

SB18-206 Compliance Reporting

In compliance with SB18-206 and Colorado Revised Statute 23-1-113.5, the current admissions/enrollment report is submitted for Colorado State University. The numbers demonstrate that nonresident students in the admissions process are not displacing Colorado residents.

All applications submitted to Colorado State University are reviewed in a holistic way that looks beyond GPA and test scores. Other factors considered may include employment, leadership activities, involvement in clubs or sports, community service activities etc. Additionally, performance trends are considered; the GPA of a student increased throughout high school but overall was only marginal. Student essays and letters of recommendation are also considered.

In keeping with our land grant heritage, the admissions rate for nonresidents (about 82%) is slightly lower than that of residents (86%). Thirty five percent of the FA18 class was nonresident (excluding international students). The average high school GPA for residents was 3.62 while the average for nonresidents was 3.67. The table below presents the acceptance/enrollment counts by residency and high school GPA for the cohorts of fall 2015, fall 2016, fall 2017, and fall 2018.
