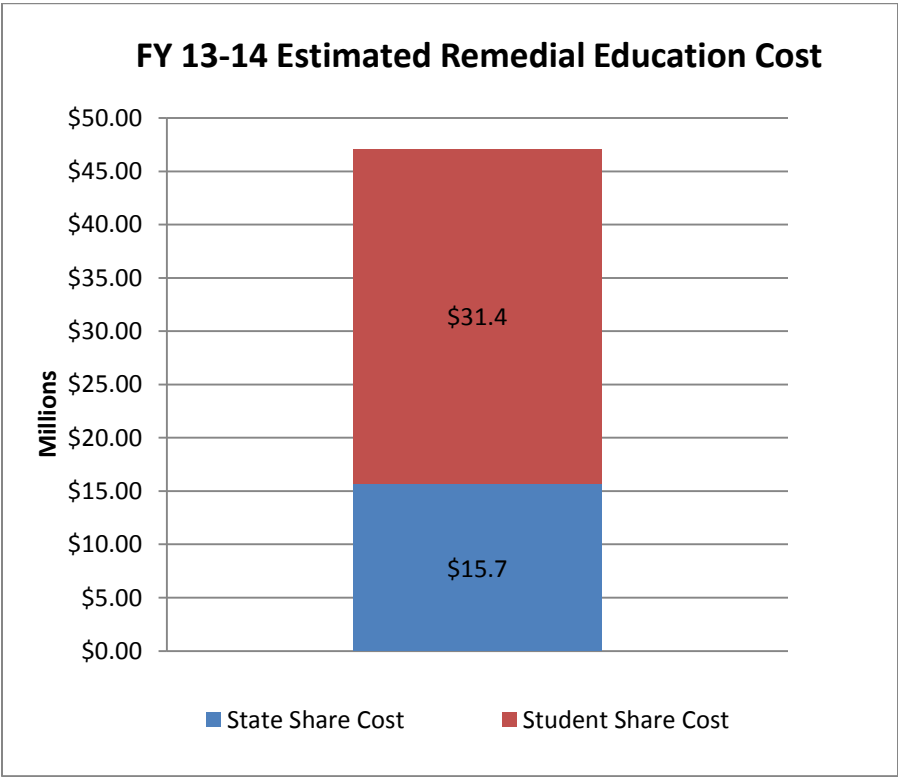

Remedial Credit Hour Costs

The estimated cost for remediation is calculated by utilizing actual year data provided on total educational and general expenditures and revenue at the public institutions of higher education. Total revenues for educational and general expenditures are comprised of a

combination of sources but are primarily comprised of tuition and state funding (General Fund or College Opportunity Fund dollars). This amount is divided by the total number of credit hours provided by the colleges to students over the same fiscal year to general an average cost per credit hour. This average cost per credit hour is then applied to the number of remedial credit hours which generates an estimated average cost for total remedial education, which is further divided into student share and state share.

Table 8 and Figure 10 show the estimated state cost for Fall 2013 and Spring 2014. Two-year and four-year institutions that are authorized to offer remedial instruction reported that 51,874 remedial courses were taken in Fall 2013 and Spring 2014, a decrease from last year’s figure of 70,541. The estimated *total* cost for remedial instruction associated with these enrollments is \$47.1 million. This total is comprised of an estimated state cost of \$15.7 million and an estimated student cost of \$31.4 million. These cost tables do not include cash funded courses or remedial coursework taken during the summer. The FY 2013-2014 remedial education cost is a decrease over last year’s estimated cost of \$56.1 million and shows a savings of over nine million dollars due to fewer students taking remedial courses and fewer courses being offered. Consistent with last year’s estimated figures is the high portion of responsibility on the student to cover the cost.

Figure 10. FY 2012-13 Estimated Remedial Education Cost

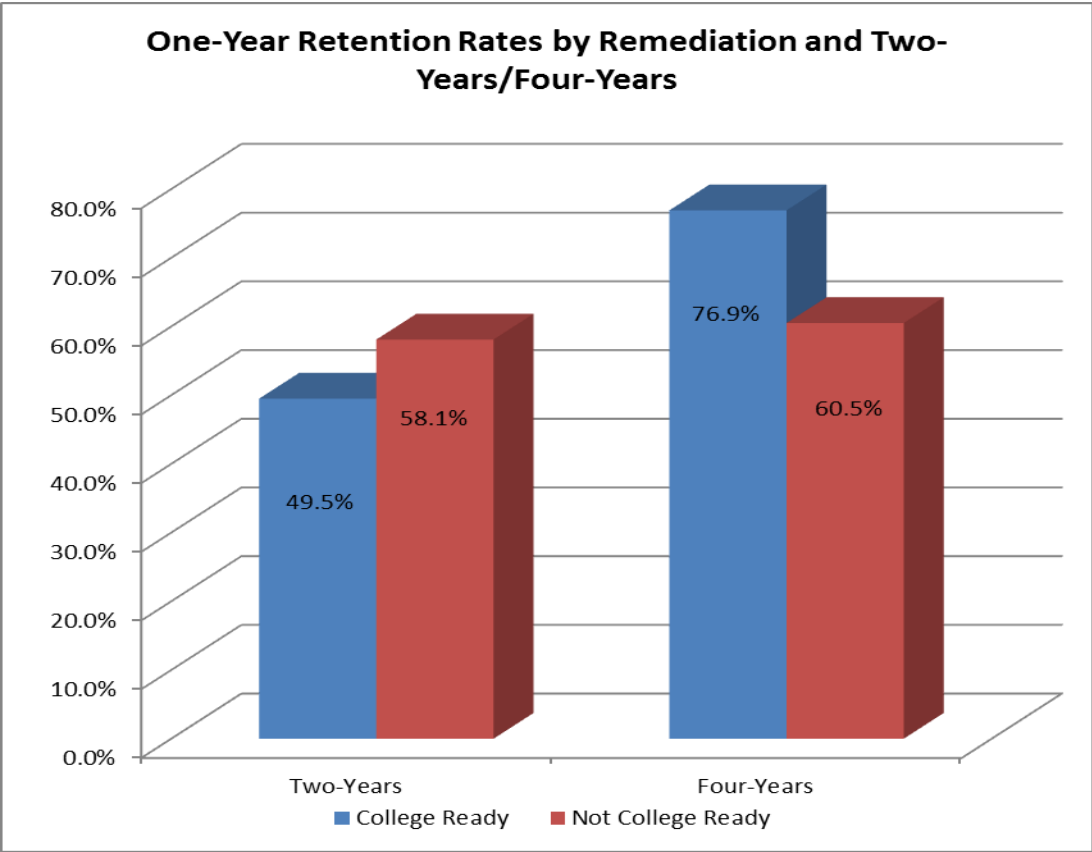

FIRST YEAR RETENTION: Retention Rates of Remedial and Non-Remedial Students

This section examines the retention rates of remedial and non-remedial students by institution. First year retention is an important momentum point on the way to earning a college credential. Measuring success is focused on the number of students who move through the remedial sequence into credit-bearing courses, into their second year of college and on to graduation.

Table 5 (in appendix) and Figure 11 compare overall retention rates of students assigned to remediation and those not assigned to remediation by type of institution. Historically, Colorado students who required developmental education were less likely to persist into their second year. However, for the second time since annual reporting began in 2001, the first-year retention rates of remedial students were higher than for non-remedial students at community colleges. At these two-year institutions, 58% of students who needed remediation enrolled in their second year of college compared to 50% of two-year students who didn't arrive on campus with developmental education needs. At four-year institutions, the difference between one- year retention rates and remediation was more pronounced and had the more common reverse effect. The retention rate for four-year students not assigned to remedial coursework was 77% compared to 61% for those assigned to remediation, nearly a 16 percentage point difference in retention. More research is needed to fully understand this new occurrence and the success of the two-year remedial students

Figure11. Remediation and One-Year Retention (Community Colleges and Four-Year Institutions)

REMEDICATION BY SCHOOL DISTRICT AND HIGH SCHOOL

Table 9 shows data on the number of students assigned to remediation by school district and high school. For confidentiality purposes, data from high schools with less than 16 graduates enrolled are not displayed, though these students are included in the overall remedial rate. Table 10 disaggregates the most current year of data by developmental education subject, district and high school.

Remedial rates by high school with 17 or more graduates range from a low of 1.4 percent at D’Evelyn High School in Jefferson County to a high of 88.9 percent at West High School in Denver. A number of high schools have consistently had low remedial rates for their high school graduates. These schools include D’Evelyn High School and Evergreen High School in Jefferson County, Colorado Springs Early College, the Denver School of Science and Technology in Denver County, and Fairview High School in Boulder. Approximately 28 percent of high schools have a 2013 remedial rate of 25% or lower, while 53 percent of secondary schools have a remedial rate between 26 and 50 percent. Less than two percent of high schools have a remedial rate greater than 75 percent of their graduates not being college ready.

RECOMMENDATIONS AND NEXT STEPS

The Colorado Department of Higher Education partnering with the Colorado Department of Education is fully invested in graduating high school students who are college ready and do not require remediation. This shared focus of decreasing remedial needs is imperative to Colorado closing the attainment gap, meeting our credential completion goal, building equity and preparing our future workforce. This following section highlights the current remediation reform work occurring across the state and discusses alignment and next steps.

- Under the CAP4K legislation (SB 08-212) Colorado's admission and remediation policies were revised to permit students to qualify for college by demonstrating proficiency versus seat time. These two revised policies have been successfully implemented this past year and have changed the way students are assessed and placed into a remedial course. The outcome of these policies has helped to decrease the number of students needing developmental education as reflected in the lower statewide remedial rate.
- The Supplemental Academic Instruction (SAI) policy has been authorized and is currently being implemented by Aims Community College, Colorado Community College System, Fort Lewis College, Metropolitan State University of Denver and Western State Colorado University. Early evaluation of SAI at the campus level appears promising and will be included in a summer 2015 complimentary statewide SAI report.
- Increasing the success of remedial students is factored into the state's accountability and funding system through Senate Bill 52 and House Bill 14-1319. The Colorado Commission on Higher Education as part of its Statewide Master Plan includes "improving student success through better outcomes in basic skills education" as one of its top four goals. Per SB 52, this vital goal is being measured at the institutional level by "eliminating the disparities in the completion rates of college-level English and mathematics courses between students originally assigned to remediation and those not assigned to remediation".¹ House Bill 1319, requires that the Role & Mission factors be comprised of funding to offset the costs of providing program, which currently includes remedial programs.
- Utilizing the rich longitudinal data system in Colorado, future remedial reports will focus on progress indicators connected to closing the attainment gap and meeting our credential goals. Future data points will look at the success of remedial students in development education courses and beyond into their gateway courses. Additionally, credential completion of remedial and non-remedial students and time to degree factors will ideally be included.

The continued decrease in the statewide remedial rate holds promising outcomes for preparing Colorado to close the attainment gap and meet our credential completion goal. Colorado public secondary and postsecondary institutions are dedicated to improving and eventually eliminating remedial education. Again, Colorado has seen positive and incremental movement in the right direction towards all college students being ready and successful.

Appendix B: Technical Information

REMEDIAL METHODOLOGY AND DATA LIMITATIONS

Methodology

The high school graduating cohorts for this remedial report were provided by the Colorado Department of Education. Utilizing the State Assigned Student ID (SASID), DHE is able to link postsecondary enrollment and remedial records to the K12 records. High school graduates were linked to enrollment records from Fall 2013 and Spring 2014. Once a college enrollment record was found for a high school graduate their applicant file was reviewed for a remedial assessment record no older than 6 months from their high school graduation. Additionally, the enrollment file was reviewed for enrollment in a remedial course in the Fall 2013 or Spring 2014 term and or participation in Supplemental Academic Instruction (SAI). For the purposes of this report, SAI participation is counted in the remedial rate. College remedial students can be duplicated in the college remedial rates as students can enroll at multiple institutions. Remedial students are not duplicated in the high school remedial rate calculations.

Data Limitations

In reviewing the tables in this report, one must be mindful that the data does not include recent graduates who enrolled in Colorado institutions for which we do not collect data, an out-of-state college, and or students who are missing a SASID. Additionally, some student level data may not be available due to the difficulty of matching SASID with student SSN when the student moves from the K12 system to a postsecondary institution. Numerous variables exist that DHE is unable to collect that may account for some of the variance surrounding those students who need remediation and those adequately prepared for postsecondary education. Despite these limitations, DHE believes that this summary is a *reasonable representation* of the current remedial landscape of Colorado.
