

SB18-206 Compliance Reporting

In compliance with SB18-206 and Colorado Revised Statute 23-1-113.5, the current admissions/enrollment report is submitted for Colorado State University. The numbers demonstrate that nonresident students in the admissions process are not displacing Colorado residents.

All applications submitted to Colorado State University are reviewed in a holistic way that looks beyond GPA and test scores. Other factors considered may include employment, leadership activities, involvement in clubs or sports, community service activities etc. Additionally, performance trends are considered; the GPA of a student increased throughout high school but overall was only marginal. Student essays and letters of recommendation are also considered.

In keeping with our land grant heritage, the admissions rate for nonresidents (average 79%) is slightly lower than that of residents (average 84%). Thirty six percent of the FA19 class was nonresident (excluding international students). The average high school GPA for residents was 3.70 while the average for nonresidents was 3.75. The table below presents the acceptance/enrollment counts by residency and high school GPA for the cohorts of fall 2015 through fall 2019 and includes summer starts that matriculate in the immediate subsequent spring (consistent with federal reporting guidelines).

	FA15	FA16	FA17	FA18	FA19
Less than 2.0	1	59	93	87	108
Non-Resident		31	53	56	61
